

EDMONTON NEWS

44 BUSHELS TO ACRE. John Kennedy, the well known farmer at Belmont, east of the Horseshoe district, finished threshing last week, and the returns from 40 acres of spring wheat gave him 1,767 bushels or 44 bushels to the acre. This is an exceedingly good yield, the second best Mr. Kennedy has secured in many years farming in the Belmont district.

GOLD IN THE NORTH. Indian Commissioner Conroy, who just recently returned from the north country, is of the opinion that there are undoubtedly large quantities of gold in the Mackenzie district. This summer Mr. Conroy and party encountered three prospectors who placed gold in paying quantities up the Nahanni river, beyond the second canon.

11 STACKS OF GRAIN BURNED. A fire which destroyed eleven stacks of grain, two of wheat and nine of oats, occurred at three o'clock on Saturday afternoon at Clark's dairy ranch, two and a half miles south of Strathcona. In addition to the grain a separator, owned by Champion Bros., was also destroyed. The fire started shortly after threshing commenced, a spark from the engine igniting the straw in the stacks. No buildings were burned. Both the grain and the separator were insured. The Strathcona fire department was advised of the fire and sent out the chemical engine, which, together with the efforts of the men on the farm, succeeded in saving three stacks of grain.

STOCKYARDS FOR EDMONTON. (Wednesday's Daily.) "I propose to investigate the possibilities of the establishment in Edmonton of municipally owned stock yards. From the information I have at present of the benefits derived by other cities through the establishment of stock yards, I am of the opinion that they would be of the greatest possible benefit to this city."

This announcement was made by Alderman McIntire to the Bulletin yesterday, an announcement which the alderman expects will precipitate action looking to the realization of the project he has in mind.

"I am aware that the project is a big one," the alderman said, "but I believe it can be successfully grappled with to the advantage of the city. My idea at the moment is that the city purchase a block of land, say north of the Grand Trunk Pacific Railway right of way, and yet within easy access of the Canadian Northern and the Canadian Pacific's projected line, in order that both these railways may run spur lines to the yards."

"The obvious benefit of such yards to the city would be the trade resulting in their cattle, sheep and hogs. The benefit to the stock producers would be in the fact that they would be assured of obtaining the market price for their stock in relation to the other stock markets of the country. I need not point out that the portion of the province which these yards would serve is now producing in ever increasing volume live stock of all kinds."

HIGH YIELDS IN STURGEON. The Sturgeon Valley has had the reputation of yielding heavy crops of heavy grain and this year is no exception. Exhibits were wanted a week ago and an acre on the farm of Will Craig, on the north bank of the Sturgeon, was measured and the grain threshed yielded over 120 bushels. But Mr. Craig deducted a fair estimate to allow for what might have been cut from outside the measured acre and the bundles dumped or stacked inside the measured plot net estimate was 107 bushels of oats. Mr. Craig is busy threshing and expects this field, which was a patch of breaking down on the west side of the Sturgeon, to yield probably as well as did the measured acre. This is not the first time that Mr. Craig has had a bumper crop, for he is an old-timer here and one of the best farmers in the district.

A field of breaking on the old Craig homestead, on the north side of the Sturgeon, was also an excellent crop. An effort was made to thresh a measured acre of this field as well, but it was impossible to get a thrasher to do it at that time. However, it has now been threshed and the yield has kept growing till some wonderful yields, have been reported to the Bulletin. Moreover, after careful investigation it is safe to say that it is one of the best returns ever threshed in the Sturgeon district and it is quite possible if an acre had been threshed it would have yielded as much, or perhaps more than that that on the farm of Will Craig, on the north side. In fact, yields of from 50 bushels to 100 bushels of oats to the acre are quite common in the Sturgeon River settlements. But this year is uncommonly good and the harvest, it is believed, will be a bumper one.

