

attend the meeting ; the Cataract House has made a reduction from its regular tariff of charges ; the place of meeting is a famous one ; the season of the year auspicious ; and everything seems to conspire to justify a prediction that this will be a large and interesting meeting of this famous association. The date of the meeting has been fixed in mid-August, apart from college sessions, during the vacation season, and at a place where many people like to spend a portion of their outing. The climate of Niagara is always desirable during the heated term, the spray from the cataract giving it a healthy moisture and coolness that is at once invigorating and charming. To visit Niagara under the auspices of this association will afford the tourists exceptional opportunities for the enjoyment of a rare and radiant scenery that is the most sublime in the world. One session will be devoted to the exhibition of specimens and giving their histories. The scientific work of the association will begin on Tuesday morning at 10 o'clock and end Friday at 1 o'clock, and it is expected to so arrange the programme as to afford the members opportunity to visit the places of interest each day on the adjournment of the afternoon session. It is expected that the inducements to attend this meeting are such that Fellows will not only come themselves, but bring their families and invite their friends as well to visit the wondrous cataract.—*Buffalo Medical Journal*.

#### BRITISH MEDICAL ASSOCIATION—MONTREAL MEETING.

---

The time of the great medical event of the year at Montreal is not very far distant, and it behooves all who may not have decided to be present at the meeting to speedily make up their minds, and, if the visit is contemplated, to at once inform the Committee at Montreal of the fact. We learn that they are very anxious to know approximately how many they will have to entertain, and urgently request all who intend going to at once inform the local secretary, Dr. J. A. Springle, 2204 St. Catherine street, of the fact. The probable attendance of medical men is estimated at the present time to be about one thousand—two hundred and fifty from England, fifty from other colonies, three hundred from the United States, and four hundred Canadians. Three or four lady members have signified their intention of coming across the Atlantic, among them Mrs. Garrett Anderson. Dr. Saundby, Dr. Barnes, and Mr. Fowke will arrive in Montreal on the 14th of August by the *Parisian*.

Dr. Adami writes that the names of members who intend coming across are coming in daily, but when he wrote was not certain that a special steamer would be required, but he is prepared at any moment to charter a vessel in the event of a sufficient number of late applicants appearing.

Seven eminent men who cannot be present at the meeting have promised to send demonstration specimens. The English secretaries are generally working in that direction.
