Fads and Nostrums 000 By Joseph Greenaway

Back in old London after a live months wandering from place to place; from hotel to lodging-house, from lodging-house to—well, I won't go into details too carefully. There are some things that are best left unsaid.

At any rate, I have visited New York and bathed in the surf at Atlantic City. I have seen once again eastern (unfar-

I have seen once again eastern Unior-io. I have worked out in the open fields—aye, harvesting in the sunshine. Then again over the western ocean, in an old traffip steamer to Antwerp. Twenty days on hard grub and twenty nights in a narrow, derby fo'castle. From Ant-werp to Brussels, then through Belg um to Paris and over the "Straits" to Ing-

And at last back in old London town. Leaving out the novelty of the dif-ferent new sights, one thing struck me most vividly. How badly the artificial life of the big cities compare with the clean, honest, work-a-day life of the country!

only in New York about three weeks, but during that short time I was worried and pestered up with circulars and letters and budgets advising me what I should do, and what I shouldn't do. First one advised me to live on nuts like a monkey. Next I was tall that I devented to much peat tall that I devented to much peat told that I devorured too much meat (God only knows where my candid friend got his information from). One learned citizen mailed me a budget of scientific facts—compiled in a wonderful artistic fashion—lauding to the skies "a newly invented, highly concentrated fod tablet." There was no need to trouble about cooking any longer-swallow a pill and you were nour

ed for the day.

If, by any chance, we ever follow our learned friend's advice, the next generated by horn toothless.

And it is very much the same in all big cities. Life becomes artificial. In Brussels and Paris everyone talks and dreams and exists solely for pictures, statuary and cafes. Of course. Art is a wonderful thing—of course. But af-ter all it is only an imitation of life. It ought to show us how to be able to lead a more noble and beautiful exis-But solid facts prove different. I don't suppose there could be a more degenerate, insipid crowd of human bengs than the general run of students that throng around the so-called art centres of Brussels and Paris.

Eccentric dress and long hair and a lorough acquaintance with indecent thorough acquaintance be their stock in trade And even here in old London, life is just the same. The present fad seems to be politics. Everybody talks and argues in politics. If men want work or

the fleet needs enlarging, a leading pub-lic man gives the town a wonderful worded harangue in beautiful, stately English, and the matter is then sup-posed to be remedied. Poverty becomes an interesting topic t afternoon tea, and national danger

is discussed in the dining rooms; Perhaps I am of an old fashioned turn of mind. But to me the country life seems to be the only life worth living. What men especially working men-can see in city life, I fail to understand Outside of moving picture shows, and other like excitements, it is not worth the candle.

Give me the countryside. Give me the purling brook and the green fields. A place where one can breathe freely, where one doesn't feel cramped

And above all, where life is a solid fact and there is less humbug and fads and rostrums.

London, 15th Nov., 1911.

BETTER THAN SPANKING

There is a constitutional cause wetting. for this trouble. Mrs. M. Summers, Box W. 8. Windsor, Ont., will send free to mother her successful home treat-nt. with full instructions. Send no money, but write her to-day if your child-ren trouble you in this way. Don't biame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine dif-ficulties by day or night.

POINTED PARAGRAPHS.

(Cincinnati Commercial Tribune)

More names get into the paper on account of divorce cases than good deeds. It seems hard for some women to have fatth in their husbands unless nobody

fatth in their husbands unless honoupelse has.

A man can telephone and find his wife is there, but she can telephone to his office and find he isn't.

Annarently nobody ever made a fortune without thinking, when he settled down to enjoy it, how small it was.

Money that burns a hole in the pocket of most men seems to be a double lining for the pocket of a certain kind of man.

TOO TALKATIVE (Success Magazine

It was a beautiful evening and Ole who had screwed up courage to take Mary for a ride, was carried away by their magic of the night. "Mary," he asked, "will you marry me?"

"Yes, Ole," she answered softly.
Ole lapsed into silence that at last became painful to his fiancee.
"Ole," she saiod desperately, "why you say something?" tank," Ole replied, "they bane too said already."