THREE DISTRICT COURTS. His Honor Judge Lee presided at sittings of the District court at Morinville on Friday, and at St. Albert on Saturday of last week. At Morinville the case of William Morasse vs. Alberta Coal Mining Company, came up for hearing. In this case the plaintiff, Wm. Morasse, of Morinville, sued the Alberta Coal Mining Company, of Edmonton, which operates in the Morinville coal fields, for damages to the amount of \$150, for the loss of a horse which fell into a pit on the defendant's property and was killed. The pit, it was claimed by the plaintiff, had been left unguarded and insufficiently fenced, contrary to the provisions of the Coal Mines act, cap. 25, statutes of Alberta, 1908 and amendments. After hearing the evidence for the plaintiff, the trial was ad-

Journal told the next sittings of the court, with leave to the plaintiff, to amend his claim in certain respects. The case of L. Montpelt vs. E. J. Prasad, was dismissed with costs. Judgment was given for the plaintiff in the case of A. Bennett vs. H. Simpson. In the case of Bennett vs. Orlino School district, judgment was given for the plaintiff for \$5 and costs. In a second action, Pelham Nursery vs. Bellevue, judgment was given for the plaintiff for \$7.50 and costs.

Sitting at Tisdale. His Honor Judge Taylor presided at a sitting of the District court at Tisdale on Wednesday of last week and disposed of four criminal cases. In the case of Rex vs. Barrett, the charge was withdrawn by the crown as no evidence could be adduced. The accused was also acquitted. In the case of Rex vs. Barrett, the charge was withdrawn by the crown as no evidence could be adduced. The accused was also acquitted.

REPORT OF DAIRY INSPECTOR. The reports of D. White and the Dairy Inspector follow: Messrs. The Commissioners, City of Edmonton. Gentlemen—I beg to report in accordance with the work of the health department for the month ending September 30th, 1910. During the month only two cases were admitted, the least number since one month during the year: Typhoid fever 1 Tuberculosis 1 Fourteen cases have been discharged. Diphtheria 3 Scarlet fever 10 Measles 1 and two deaths have occurred, both from tuberculosis. Four cases are still under treatment. Tuberculosis 1 Typhoid fever 1 There have been no cases reported during the month, there being at present only five houses under quarantine, four for scarlet fever and one for diphtheria. Of these 11 cases, typhoid fever furnishes the larger number (4) of which only six can possibly be classed as having contracted the disease within the city, the remaining 3 being principally from the railway construction camps.

SMUGGLING IN CHINESE. Eighteen found on Saturday on the Empress of India on arrival at Vancouver.

Vancouver, Oct. 9.—Eighteen Chinese were captured by secret service officers aboard the "Empress of India," which arrived from the Orient Saturday night. The Chinamen attempted to evade payment of the head tax by declaring themselves as merchants, each being provided with letters to a Vancouver importer formerly engaged as customs official, and this was the second haul made by the Ottawa secret service men since they began investigation into the smuggling of Chinese laborers to Canada.

FAMOUS SPY KILLED. Said to have Planned Assassinations in Order, That He Might. Berlin, Oct. 6.—Eugene Axel, the Russian spy, who is alleged to have planned assassinations in order that he might escape the Russian revolution, was assassinated at Wiesbaden, according to reports received here today. The information has not yet been confirmed. Axel was a member of the Socialists and anarchists of Russia and was a member of the committee that planned many of the assassinations. Though he exposed these to the Russian police, he was so careful that he was not suspected by the other members of the terrorist party. Since his exposure Axel has gone from place to place seeking safety. The Socialists put a price on his head and have sworn vengeance.

MOTORISTS GUILTY. Two Convicted on Charge of Hauling Over a Girl on the Road. Victoria, B.C. Montreal, Oct. 9.—J. A. Dionne and J. L. Koffer were found guilty of hauling a girl over a road on the King's bench here on Saturday, after seven minutes deliberation of the jury. Miss Smith was run down and killed by an automobile driven by Dionne and Koffer on the Victoria bridge across the St. Lawrence on the night of Sunday, April 24th. Sentence will be passed later.

VICTIMS OF EXPLOSION BURIED. 2,500 People Attended Burial of Men Killed in Times Building. Los Angeles, California, Oct. 9.—Seventeen of the twenty or more men who lost their lives in the explosion that wrecked the Times building eight days ago, were buried side by side in Hollywood Cemetery today. One funeral service was held at the Temple Auditorium, which was packed by 2,500 men and women, while a greater crowd wanted to enter stood outside.

