DOVE ROCK DAY.

The girl had never been to Lake George before, and it was hardly her fault that she irretrievably injured her social standing before she had been at Horicon Ferry two hours. Grace Weight was an actress who had entered the theatrical profession as a chorus girl. She had now reached the rank of an ingenue in one of the popular theatres. Everybody at Horicon Ferry goes to the Landing to inquire for mail and to see what manner of people are going up the lake. The morning and evening steamer arrivals are the two incidents of the day, and John Treadwell was as curious as the rest of the little colony which dwelt on the point of land which juts out into the upper lake. He was holding a flaring red parasol over the head of his richest aunt, when he saw Grace Wright hastening over the gangplank. Before he could beat a retreat the girl had nodded to him, and he was compelled to acknowledge her salutation with a perfunctory dip of his hat.

The next moment the girl had given her baggage to a porter, thereby proclaiming her intention of pecoming a guest of Horicon Ferry's one hotel.

"It must, you will remember that it is decidedly improper to mingle your business and soul acquaintances. She is rather handsome, 400. Has her mother with her between the respectability."

"Autu-Jennimh." said the young man, "the young woman is a member of Mr. Payson's company. She is a girl of string character. She has been on the stage almost from childhood."

Then he fell into the good graces of his Aunt Jemimah. That meant receptions and afternoon teas, and an introduction into one of the "smart" sets of New York. That is how he met Agnes Shelton. She thought that his life was "so interesting" and "so fascinating;" and he, who had almost forgotten the days when he was a drudge and a packhorse, never told her anything to the contrary. She had money enough for two. He saw his opportunity and availed himself of it. They were engaged.

She saw him for fife first time in months at the landing at Horicon Ferry.

The principal occupation of the so-called "society" element at Horicon Landing consisted in making life unendurable to the majority of those who came there. There were three distinct estates—the Hotel set, the Justin set and either owned or rented a cottage for three years in succession, was entiled to the rank of "Hamketeer." He had the right to snub anybody who came within sight of the little cluster of cottages at the end of the point. There was also an overgrown country farm house, not far from the hamlet, kept by the venerable Mrs. Justin. A few, and only a few, of those who stopped at Justin's were recognized by the Hamketeers. Those who stopped at Justin's were recognized by the Hamketeers. Those who stopped at Justin's were recognized by the Hamketeers.

They belonged to a class which never came to Horicon Ferry for more than one year.

After the strictest set of the Hamler eers was Miss Jennimah Pettingill, a cotager. It was her pride that in all the ten years she had been coming to Lake George no hotel guest had ever darkened her threshold. By right of seniority, she was the social law-giver of Horicon Ferry: and Grace Wright had not been at the hotel more than they day a before she was obliged to assert her authority. One of the Hamleteers, who and once seen the young woman in a hor Shakespearean role, insisted upon iting the girl to give an open-air reading. There was a brief, sharp struggle, defence Wright and her mother wrintted to go their own way. They not seem even to be aware of the that they had been socially ostrat. "It seems strange to me," remarked the dramatic critic of The Daily Harblinger to the night editor of The Morning Rainbow, who had joined him at a late supper in a restaurant, "that newspaper men have such a predilection for marrying actresses. I supposs that we shall be hearing of Treadwell's seeking divorce sometime within the next six months. He was married this evening to Gracie Wright, who used to be at Payson's."

Thrice the age of a deer is that of an

cagle. Thrice the age of an eagle is that of an oak tree. This is to assign the deer a period of more than 200 years; and the estimate is supported by many highly circumstantial stories. Thus, Capt. McDonald of Tulloch, who died in 1776, aged 88 years, is said to have known the white hind of Loch Treig for fifty years, his father for a like period before him, and his grandfather for sixty years before him. So, in 1820, McDonald of Glengarry is reported to have killed a stag which bore a mark on the left ear identical with that made on all the calves he could catch by £wen-Mac-lan-Og, who had been dead 150 years. Analogous stories, it may be noted, are told in countries on the continent of Europe, where deer are to be found in any number. But, alasi the general opinion among experts would seem to be that thirty years or thereabouts is the limit of a deer's life.—Chambers' Journal.

Claver Sir Charles.

Here is the story of the lord chief justice of England.

When he was still known as Sir Charles Russell he went to Scotland to help the Liberals in a certain campaign.

He purposely began his speech with some very badly pronounced Scotch.

After the confusion caused by his apparent blunder had subsided, Sir Charles said:

"Gentlemen, I do not speak Scotch, but I vote Scotch."

Tremendous applause followed, whereupon Sir Charles proceeded: "And I often drink Scotch."

After this he was the hero of the hour.

The man with the florid face and the bold head grew more and more uneasy as he sat at the restaurant table. He dried to rend a newspaper, but every now and then would drop it, adjust his glasses and glare up and down the room to find the waiter to whom he had given his order. At last he managed to detain him, at the risk of being scalded by the soup he carried, and inquired: "How about that dinner I ordered?" "It will be here immediately, sir," was the answer.

The young Marquis of Londonderry, who amazed all England by resigning from the Northern Union of Conservative Associations, and who was at once re-elected to the presidency of that organization, is one of the few Englishmen who hold to ancient ideas and who refuse to be admonished by the spirit of the times. This nobleman is now 45 years old, and he is descended from one of the proudest families in all Europe. He is the sixth earl of his title, and his blood goes back to the Vanes, the Tempests ad the Stewarts. The title of the family is Castlerengh, a title that was made infamous by an ancient statesman whom Lord Byron preserved in his verse as the archtraitor to his country. But the mild-eyed young man who inherits the title to-day is in no way responsible for the sins of his ancestors, and, as a matter of fact, is not held for them. The Earl was educated at Oxford, and as Viscount Castlerengh he ran for Parliament in 1874 in

Enemies to Flies.

When the house fly takes his departure in the fall it is often because he has become a prey to the ravages for a tiny parasite that has brought his existence to an end, says The Chicago Intercocean. Of vegetable malignant germs, the most simple and minute produce bacterial diseases. Some of these organisms consist of an oval mass of protoplasm, multiplying very rapidly by self-division, the new individual often forms ing chains. A germ introduced to a figure multiplies so rapidly that the blood and tissues are soon disorganized, and death results. Eutomphthorae is the name of a parasite whose vectims, flies and other insects, are found dead in large numbers in autumn.