"All arrivals are washed," explained the warden of the prison. "And if they pick up a fuss?" "Then they are frompick up a fuss?" "Thed." Pittsburg Post.

TRICKS OF TEMPERATURE. Queer Contradictions In Its Effects on Substances,

On an ordinary Fahrenheit the on an ordinary Fantenett thermome-ter there is written opposite 212 degrees "Bolling point of water," and opposite 22 degrees, "Freezing point of water," Neither of these is correct, says the Baker's Weekly, except for a certain

Baker's Weekly, except for a certain condition of the atmosphere, and that is when it gives on the barometer about 30 inches, or 15 pounds pressure to the square inch.

This is the ordinary pressure at what is known as sea level, and to this all thermometers are calibrated. In a mountainous region the pressure is hardly ever so much as 15 pounds, and water boils at sometimes as low as 250 degrees. If water is boiled in a diving bell, where the pressure is 40 or 50 pounds, a square inch, its temperature will be several hundred degrees instead of 212. If water is boiling in a near vacuum the temperature is so small that the hand thruse into the water would actually feel cold.

What has been sal dabout the boiling

old.
What has been sai dabout the boiling

thruse into the water would actually feel cold.

What has been sai dabout the boiling point applies to some extent to the freezing point applies to some extent to the freezing point; but here it differs for different material; whereas the remarks about the boiling point of water aply to the boiling point of water aply to the boiling point of all ilquids. Some substances when they freeze become larger, while others are smaller.

On this depends the freezing point at different pressures of afmosphere. Water expands on freezing; so do type metal and some other things. All other substances become smaller on freezing. Water pipes burst when the water freezes. Coins of gold and allyer are stamped instead of being moulded, for the metals grow smalle ron freezing or solidifying, and consequently the coin would be wabbly.

It has been found that the things that expand on solidifying, like water, freeze at a lower temperature, when the pressure is facreased, while the eithers freeze at a higher. When a substance that expands freezes under higher pressure than usual it has to exert more force to shove the pressure away, and consequently has to use up more of its heat and consequently becoming colder.

Take the substance that contracts when it solidifies. The pressure will help it to get smaller and consequently hie greater the pressure the less heat it has to lose on attaining the solid state; so it will freeze at higher temperature. If the pressure is great enough it may freeze or solidify at 1,000 degrees temperature, which is high enough to change most substances to vapor under ordinary atmospheric pressure. This is one of the reasons advanced to prove that the interior of the earth is solid, for the assumption is that the core is made up of substances that contract when freezing, and there is of course an enormous pressure a few hundreds of miles below the surface. he surface.

APPENDICITIS:

Underneath one curve of the intestines is a little fishy tube known as the vermiform appendix. When this becomes infermed, it gives rise to a disease known as appendicitis.

This inflammation is generally brought on by the use of too many cold drims, or by other means which will have a tendency to chill the apendix. Small bits of food or seeds lodging in the apendix of tood or seeds lodging in the apendix. The first symptom of appendicitis is a severe cramping in the right side, to releave which the leg is drawn up close to the body.

The severa pains may come and pass away shortly. Two or three such attacks are not unusual before the disease really becomes dangerous.

away shortly. Two or three such attacks are not unusual before the disease really becomes dangerous. It is the whest course in the case of apenpdicitis to consult a physician at the first intimation of the disease. He may advise that the organ be removed. If this is the case his advice had better be followed, because at the beginning of the disease the operation is rarely futal. If it is not attended to the malady becomes so serious that an operation is useless. Then death will follow. I kennoval of the appendix has no effect on the body as the appendix is a quite useless organ. uselese organ.

WHAT CAUSES THUNDER.