Old Country Live Stock. Liverpool, Oct. 7.—John Rogers & Co. report that trade in the Birkenhead market has held very firm at prices last quoted. The supply is moderately light, and under existing conditions prices look like being well maintained. Cattle, including calves, states steers, from 12 1/2 to 13 cents, Canadian from 12 1/2 to 13 1/2 cents and ranchers from 12 1/2 to 13 1/2 cents per pound.

TYPHOID COMES FROM OUTSIDE OF THE CITY

Forty-four cases of typhoid fever were reported to the Medical Health Officer during the month of September, and of these cases only six were contracted within the city, the remaining 38 being, principally, from the railway construction camps. This is the striking statement made by Dr. White in his regular monthly report. Apart from the large number of cases brought in from outside points, the month was otherwise very quiet, there being only one case of typhoid fever in the city since the year since 1906. Only two cases were admitted to the Isolation Hospital during the month, the least number in any one month during the present year.

REPORT OF DAIRY INSPECTOR. The reports of D. White and the Dairy Inspector follow: Messrs. The Commissioners, City of Edmonton. Gentlemen—I beg to report in accordance with the work of the health department for the month ending September 30th, 1910. CONTRACT BREAKERS ARE SENT TO PRISON

Labors Brought From Winnipeg to Edson by H. W. Stewart, who was arrested and sent to prison for breaking contracts. (Wednesday's Daily.) That the bad conditions existing in the construction camps of Foley, Welch and Stewart in the vicinity of Edson have not been remedied as yet to the satisfaction of the laboring men was demonstrated on Monday when fourteen men came before Inspector Sweetapple, R.N.W.M.P. at Fort Saskatchewan, and were charged with breaking contracts and were fined \$10 and costs or four weeks imprisonment.

Two Very Special Numbers in White Vesting Waists

Illustration 1204

We would like to impress upon you the fact that it is necessary to seek outside your own province, in order to get the "most for your money." This is not mere advertising twaddle, it is a positive fact and we can prove it—not only by the two instances quoted below, which, we think will convince you, but in many other cases.

Add to this the fact that we prepay express charges to your nearest express or post office and we are positive that you will wear out with us in our contention.

No. 1204 as Illustration. This is a tailored waist of fine quality vesting boy pleat in front and 3-1/2 inch tucks on either side has detachable unlined collar and cuffs. Sizes 32 to 42. OUR PRICE, 95 CENTS.

No. 1208 as Illustration. Another tailored style of very fine vesting clusters of pin-tucking on either side of center box pleat, also on back, embroidered lined collar and cuffs, front fastening. Sizes 32 to 42. OUR PRICE, \$1.25.

IMPORTANT—We prepay express charges to your nearest express or post office.

C.N.R. BUYING RIGHT OF WAY IN STRATHCONA

It is Expected That the New Station Will Be Erected in the Vicinity of the Present C.P.R. Terminal Depot. The past two or three weeks have seen a great deal of movement in property in the southwest of Strathcona, the interest in buying arising from the reports current with reference to the C.N.R. entrance into the city.

For the past several days negotiations have been pushed by Canadian Northern right-of-way agents, says the Strathcona Plaindealer, with property holders along the proposed route of entrance from the southern limits of the city and, from the meagre information obtainable, citizens may expect to see located within the next few months a Canadian Northern station near the present terminal building of the C.P.R. Good authority has stated that the company officials some time ago announced their intention of starting work this fall on their Strathcona yards and buildings but the lateness of the season will probably interfere a delay until next spring.

Very little information can be obtained by publication from the purchasing agents of the company, but it is definitely known that numerous lots have been bought along the east side of the C.P.R. main line from several blocks south to a point in the vicinity of the C.P.R. station, where it is expected that Canadian Northern terminal will be located. The exact route of the line is not yet known, but it is little doubt about the location of the station. Details of the transactions which are being carried out are being kept very close.

