FREE HELP FOR MEN The only remedy known to science which will positively cure lost manhood is "RESTORINE," the marvellous German Remedy discovered by Dr. Jules Kohr. It is controlled in this country by the Dr. Kohr Medicine Company, a concern which has the highest standing in the medical world. This treatment has cured thousands of men, young and old, when the best known remedies have failed. If you are suffering from diseases of the generative organs such as lost manhood, exhausting drains, nervous debility, the results of abuse, this remedy can and will cure you to stay cured. The headache, pimples, varicocele, pain in the back and failing memory, disappear completely in the worst cases in from one to two week's treatment. We make the honest offer of a cure or return your money. Thousands of testimonials. Correspondence treated strictly confidential. FIVE day's treatment sent free with a book of rules for health, diet and advice. Our greatest successes have been those who have failed with other treatments. This remedy is regularly used in the French and German armies, and the soldiers in these countries are models of strength and vitality. Write for sample sent securely sealed in plain wrapper.

Address DR. KOHR MEDICINE CO., P.O. Drawer A 2341, Montreal.

Dunn's Hollow Concrete Block Machine

Most compact, portable and easiest operated machine in the market. Price so reasonable that it would pay you to buy one if only to make blocks for one fair-sized building. Blocks are made out in the open air, alongside of your building, or down by your sand pit. No firing or baking; no steam or other power required. Skilled labor not necessary. Full directions furnished with machine.

MAKES BLOCKS for houses, bank barns and buildings of every description. Cheaper than brick or stone and much handsomer. Warmer in winter; cooler in summer; and indestructible.

GOSSIP.

Results from well-directed advertising are so sure that it is advisable to prepare for taking care of them even before the advertising is written. "Follow-up" is the first word in publicity as well as the last.—[Printers' Ink.

"Do you remember, dear," he asked, as they sat down on one of the rustic seats at the summer resort, "that I cut our initials on this tree behind us three or four years ago?"

"Why, no, George," she replied. "I don't remember that. Are you sure?"

He rose, walked around the tree, and inspected the bark closely.

"Yes," he said. "It's the tree, all right, but it was another girl."

Some years ago Phillips Brooks was recovering from an illness, and was denying himself to all visitors, when Robert G. Ingersoll called. The Bishop received him at once. "I appreciate this very much," said Mr. Ingersoll; "but why do you see me when you deny yourself to your friends?"

"It is this way," said the Bishop: "I feel confident of seeing my friends in the next world, but this may be my last chance of seeing you."

A curiosity in threshing is reported from Oregon. Last summer a large quantity of wheat was cut for hay, as a reserve of food for cattle, in the event of lucerne falling short. As the winter proved a mild one, hardly any of this wheat hay was required for the animals, and the price of wheat, 80 cents per bushel, was high enough to tempt farmers to put the hay through the threshing machine. It yielded 10 to 15 bushels per ton of third-grade wheat, and paid well for threshing.

WISCONSIN STALLION LAW.

Professor W. A. Henry, dean of the Wisconsin College of Agriculture, has favored the "Farmer's Advocate" with a copy of the new bill regulating the registration and licensing of stallions passed lately by the Wisconsin Legislature. The bill was drafted by Dr. A. S. Alexander, Professor of Veterinary Science at the Wisconsin College of Agriculture, and is intended to eliminate the scrub stallions from the breeding industry of the Badger State. All stallions in the State under the provisions of the bill are required to be recorded at the horse department of the College of Agriculture, with full description and pedigree, which description and breeding shall be forwarded for record with the register of deeds in the county where the stallion is owned.

Owners of stallions to obtain license have to make affidavit that their horse is free from hereditary or contagious disease. The license certificate will show whether the stallion is a pure-bred or grade animal, and has to be posted at the stables where the stallion is kept during the breeding season. The act will not take effect until Jan. 1, 1906, and is expected to encourage the use of sound pure-bred sires.

The new law is an advanced step in State supervision of the breeding industry, and is a realization of the principles of Government control of live-stock husbandry as well as public sanitation and pure-food production.

The law is a wise provision in the best interests of the horse industry, and is expected to eliminate scrub breeding stock. The bill is framed on lines similar to a law in force in the Canadian Northwest.

TRADE TOPIC.

THE OULVIE MILLING CO. have issued a beautiful colored engraving, a copy of which has reached us with their compliments. It is almost as attractive from an artistic standpoint as the bread made from their famous "Royal Household" flour is from a satisfying domestic point of view.

THAT'S THE SPOT!

Right in the small of the back. Do you ever get a pain there? If so, do you know what it means? It is a Backache.

The Cream Separator that is the Cheapest in the End.

There are some folks who are everlastingly trying to get "something for nothing." They buy a wagon at a "bargain" price because the agent says it's "just as good." And then, after a few months, when the tires and spokes have all loosened up, they cuss the wagon.

Price not the only Difference.

It's the same way with cream separators. You can buy many other separators for less money than the U. S. Cream Separator sells for, but before you've finished paying for the experiment you'll find price isn't the only difference. The cheaper separators soon get out of adjustment because built of cheaper material by inferior manufacturing methods; they consume twice the necessary amount of oil; they have a bowl that will not run true, and does not skim clean. The repairs in the first few years would pay the difference for the U. S. Cream Separator.

Durability is Important.

The U. S. Cream Separator has stood the test of time. Many of them have been in use for 10 years, and cost less than a dollar for repairs. They run easy, skim cleaner than others, have a simple bowl, enclosed gears, and a convenient low supply can.

The Vermont Farm Machine Co., of Bellows Falls, Vt., have printed in a handsome booklet a few of the thousands of letters from satisfied users of the U. S. Cream Separator. This booklet will save you money when you buy a separator, and a post card will bring it to you.

To insure prompt deliveries and to save freight charges for their Canadian customers, they ship from their warehouses at Montreal, Sherbrooke, Hamilton, Winnipeg, Calgary and Vancouver, but all letters should be addressed to Bellows Falls, Vt.
