A BARGAIN IN USEFUL INFORMATION

Here are four books containing practical information of every day use, sold at the remarkably small price of **25c.** each. You should have one or more of them.

Turning and Boring Tapers

By Fred. H. Colvin

There are two ways to turn tapers: the right way and one other. This treatise has to do with the right way; it tells you how to start the work properly, how to set the lathe, what tools to use and how to use them, and forty and one other little things that you should know. Price **25c.**

Threads and Thread Cutting

By Colvin-Stobel

This clears up many of the mysteries of thread cutting, such as double and triple threads, internal threads, catching threads, use of hobs, etc. Contains a lot of useful hints and several tables. Price **25c.**

Drafting of Cams

By Louis Rouillion

Every mechanic is interested in Cams, and this shows just how to lay them out for any kind of work you may have. There is more real information in this little book than in others that cost more. Price **25c.**

Brazing and Soldering

By Jas. F. Hobart

The only book that shows you just how to handle any job of brazing or soldering that comes along; tells you what mixture to use, how to make a furnace if you need one. Full of kinks. Price **25c.**
