*The Spirit of the Times*, of New York, says: 'An extraordinary advance in the use of cocoa seems to have taken place of late years in England. In the House of Commons this last session the Right Hon. G. J. Goschen, the Chancellor of the Exchequer, called attention to it as a cause for much of the falling off of the use of coffee. He attributed it in a measure to the position a preparation of cocoa known as "Grateful and Comforting" had taken. In accord with this suggestion it may be interesting to follow the course cocoa has taken in England since 1832, when the duty which had been standing at 6d per lb., with an importation of over half a million pounds, was reduced to 2d per lb., and not long after we find the home pathic doctrine of medicine introduced into the kingdom, and that the use of cocoa was specially advocated by physicians adopting the mode of practice. Soon after we find the first homeopathic chemists established in England (the firm of James Epps & Co.) produced a special preparation, which only needed boiling water or milk to be at once ready for the table, and the superior character of this production has, no doubt, done much, as the Chancellor of the Exchequer said, to bring about (backed as it was by a further reduction of the duty to 1d per lb.) the advance made.'

An advertisement appeared a short time ago for a woman to 'wash, iron and milk one or two cows.' We can understand the cows want milking, but why on earth they require washing and ironing is beyond our comprehension.