Whenever there is a violent storm, many people make up their minds to look up the authorities and see what

causes thunder. Then the storm passes and they forget all about it. Thunder is the violent report which follows a flash of lightning. It commences at the same moment as the flash but, as the sound travels only at the rate of about eleven hundred feet a second, while light does so at the rate of about 200,000 miles, the flash of the lightning is the first to be perceived. The noise of the thunder arises from the disturbance produced by the electric discharge in the air; but why the sound should be so prolonged is differently

xplained. One hypothesis was that the sound is building, and from every cloud in the sky. Another is that the lightning itself a series of discharges, each producing particular sound according to the distance at which it commences, and the varying densities of the portions of air it traverses before reaching the ear. A third is that the noise arises from the zig-zag movement of the electric fluid.

AFFECTION BY PROXY.

You May Have Catarrh And Not Know II

HEAD AND THROAT BECOME DISEASED WITH CATARRH FROM NEGLECTING COLDS AND COUGHS.

Catarrh is Treacherous—When Fully Developed is a Horror—Note Its Symptoms.

"Is your breath bad?" 'Is your throat sore?" "Do you cough at nights?"
"Is your voice raspy?"
"Does your nose stop up?"
"Have you nasal discharge?" "Dou you spit up phlegm?"
"Has your nose an itching feeling?

"Has your nose an itching feeling?"
"Have you pain across the eyes?"
"Is your throat irritable, weak?"
"Do you sleep with mouth open?"
"Are you subject to sneezing fits?"
"Do your cars roar and buzz?"
"Are you hard of hearing?"
If you have any of these indications of Catarrh, cure the trouble now—stop it before it gets into the lungs or bronchiel tubes—then it may be too late. The remedy is "Catarrhozone," a direct breathable cure that places antiseptic breathable cure that places antiseptic balsams and healing medication on every spot that's tainted by catarrhal

germs.
There can be no failure with Ca tarrhozone—for years it has success-fully cured cases that resisted other remedies. "No one can know better than I the enormous benefit one gets from the very first day's use of Catarrhozone," writes T. T. Hopkins, of Westvale, P.Q. "I had for years a stubborn case of Bronchiel Catarrh, ear noises, headache, sore eyes, stop ped-up nose and throat. It affected my appetite and made my breat rank. Catarrhozone cured quickly.

Get Catarrhozone, use it, and you are sure of cure-beware of imitations and substitutes. Large size Catarrhozone, with hard rubber inhaler, lasts two months, and is guaranteed. \$1.00, at all dealers. or the Catarrhozone Co., Buffalo, N.Y., and Kingston, Ont.

HER NIGHT AT THE THEATRE.

What a woman calls going to the theatre is something very different. It means taking a nap in the afternoon, so her eyes will be bright at night, and then starting in about 5 o'clock to dress and lay her husband's clean things out on the bed. She loves it. She even enjoys getting her bath towels ready and putting his shaving things where he can get his hands on 'em, and telling the girl to have dinner ready promptly at 6.30. Ie means getting out her good dress that hangs in the closet with a cretonne bay covering it, and her black satin coat, and her hat with the para-dise aigrettes that she bought with what she saved out of the housekeeping at 6.30. It means getting out her good at 6.30. It means getting out her good ings, and her diamond sunburst that he is going to have made over into a La Valliere just as soon as business is better. She loves it all, and her checks get pinker and jinker, so that she really doesn't need the little dash of rouge that she put on "because everybody does it, don't you know?" She gets ready all but her dress and then she outs on a kimono and slips out to the citchen to make the gravy for the chicken because the new girl can never get it as smooth as he likes it. That's of what she calls going to theatre and having a husband .-- American Maza

Dr Morse's Indian Root Pills positively cure Constipation and all Kindred & troubles.

FORESTRY PRESS BULLETIN NO. 44.

