## DDR-13 JACKHAMER Doing Well Up North

A mine superintendent in the Cobalt district says this: "The results we have obtained from the little Leyner machine (DDR-13 Jackhammer) are more than satisfactory. The machine has worked in the same rock and in the same heading with larger machines, and it is drilling a fourteen hole round in seven hours."

**DDR-13**  
**Dry**

**DDWR-13**  
**Wet**

Both types have the new powerful blowing device
