

Home, Sweet Home

THE most beautiful thing in the world to-day is the home life which has been developed.

But life insurance should be carried so that in the event of the father's death the family will not be compelled to forsake the old place for one less comfortable. The Mutual Life of Canada prides itself on being

the Company that makes Canadian homes—the Company that protects Canadian homes—the Company that maintains Canadian homes.

Provide against the loss of the old home in the event of your death by means of a policy in

Questions and Answers. Miscellaneous.

Horse Radish.

Would you kindly state, through the columns of your valuable paper, what you think a proper price for horseradish roots, stating which is the better way to sell, by weight or measure, and give prices in both cases?

FARMER'S DAUGHTER.

Ans.—A local gardener sells his at 15 cents per lb. Some sell by the bunch, putting up in small bunches of about a pound. In the United States it sells in large quantities to canning plants for from \$80 to \$100 per ton.

Sweet Clover.

I would like to know what kind of soil is best for sweet clover. I have some sandy loam and some clay loam, and the balance of my farm is a heavy gray or brown clay, with a level surface. I would like to have two fifteen-acre fields of the clay land for pasture, and would like some information as to what class of soil is best adapted to the production of sweet clover. R. T.

Ans.—Sweet clover should do very well on any of these soils. We have seen it growing luxuriantly on almost all kinds of soil, and your clay land should produce a good yield. Sow about 20 lbs. per acre. Of course, it will not do the best on wet, poorly-drained soil.

Eveners for Riding Plough;

Is there an evener for four horses on a riding plow arranged so as to keep three on land and one in furrow? Please send the dimensions if there is any. The plow has a tongue which is between the horse in the furrow and the one next. I want to drive four abreast. E. C. W.

Ans.—The accompanying cut illustrates a method of arranging eveners for this purpose. It was sent in by a correspondent, and we invite readers having other such eveners to describe them through these columns. A and B are whiffletrees such as are used on any implement; C is a strong doubletree, 5 feet 4 inches long, and from right end to center of first pulley is 7 inches. From

center of first pulley to where plow-head clevis fastens, is 15½ inches. Also, from center of first pulley to center of second pulley is 24 inches. At left end of doubletree, C, bore three holes, first one 2½ inches from end, second hole 2 inches from first one, and third hole 2 inches farther on, and fasten clevis in whichever one is found to be best. The chain passing through the pulleys will work more satisfactorily if links are not too large, one end being attached to B, and the other end can be wrapped around beam of plow at any convenient place, usually where the coulter is, and must be hitched up fairly tight, so that there will not be too much slack when turning to the left. It is claimed that this evener works without any side-draft.

Herr Doctor—"Your Majesty is much run down. You need a sea voyage." The Kaiser (bitterly)—"Vere can I go to Aquarium?"—EX.

Winter Hauling Made Easy

FOR the use of our customers whose hauling cannot be stopped by the snows of winter, or to whom the snows are welcome, as furnishing a smooth hard road over which to move their products, we offer a line of bob sleighs so complete that each man may find in it the kind of sleigh he needs and uses.

Unless a sleigh will stand hard knocks, it is of little value in Canada. Therefore, we make these sleighs, above all else, strong. Even the lightest one-horse sleighs are as strong as selected pieces of high-grade wood and steel and the most careful workmanship can make them. No imperfect or unsound material finds its way into the manufacture of these goods.

Each sleigh we sell is guaranteed, with fair usage, to carry its load over ordinary roads and to do the work intended for its size. We make a liberal guarantee arrangement to take care of the satisfaction of our customers.

See our line before you buy. It is handled by I H C local agent who will show you how big a line it is. Or, if you cannot conveniently see the agent, drop a line to the nearest branch house and we will send full information.
