PAGE—the Always Uniform Fence

The great big fact about Page Fence is its uniformity. Fence woven on Page Looms is sure to be uniform, and that's the only kind of fence you can afford to buy. The other kind may be a little cheaper in first cost, but what a difference a few years make. Many of the first fences we made, and that's over 25 years, are still giving the best of good service. best of good service.

PAGE Wire Fences

Are Full No. 9 Gauge Wire

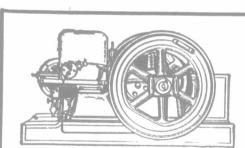

Even the locks are full gauge. The finest quality wire is used—extra strong, very rigid, tight-locked and evenly spaced.

For a life-time security against fence troubles, get

Page Fence and Gates.

There is a Page Wire Fence for every purpose. Page Gates, built as carefully as Page Wire Fences, are obtainable in every regular size. Write our nearest branch for price list of all Page Products—Page Fences, Gates, Engines or Woodsaws. Information will be cheerfully given. Drop us a line to-day.

SHIPPING TERMS—Freight allowed, on all shipments of 200 pounds or more, to any place in Old Ontario or Quebec, when payment is made within thirty days.

The Best Workman You Can Get

is the one that never tires. The sturdy little Page is always on the job. It is always ready

Page is always on the job. It is always ready for work when you are.

It will do more work than a hired man, and it costs about as much to buy as one of his monthly cheques. Its running expenses only amount to about 2c. per hour for fuel.

A Page will hoist hay to the mow, turn the churn, run the cream separator, the mechanical milker, and pump water for the stock, and as many other odd jobs around the farm as you can dig up.

There are two types of Page Engines—one burning gasoline, the other kerosene (or gasoline); and 5 sizes, ranging from 1½ h.p. to 7 h.p.

Banana Marmalade.

Bananas are rich in food properties, and are especially good when cooked. When the jam jars are empty this recipe, from "American Cookery," may be appreciated.

Take 1 cup water, 2 lemons, 6 large bananas, half as much sugar as cooked fruit pulp, or less sugar if a thinner marmalade is preferred. Peel the bananas and drop at once, sliced, into the water, which should be boiling. Add the juice with fruit in gelatine jelly.

of the lemons and cook until very thick, stirring to prevent burning. Measure the pulp now and add the sugar, then cook down until clear and amber in color. The recipe should yield 11/2 pints marmalade

The Scrap Bag. Peanuts as Food.

Peanuts are a valuable food. They

Spots on Floor.

If you want to stain a floor which is spotted be sure to remove all spots before applying the stain. They will usually succumb to turpentine and fine sandpaper. Scrub well, then apply stain and wax as

Pressing Waists.

may be used in salads, in cake and mixed those that have become mussed is to sprinkle the ironing sheet well. The

steam which arises from it will be sufficient to take out the creases.

. . . . Use Plenty of Water.

The majority of people do not drink nearly enough water, which acts as a solvent to carry off the surplus of uric acid, chlorides, etc., from the system, and also aids digestion and helps to prevent constipation. Rheumatism and pyorrhea in the teeth are said to be due to too much uric acid in the system. to too much uric acid in the system.

. . . . House Dresses.

The neatest and most serviceable house working dresses for the summer are made of percale or gingham, made to button to-gether at the waist so there can be no slipping. As the waist always soils and wears out sooner than the skirt, it is advisable to have two waists for each skirt, wearing them alternately so that in case they fade they will all look alike. An apron of thin oilcloth should be used to prevent soiling.

Banish Carpets.

"The weekly sweeping, and still more the half-yearly house-cleaning, illustrate, as when a carpet is beaten, the infinite number of particles which, unseen, are constantly accumulating in houses. It is further only necessary to leave a room closed in which a carpet is present to detect strong odors and the effects of moisture in the decomposition of the organic materials present in it, through the action of microbes which cause decomposition. We thus realize how one of the first steps we must take to keep a house clean is to allow nothing to be onthe floor which will retain particles of organic matter, and the microbes which settle upon it, which cannot be readily and frequently removed and cleaned in the fresh air. Thus polished, hardwood floors with rugs fulfil best both sanitary and aesthetic houshold conditions; while, in many instances, nothing serves the purpose so well as linoleum, which can be cleaned with a moist cloth, or, still better frequently rubbed with a weighted organic matter, and the microbes which ter, frequently rubbed with a weighted felt block, which has been treated with paraffine dissolved in turpentine, or with some other wax preparation."—Conservation of Life.

Wheat Substitutes.

There is no difficulty in finding wheat substitutes,—unless the will is lacking. And how could that possibly be when all Western Europe—our soldiers and the people of our Allies—are needing wheat bread? Our sacrifice in doing without it is so little; theirs, in the great fight and in the devasted country, is so immeasurably great!

Oatmeal makes splendid cake to be eaten hot with butter, as well as scones and porridge; cornmeal is excellent for porridge, muffins, pancakes and Johnny cake; buckwheat pancakes and syrup are a dish fit for a king; barley meal makes palatable and nutritious brown bread little different from the bread made of graham flour or entire wheat; rye bread also is liked by some people; boiled rice, boiled pearl barley and tapioca make delicious and nutritious desserts; po-tatoes and vegetables of all kinds may be made important factors in conservation.
"Where there's a will there's a way."

House-cleaning Made Easier.

WHEN every woman owns an electric vacuum cleaner, and has electricity to run it, house-cleaning will be almost a nightmare of the past; for use of such a cleaner every two weeks will keep the dust out of rugs, upholstery, and even off the walls and curtains, so effectively that the house is kept always clean, and house-cleaning becomes re-solved into a little extra washing-up of woodwork, and clearing-up of closets and

the attic. It is no vague dream that, some day, practically every woman in the more thickly-settled portions of Canada may be able to avail herself of such conveniences. Electricity was coming—full force—before the war, and the war can't last forever. Things have been checked, but they will go on again.

In the meantime, in many homes, the semi-annual house-cleaning must go on as usual, although the now prevalent use of rugs over painted floors, dustless mops, and sash-length curtains, has driven away most of the horrors of the old-time tacke draperies. Every year,