Use Own Tracks at Present. It has been generally expected in the city that the Canadian Northern would locate their line in the west end in order that they might reach the high level bridge for the crossing into Edson, but this is emphatically contradicted by the information obtained from the company. The line for the next couple of years is evidently to use their present line over the east and inter-urban bridge. Upon the completion of the C.P.R. high level bridge two years hence, the Canadian Northern will arrange to secure running rights over it into the Capital City. The fact that the C.P.R. is not to use their line is a great disappointment to the many who are following the line.

Building Activity Next Year. Next year promises to witness Canadian Northern building activity on a large scale in Strathcona. Assurance has been given that the northern end of the Strathcona-Calgary southeast line will be brought into the city in the early summer from Camrose, and this will necessitate considerable work being done in the construction of yards and freight facilities. In addition to this building plan, Mr. McKenzie while here a short time ago, promised that the next summer work will be pushed on the important air-line southwest from this city to Calgary, and another year would see this line in operation.

C.P.R. ENTERS STRATHCONA. Securities Charter Granted to a Number of Prominent People in That District. Toronto, Oct. 11.—The Canadian Pacific Railway Company has taken over the charter of the St. Mary's and West Ontario Railway Company and has at last secured an entrance into the City of Stratford and the rich farming country surrounding it. This charter was granted to a number of prominent people in that part of West Ontario which lies between Stratford and Grand Bend, on Lake Huron, for the construction of a railway between those points and also from a point on that line to Lindsay, on the Canadian Pacific Railway.

Chas. Attempted to Defraud Govt. Victoria, B.C., Oct. 10.—When the R. M. S. Empress of India sailed on Oct. 8th for Hong Kong she will carry forty Chinese deported as a result of the investigation which resulted in their detection in a scheme to defraud the government of the Manitoba Commission, of which they were spurious "merchants."

TEN DAYS AT DOOR OF THE LANDS OFFICE

Ontario Landsecker is Determined to Snaab All Records by Protracted Fight—Wishes to File on Homeestead in the Edmonton District. Has Been Three Days at Post Now. (Monday's Daily.) Desirous of securing a homestead that will not be available for settlement until Monday, October 10th a sturdy Ontario farmer, recently arrived in the west, took up his position at the door of the Dominion Land Office on Jasper Avenue on Friday night, and having already spent two chilly nights on the stones in the shadow of the entrance faces undaunted the prospect of a whole week's vigil.

When seen by the Bulletin last evening, huddled up in the blankets with which he had wisely provided himself to protect his body from the chill of the autumnal nights, the courageous warrior, though not over confident, was hopeful that he would be able to remain at his post throughout the week.

Will Do His Best. "Since I came West I have spent much time and money in the effort to find a location which would suit me, and now that I have found it I intend to do my best to secure it. I don't know whether I will be able to last out, but I am going to try."

Fearful that he might arouse the spirit of covetousness in some greedy landseeker, who might endeavor to force or sue to oust him from his position of vantage next the door of the office, he refused to disclose either his name or the exact location of the land upon which he desires to file, which is understood to be situated at some point northeast of Edmonton. That his fears were not unwarranted was made clear yesterday afternoon when two men unknown to him made the attempt to force their way into a position between him and the door of the office. With the assistance of another man, he succeeded in parrying the entrance route of the C.N.R. gives the impression that this will eventually result.

Will Establish Record. If this man succeeds in holding his position until Monday next he will, in addition to attaining his desire, establish a record without parallel in the land offices of the west. The record at present time is held by the Challenge Brothers who recently passed nine days in the doorway. Begun by a forged telegram which called them home to their father who was said to be dying, they left their position at the door of the sixth day but through the kindly agency of K. W. McKenzie were called back and reinstated.

The landseeker to hold his position must remain night and day at the door. If he leaves his post for a moment any person who desires to do so may seize it. The man first at the door when the land falls open to the homesteader is the man who has the first opportunity to file. The officials at the land office while anxious to do all in their power to ensure that justice is done and that no unfair advantage is taken, can do nothing for the man who loses to another the position which he has voluntarily forsaken.

ABANDONS BIG FLIGHT. Trouble With Engine of His Aeroplane Discourages Aviator Eugene Ell. Chicago, October 1
