THE FUR SEAL

k Sea Animal With Heart, Liver and Kidneys Like a Sheep. The fur seal is a land animal of perrerted tastes, who, living at sea, has had his paws changed into flippers very like the long black kid gloves of a woman. His heart, liver and kidneys sheep and just as good to eat, but his flesh, although just like fat mutton to look at, is rank and distasteful from his habit of eating fish. The whole package is put up to a parcel of thick white fat to keep the body warm, while from the skin grows a heavy crop of beautiful brown fur, protected with large flat oil bearing hairs, making a glossy sarface which slides through the water without friction.

Perfectly feurless, overflowing with fun, a perfect little athlete, marvelously strong, the fur seal is the most delightful of all wild creatures. But, although they live at sea, the seals, being heavily clothed in fat, skin and hair, find the temperate latitudes much too warm for complet during the sure.

The proposals is to cut out using are exactly the same as those of

hair, find the temperate latitudes much too warm for comfort during the summer months. Since they cannot shed their garments like ourselves, they migrate to a subarctic climate, gather-

A STORY OF THE SEA.

The Man Who Braved the Storm and the Sailor He Rescued. Off the coast of Ireland there was a terrible storm, and a crowd gathered on the shore to see a storm tossed vessel not far away being pounded on

Sturdy men launched a boat and the business of line goes.

Imperiled ones.

As the boat came back the watchers on the shore cried, "Did you get them?" and they answered: "All but one. We had to leave him or risk the lives of all." And when they were landed a gralwart fellow stepped from the group and said, "Who will join me in the rescue of the remaining one?"

Then a gred woman cried out: "Oh Then an aged woman cried out: "Oh, my son, don't go; don't go! You are all I have left. Your father was drowned at sea, and your brother Wil-

Anxiously the mother waited in tears and prayers. At last they saw the affeboat coming nearer and nearer, and when it was in hailing distance they called, "Have you got your man?" And the answer rang out clear above the storm, "Yes, and tell mother it's brother William?"

Junction, which would be one of effects of the proposed change.

Nests of the Golden Eagle.

Every pair of eagles whose habits I have had an opportunity of watching over a period of a few years would seem to have invariably at least two Derby Junction to Nelson where the large transfer of their nests. alternative sites for their nests. Some have three, and I know of one with argued that a favorable location for four sites. In fact, I only know of one pair out of many which habitually resort to but one place and only one. The reason for this is, however, apparent, for owing to its situation it has never been disturbed. The nest is in a revenue of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts that the changes have been six of the persistent resorts the persistent resorts the persistence of the persisten is in a small cavern on the face of an absolute wall of limestone rock some 800 feet high, at about 400 feet from the summit. Above the cliff is a talus of loose stone at an angle of forty-five degrees or so, above which again rise other precipices. To reach the nearest point above this nest would be a long day's work.—London Saturday Review.

University of Paris. The doctor's degree in the University of Paris is so entitled as to designate the faculty under which the work was done, as those who do literary work would receive the degree doctor of letwould receive the degree doctor of letters, etc. To obtain the doctor's degree the candidate must possess the lower degree of the corresponding division of work, submit two theses on different questions, reply to questions or objections concerning them, pay a fee of 140 frances and present 100 printed copies of one of his theses to the university. The candidate for the degree doctor of letters must write one thesis in Latin, the other in French. If in the scientific department, the thesis must be on some original investigation; if in theology, the examinations are both oral and written.—School Bulerin.

Left Out in the Cold.

Elder (discussing the new minister's probation discourse)—In my openion he wasna justified in dividing folk into the sheep and the goats. I wadna say that you were among the nuce bad. So what do we come in? He'll no do for na, Jamie. We'll no vote for him.

An Estimate and a Hope.

"You've heard her you say?" marked Mr. Dunies "Ah, she catainly has the gift of song."

"Well, I hope that's what it is," the piled Miss Knox 'I should hate think she puld any lang for it."

