

At least one-third
lighter draft
Genuine
Kemp
Manure Spreader

You can only buy one manure spreader with the Reversible, Self-Sharpening, Graded Flat-Tooth Cylinder - and that is the Genuine Kemp. Because of this Graded Flat-Tooth Cylinder the Genuine Kemp is at least one-third lighter draft than any other spreader. There is less friction on the Flat-Tooth Cylinder, because the teeth are wide and graded, on that account only one-third as many teeth are required, which reduces the friction when the manure is passing through the cylinder. The square or round teeth on ordinary cylinders are not wide enough apart and the manure backs up, chokes cylinder, causing heavy draft.

The manure cannot back up against the flat teeth, and because the flat teeth are graded they will handle and thoroughly pulverize all kinds of manure from the clear gum to the strawy material.

There are many other exclusive improvements on the Genuine Kemp, our big catalog describes and illustrates them fully. Send for a copy and learn some new facts about manure spreaders.

There would be twenty times as many manure spreaders in use in Canada today if farmers realized the economy of spreading manure with the Genuine Kemp. The Genuine Kemp will pay for itself faster than any other farm machine.

But send to us for catalog "F" That's your first step. We are sole selling agents.

FROST & WOOD CO., LTD. SMITH'S FALLS, CANADA

**Can You
Make Him Answer?**

Can you make any other common cream separator answer this question frankly? Ask him why his machines leave heavy bowls filled with disks or other contraptions. He will put you off with an unsatisfactory explanation. He has only common machines to sell. Does he realize he will lose your order if he advertises his machines and needlessly complicated?

Contents of one of the common machines which are being rapidly discarded for Sharples Dairy Tubulars.

Sharples Dairy Tubular Cream Separators

are entirely different from and vastly superior to common machines. Dairy Tubulars have suspended, self-balancing bowls fed through the lower end. Only known method of proper construction. Contain neither disks nor other contraptions. Produce twice the skimming force, skim faster and twice as clean as common separators. Patented. The World's Best. The manufacture of Tubulars is one of Canada's leading industries. Sales exceed most, if not all, others combined. Probably replace more common separators than any one maker of such machines sells.

J. S. DUFF,** Minister of Agriculture.

The Full Percentage of Cream

Getting the full percentage of cream from milk depends as much upon the oil used to lubricate the separator as upon the separator itself. Gummy oil will cut the fine bearings of your machine, spoil its balance and waste good cream in the skim-milk pail.

STANDARD Hand Separator Oil

never gums, never rusts, never corrodes. It feeds freely into the closest bearings and insures the perfect lubrication that is essential to the free spinning of the bowl and discharging the separator of cream promptly. It is the only oil that will let your separator run longer and better.
