Important Suggestions Made by the Grand Jury.

Drunkenness the Great Source of Criminality.

Necessity for Increased Hespital Accemmedation-The Asylum Well Conducted-\$1,500 fer a Thumb

Thursday Afternoon. The grand jury made their presentment this afternoon. The jury were pleased to at local conventions and the annual find that only one case awaited their action, gatherings of sister associations, and find that only one case awaited their action, and that not a prisoner was confined in jail awaiting trial. It spoke well for the morals of so large and populous a county as Middlesex and for London, the capital of Western Ontario. "We are of the opinion," read the presentment, "that it would not be in the interests of justice to abolish the grand jury system. Still we think that an amendment has been made in the right direction in reducing the number of jurors from 24 to thirteen, with seven as sufficient to find a bill." The economy idea had been strongly urged in proposing the abolition of the system, but there were other ways in which the expenses of administering justice could be curtailed. One of them would be

PRELIMINARY TRIALS ef prisoners charged with murder. The coroner's inquest and the magistrate's hearing (after a prisoner was arrested) were necessary. It was suggested that a magistrate sit with the coroner and if satisfied with the evidence the prisoner could be sent for trial without further delay. The Welter-Hendershott case in St. Thomas was cited as an instance where great unnecessary expense was incurred.

The grand jury also suggested that several other classes of cases could very properly be brought before them. One of them was libel and defamation of character. It was probable that in many of these suits the plaintiffs were actuated by spite or petty ill-will, and were urged to prosecute by a class of lawyers who were merely arxious to get heavy costs.

The jury expressed itself strongly in favor of paying jurors at coroners' inquests. A visit had been made to the jail, and every department was in good condition. Thirty-six persons were in confinement-

33 men and 3 women. DUE TO DRINK. "We are sorry to report," said the jury, "that notwithstanding the great efforts that have been and are still being made to suppress the drink traffic, a large percentage of those in jail were there through drunkenness. Twelve men and one woman were there directly, and a number of

others indirectly, from this cause." THE HOSPITAL. The General Hospital was found in its usual state. The building may have been arge enough at the time of its construction, but it was now inadequate. It was badly ventilated and inferior in many other ways. The jury thought it would be better to erect an entirely new building than en-

large the present one. THE ASYLUM. The asylum was conducted in admirable style. There were about 1,060 inmates, a small proportion of whom paid. The women exceeded the men by about 60. In the refractory ward there were 93 women and 90 men. The expense of maintenance was greatly lightened by the work of some 300 patients, who assisted on the farm. All that was now necessary to make the asylum one of the first of its kind on the continent was an infirmary for the proper isolation and treatment of patients in need

of special treatment. OTHER INSTITUTIONS. St. Joseph's Hospital and the Mount Hope Orphanage were also inspected, and the inmates were found in comfortable con-

The presentment concluded by stating that London could well feel proud of her many public institutions. Crown Attorney Magee was also thanked for his able assistance to the jury during the week. Justice Meredith replied briefly, and the

jury were discharged. WANTS \$1,500 FOR HIS THUMB. George Vaughan, a young man, lost the thumb of his left hand at McClary's on March 19 last and is asking \$1,500 damages. Vaughan was working at one of the stamping machines. He was feeding circular pieces of tin into the press and while drawing one of them away the plunger dropped and Vaughan's thumb was taken off close to the hand. The plaintiff claims that the accident was caused by a deficient spring in the machine, which allowed the plunger to fall without working

the foot-tread. The defense allege carelessness on the part of Vaughan, and brought evidence to show that the machine was in the best of condition at the time of the accident.

OTHER CASES Billingham vs. Neff was an action be tween two Bosanquet township farmers. Billingham asked damages from Neff for trespass on his land by removing timber.

He got \$190.

Gillard vs. Kastner has been settled, Friday Morning. The damages case of Vaughan against McClary, in which the plaintiff asks \$1,500 damages for the loss of his left thumb, was continued this morning. Further evidence as to the condition of the press was offered by both sides. Mr. John McClary gave some very important evidence for the defense. He stated that young Vaughan admitted to him that he (Vaughan) had held his foot on the tread too long and allowed the dye to drop twice in quick

succession. E. Meredith, Q.C., is acting for the plaintiff, and Messrs. Hellmuth and G. C. Gunn for the defense. The case is with the jury.

SECRETARY WHEATON'S REPORT

At the Annual Meeting of the W. O. Dairymen's Convention-Interesting Information-Mr. Wheaton Complimented.