An interview with an engineer given recently in a western paper to the effect that there is abundant timber on the line of the Hudson Bay Railway is an illustration of the misapprehension in regard to this matter that exists in the public to this matter that exists in the public mind. Because there are large areas of land on the north on which there is tim-ber of some kind, the conclusion is reach-ed that it is all of present value and that the country has an unlimited supply. As a matter of fact a careful in-spection of the timber along the line of the Hudson Bay Railway made in the years 1910 and 1911 by the Department of the Interior, shows that there is not enough mature timber along the line of that railway to build the road. There are no prairie districts of any extent along the route, there are trees every-where, but owing to repeated fires the forest is, except on the merest fraction of the area, too small for commercial purposes and unless it can be protected from fire until it recahes maturiti, will never be of any use to the country. Ex-plorations in other parts of the northern forested districts tell the same tale. Everywhere fire has worked havoc, and the forest is a mere wreck of what it might have been if fires could be prevented. And unless adequate measures are taken now to protect the young and immature forests which form the most part of the stand, the outlook for the future is too good.

If the northern forests are to continu

to be a permanent source of wealth to the country, it is agreement should be that the fire ranging system should be applied, and public education to the value of the forest is even more neces-

sary.

In Sweden, which has large extents of northern forest, practically uninhabited, similar to those in northern Canada, has about eliminated the fire danger in such districts mainly by educating her people to the value of the forests.

THE SNAKE STONE.

In most accounts of snake charming in India the snake stone plays an important part. When the charmer is bitten the stone is applied to the bite and is supposed to aid in his recovery. Writing to the London field, Lieut. L. Mackenzie gives some notes on two of these stones, which he had the opportunity of seeing. They were triangular in shape, flat and rounded, with smooth polished black surfaces. They are said to come from the hills of Thibet and to be the solidified sality of the markbox. This summel. fied saliva of the markhor. This animal another of in Lieut Mackenzie's not as the "Persian snake cater." Its saliva is thought to contain an antidote to snake poison. The markhor is a species of wild goat found in India, Thibet and Kashmir.

SCENERY HE NEVER SAW. SCENERY HE NEVER SAW.

The most notable of a novel dealing with a country which the author had never seen was Shorthouse's "Join Inglesant." The second volume of that remarkable romance deals in the most det lied way with Italian manners and Italian scenery. Many of the descriptions—the of Umbria, at night, for Instance, and the scene in the pavillon in the forest—are charged with the very atmosphere of Italy; and Florence during the plague lives horribly before our eyes. Yet Joseph Henry Shorthouse had never been in Taly. Enthusiasm and the genius for assimilation evolved it all in a civile house at Ergbaston. — London Chrenicle.

TREE TOP TRAVELLING.

TREE TOP TRAVELLING.

That the squirrel carries a compass and a sextant in his little head along with marvellous memory can only be explained by the wonderful faculty of direction which he shows when travelling along the tree tops. Gray squirrels are migratory, travelling sometimes many nules until they find a good fall of "mast," as the fall of nuts is called when they decide to locate a home there. A squirrel may be entirely he wto the woods, but many old hunters will recollect the nuerring way in which he can make his way through the thickest tre tops to his home, and that by the shortest possible route. In times of food scarcity he has been caught foraging fully half a mile from his home. If the hunter happens to have a dog the gray never touches ground all the way home, but travels inrough the thick tree tops almost as fast as a man en run through the thrush below.—New York Press.

FLAGGED BY A HAT.

FLAGGED BY A HAT.

A through train running after dark about 40 miles an hour rounded the corve in a suburban town, and the engineer was scared aborty, out of his boots, for there floating above the pitaform he saw a brilliant red something by the rays of the headlight, Putting on the air and reversing his engine he come to a quick stop, shaking up the massengers like popcorn, but even he had to smile, for it was a society dame waiting for the local, and in her hat she wore three enormous red ostrich piumes. Perhaps it would be better for women standing on stations—where lightning express trains bass—to have the plumes green and white. Anyhow, it takes a pretty hot hat to stop a lightning express train.—New York Press.

THE WALTZ WILL BE MODERATE.

According to a statement made by a well known teacher of dancing, there will be a revival this year of the old-fashioned dances. "The rapid and some-what hoisterious dances of a few years ago," he said, "had their day of popularity, but for several seasons the moderate and more temperament movements have taken their place. Possibly the style of women's dresses had something to do with this. The quadrille and the minuet are in favor with many persons, and the are 'coming back.' There will always be young people who prefer wild waltzes, even up to the Apache limit, but the waltz of the coming season— and the waltz is really the only dance— will be moderate."—New York Tribune.