CHANGES ON THE

CANADA EASTERN

Twenty Miles of Line From Blackville to Chatham Junction to

The proposals is to cut out using the twenty miles of line from Black-ville to Chatham Junction and use the Indiantown branch exclusively migrate to a subarctic climate, gathering in mmense multitudes where there are fisheries to support them. Their ration is fifty pounds of cod every day, which for a creature the size of a Deroy Junction and a new line from the size of a line in the size of a line here to Newcastle via Blackville, Derby Junction to Nelson and thence along the new division to Chatham and Loggieville.

The present line from Coughlan's to Chelmsford, sixteen miles of the twenty from Blackville to Chatham Junction, passes through wooded and barren country from which there is absolutely no local business effering and which is a dead haul so far as the business from that particular piece

IMMEDIATE DECISION

What makes an immediate decision in the matter necessary is that two important bridges on the present line, near Blackville, and at Barnaby River, while all right for the presen traffic are not capable of carrying the drowned at sea, and your brother William sailed away, and we never heard from him, and now if you are lost I will be left in sorrow alone."

But the man replied: "I must go, mother. Duty calls me." Then he and other brave hearts launched the boat and pulled for the wreck.

Anxiously the mother waited in tears and preserve the sail of the sa

lay of \$12,000 annually in wages and other matters can be made in doing away with twenty miles of line and consolidating the work at Chatham Junction, which would be one of the

NEW LINE FROM DERBY

ob d upon favorably and will soon e effective is the fact that no work of a permanent nature has been done this year on the twenty miles of ine which would be done awaw with the event of the changes being

made, and it is also evident that the diamown branch has been put in s present condition for handling mething more than local business,

does not bind itself or any tender.

THE FORMULA OF "FRUIT-A-TIVES"

Is On The Outside Of Every Box For All The World To See

Bvery user of "Fruit-a-tives" knows exactly what is being taken. The formula of this famous fruit medicine is printed plainly on the outside of every box. We have stated many times—and now state clearly—that "Fruit-a-tives" is made of the juices of apples, oranges, figs and prunes, with valuable heart and nerve tonics and antiseptics.

Bveryone knows that fruit juice is healthful—but perhaps some do not understand why this is true.

Fruit juice consists of about 91% water, 8% of sweet principle, and 1% of a bitter substance. It is the quantity of bitter principle in fruit that gives the fruit value as a medicine. An eminent physician of Ottawa, after years of experimenting, found a method of increasing the bitter principle in fruit juice, thus increasing the medicinal or curative qualities.

The juices are first extracted from fresh, ripe oranges, apples, figs and prunes. By a secret process, some of the sweet atoms are replaced by the bitter principle. Then tonics and antiseptics are added, and the whole made into tablets, now known far and wide as "Fruit-a-tives."

"Fruit-a-tives" is the only medicine in the world that is made of fruit juices, and is one of the few remedies that have let their composition be known from their introduction to the public.

"Fruit-a-tives" is nature's stimulant for the liver, bowels, kidneys and skin. In cases of obstinate Constipation, Liver Trouble, Indigestion, Backache, Rheumatism, Headaches and Impure Blood, this wonderful fruit medicine cures when everything else fails.

"Fruit-a-tives" is sold everywhere at 50c. a box, 6 for \$2.50, or trial box, 25c., or will be sent, postpaid, on receipt of price by Fruit-a-tives Limited. Ottawa.

Ideal for Farm Buildings

AMATITE is the ideal roof for farm buildings. No other approaches it in economy or durability. Here are some of its features: 1. Low Price. Amatite costs, weight for weight, about half as much as ordinary smooth-surfaced rocfings.

2. No Painting Required. Amatite costs absolutely nothing to maintain because it has a real mineral 3. Absolutely Waterproof. Amatite is waterproofed with coal tar pitch, the greatest waterproofing compound

4. Easy to Lay. No skilled labor is needed for Amatite. It is just a matter of nailing down.

5. Stormproof. Amatite is not a flimsy, paper-like felt. It is one the heaviest and the most substantial ready roofings made, weighing 90 lbs. to the square, against 40 to 50 of material in the ordinary "Rubber" roofings. The three important points to be remembered are that Amatite has a real mineral surface, that it needs no painting, and is waterproofed with Coal Tar Pitch. You are only sure of getting them in Amatite.

We send samples free to everybody that asks for them. Drop a postal to our nearest office.