At the annual convention of the Western Ontario Dairymen's Association at Stratford Jan. 16 the secretary. treasurer, Mr. J. W. Wheaton, of London, read his annual report. The report stated that during the year the work of the association had progressed very favorably, and the various branches of the work have been kept before the public and made as effective as possible. The number of meetings attended had not been as large as during the year previous. Better results, however, were obtained where special meetings were held to discuss dairy matters only. Addresses were given at twenty special dairy and annual meetings, with an aggregate attendance of 1,800. Nine addresses were given at Farmers' Institutes, thirteen a number of others given before the members of various cheese markets and on other occasions. This made a total of over 50 addresses on the more practical features of dairying delivered in various parts of Western Ontario. Five successful local conventions were held at Dunnville, Shelbourne, Wing-ham, Watford and Harrow. This line

of work was meeting WITH INCREASED SUCCESS and it was, therefore, desirable that it should be kept up during the present term. The office work of the association had largely increased, over 700 letters having been received and 800 written during the year. At the be ginning of the season 1,000 four-page circulars setting forth the work to be carried on during the cheese season, and in July 500 circulars asking a number of questions on some of the more important phases of the factory system, were sent out to the cheese makers. These had been issued with a view of giving some definite information, more particularly as to the working of

THE BUTTER-FAT SYSTEM of paying for milk, the winter dairying movement and some of the more salient features of dairying. Replies were re-ceived from 136 factories, about threeeighths of the total number in the west, and these returns showed that there was an average of 72.7 patrons and 466.2 cows for each factory. This would be 5.8 cows per patron, and if 32.5 be taken as the total number of factories there would be a total of 23,627 patrons supplying the milk of 151,555 cows to the cheese factories in Western Ontario. The largest amount of money received by any patron per cow from the cheese factory for 1893 was \$65, and the lowest \$9 96. The average of the highest returns was \$34 17 per cow, and the average of the lowest \$17 54, and these figures, the report stated, gave an average of \$25 85 per cow, which may somewhat higher than it would be if all returns were in from all the factories. If 151,555 was taken as being the number of cows, the estimated amount

of money PAID TO THE CHEESE FACTORY

PATRONS in this territory looked after by this association would be \$3,917,696. The cost of manufacturing, including drawing, varied from one and one-quarter to two and one-half cents per pound of cheese. The highest test of butter fat for June, 1894, was 4-9 per cent., and the lowest 1-8, and the average test of the vats 3-4 per cent. The butter fat system of paying for milk was giving good general satisfaction. The prices obtained for butter made at the creamlast winter varied from 23 1-8 to 24 cents per pound, and the cost of manufacturing varied from three and one-half to four cents per pound. There were 13 cheese factories in Western Ontario making butter during the winter, and two being run as skimming stations. The membership of the association for 1894 was 594, a decrease from

the previous year of 17.

The report was adopted and the president paid a high compliment to Mr. Wheaton.

A QUEEN MISSING.

Serious Trouble in the Flying Roll Fraternity.

A Detroit dispatch says: There is trouble in the Flying Roll colony. A warrant is out for the arrest of Eliza Court on a charge of illegally performing the marriage ceremony, and this morning the Queen of Israel could not be found. Wilberforce Dawson, one of the anointed, declared she had skipped out, presumably to avoid arrest. The complaint charges Eliza Court, alias Queen Michael of Israel, with wilfully and maliciously joining in marriage Andrew Richardson and Elizabeth Richardson on Nov. 6. The complaint further states that Eliza Court had no authority to perform such a ceremony. The Detroit authorities are in hopes of breaking up the Hamlin avenue colony, which has become notorious. The police have been collecting evidence in regard to Mrs. Court assuming the functions of a priest and marrying the Rollers. Wilberforce Dawson went before Judge Whelan and Sergt. Shoe-maker and testified to a number of highly sensational things. Dawson himself is trying to secure a warrant for the arrest of Mrs. Court on a charge of using profane and indecent language. Dawson's statement concerning the pairing of the members of the colony reveals a shocking condition of depravity.

TYPHOID FEVER.

The After-Effects of the Disease-Often More Serious and Fatal Than

Typhoid Itself. HUMBERSTONE, Ont., Jan. 13 .- Typhoid fever is a disease to be dreaded because of its dangerous nature as well as for the fact that some disagreeable results usually supervene when the patient has escaped from the cu ches of the disease. Harvey H. Neff, of this place, was convalescing after an attack of typhoid when he was prostrated by a severe form of kidney disease. He was bedridden for weeks, and no medicine that he took was of any avail. But like a light in the darkness, came the news of what Dodd's Kidney Pills had done for other victims of kidney disease. Five boxes of the pills put Mr. Neff on his

feet again, thoroughly cured. Churchill Weaker. London, Jan. 18. - Lord Randolph

Churchill is much worse this morning and is in a comatose condition. The New President Eulogized.

PARIS, Jan. 18 .- The Journal des Debats expresses great satisfaction at the defeat of Brisson and approves of the selection of Faure, who the paper says is a man of clear and sound intellect. The destinies of France, it believes are in good hands. The Figure says the election of Faure,

be well received by all who desire peace and concord. The Dix Neuvieme Siecl says Faure will choose a Ministry from the Republican majority, which is more compact and more resolute than ever.

who is a moderate and upright man, will

Look Out For It. If you are troubled with a cold or cough, however light the attack, look out for it;

\$18 AND UP. 179 DUNDAS STREET

A SELF-MADE MAN-

France's New President Began Life as a Cabinet-Maker.