CALIFORNIA WATER POWER.

NEARING COMPLETION.

Work on the Chateau Laurier, Ottawa, the new \$2,000,000 hotel, constructed by the Grand Trunk System, is progressing

very favorably.

Nearly all the plastering of the hotel Nearly all the plastering of the notes is now completed, and there remains to be done only the lobby, bar and grill room ceiling. Most of the marble floors for the dining room corridor are laid, and after the plaster work of the lobby is completed work will be started on is completed work will be started on the marble work of that floor. Heat and light have been in the building for the last two months, and when the plas-ter is sufficiently dried in the various public rooms, the decorators will be able to commence the interior decorations. Some of the woodwork for the big rooms some of the woodwork for the big rooms is in the hotel, and the erection of this is going on. The general appearance of the various rooms is beyond expectation, and when completed will be of the richest effect, artistic in design, and wonder fully beautiful.

THE DEVIL'S TAIL

(Detroit Free Press)

But as to the caudal appendage of his satatic majesty, there is no evidence, solentific, theological, or otherwise that he is not saulpped with such an organ. All the best portraits of the great artlists approved by the highest authorities, that we have seen, give him that useful and ornamental equipment and we have claim ed to have seen him personally dearly his possession of one. Hammond does not claim ever to have seen him personally acquainted with flay actual eyewitness, but among those whom whom we have consulted in the books there seems to be a consensus of opinion that as to the actuality of the fall. It is true the dramatic representations of him leave i off, at least in Fauns and similar performances, but it is well understood that in those musical or dramatic pieces he is always in disguiles, and who knows but he has a tail after all carefully concealed away under his clothes for purposes of decelt, as he is well known to be an arrant liar and decelver. (Detroit Free Press)

RICH WOMEN'S BILLS.

(Leslie's Weekly)
Why don't rich women pay their bilis?
The neglect by women of society and the stage to pay their bills promptly has driven a fashlonable New York milkner into bankruptcy. With monthly regularity the bills were sent out, but the thoughtless women, away for the summer, paid no attention to their debts. Butchers bakers, grocers and tailors of the rich everywhere can tell similar stories of embarrassment they have to undergo through the neglect of their wealthy patrons to settle their bills in a business-like way. (Leslie's Weekly)

SCIENCE SAYS ALUM IS UNFIT FOR

USE IN FOOD. In Great Britain no . ne is allowed to sell alum hidden in baking powder, because the English law protects the people from this injurious acid.

Canada has not yet emeted a law against the use of alam, and as alum in baking powder canaot be detected in baking powder cannot be detected by its appearance, many manufacturers are using this condenued acid because it is a cheap adulteran.. It is a fact that alum in your stomach

produces the same districtable results to the delicate organian as you will feel in your mouth by putting a tiny piece on your tongu's Science shows that alum reduces the disk of the gas tric juices and weakens their power of

assimilation, causing indigestion and the ills that follow. No housewife should buy a baking powder made by a manufacturer that is afraid to print the ingredients plainly on the label of each can, and the word ing should state that there is no alum in disguise inside.

SOME DAY.

Some day the gentle dove of peace Will coo upon the nest, And not a wave of anger roll Across the human breast The lion and the lamb will sleep Together side by side. And eggs will live in amity The scrambled and the fried

And Bryan and Bill Lorimer Will love each other so-And Teddy's Ananias Club Will cease to thrive and grow; And Edward Bok will join in song With Lydia Parkham dear; And Charley Fairbanks love the drys Without a cocktail near.

Doe Cook and Peary will make up, And Taft and Pinchot, to; And Jeffries and Jack Johnson cry "How dearly I love you." h. it will be a gladsome time, Oh, it will be a gladsome With all our fightings done. And Bob LaFollette will be loved By folks in Washington.