He Is a Free Trader and a Rich Ship Owner-France Astounded.

NEW YORK, Jan. 18 -The Herald's Paris correspondent says: The election of Felix Faure as President has astonished all Paris and the whole of France. The French democracy is fond of mediocres. The Chamber was unwilling to elect Waldeck-Roussean as the Moderate candidate because he is too intelligent a politicis. It was afraid of Brisson, who is a Radical, and it therefore chose Foure, who is a very honorable man but possesses no political prestige. A similar combination of circumstances led to Carnot's success some seven years ago. The new President may win the sympathies of the public, as did his unfortunate predecessor, but he

will not find it . to do so. Faure is a Materate Republican and a Free Trader which is only natural seeing that he represents Havre in the Chamber. He is a tall, handsome man of 55, with white hair and a black moustache. He is a rich shipowner, has traveled a great deal, to the United States among other places. He speaks English well and has a family.

M. Faure is a self-made man. His father was a working cabinet-maker and he himself began life by following a manual occupation. He is of a cheerful temperament. From a political point of view the new President is even a more moderate man than even Carnot. He will regist Radicalism and the same attacks will continue to be made on the new President as were made on the one who has just resigned.

Faure's election has aroused the anger of the Socialist deputies, who declare that within six months he will be obliged to resign. It is certain that Faure will have to struggle against serious difficulties.

RIOTING STRIKERS

Stone Street Cars in Brooklyn-Police Charge the Crowd.

BROOKLYN, N. Y., Jan. 18 .- The disorderly crowds that made trouble yesterday at the Halsey street stables of the Brooklyn Heights Railroad Company were on hand again at 6 o'clock this morning, and at 7:30 o'clock made their first assault on a street car. The car left the station guarded by a mounted squad of fifteen men and was followed by a platoon of policemen. When it had gone two blocks from the atation the strikers began to hoot at the nonunion motorman and conductor and called on one another to kill them. At the same time they began to throw stones at the car, breaking all the windows and knocking out the ventilators on the top of the car. The mounted men and the patrolmen wheeled and charged the crowd together, driving before them. The latter still continued throwing stones at the car, and the new motorman turned the car back into the barn again. At 9 o'clock the police drove the strikers from in front of the barn, and will prevent strikers from congregating there.

INJURIOUS INSECTS.

Prof. Fletcher Discusses Them and Gives Simple Remedies for the

Pests. Prof. Fletcher, of the Ottawa Experimental Farm, gave an address at the Dairymen's Convention in Stratford, on injurious insects, in which he said that there existed remedies for all insects, but before getting the remedy it was necessary to study and understand the nature of the insect to be treated. The man who would use these remedies persistently and intelligently would find himself well paid. The horn fly was not so bad last year as previous years, and this year its injuries would be less

severe. In a year or two more its at-tacks would be very slight. The REMEDY FOR THE PEA BUG. was two parts of coal oil to one part of soap suds or sour milk, reduced by ten times the quantity of cold water and applied by a force pump, a sponge or a swab. It was a cheap and effective remedy, and would clean the cattle of lice as well. The mixture prevented the eggs of the warble fly being laid, and consequently the nuggets from being hatched. A little sulphur and lard put on the warbles would kill by suffocation the maggots inside. The pea weevil was increasing its ravages year by year. The remedy was so simple that there was no excuse for the loss. The pea seeds could be held over for three years without the slightest loss in germinating qualities. By holding over

for two years one has an effective REMEDY FOR THE PEA BUG. Place the peas in tight paper or cotton bags, and the insects would come out during the first year and die of starvation, because they did not feed on the dry seed. Another insect hatched from an egg on the green pods was proving very injurious. The eggs were laid immediately after the seed pods were formed, and the small caterpillar ate its way into the pod. When full grown it fell to the ground, where it lay during the winter. The remedy which obviously suggested itself was to grow peas as far as possible on the second year from where they were grown the first

THE CLOVER SEED MIDGE was increasing and doing more injury to the red clover every year. When the clover was coming into bloom an egg was laid on the flower. From this egg was hatched a maggot, which eats its way into the flower and destroys the seed. The remedy was to cut or feed the clover while the maggot was still in the head. The greatest injuries by insects during the year had been to fruits. The injuries had been caused largely by old pests, for whose destruc-tion remedies had long ago been found. One thing which prevented farming from paying in many cases was that farmers neglected their insect enemies. If the fruit grower wanted to make his business pay he must spray his orchards for insects and fungus growths. We could save about 75 per cent. of our apples and 50 per cent. of our plums by spraying.

The devil can behave as well as an angel when he finds it to his advantage. Why will you allow a cough to lacerate your throat or lungs and run the risk of filling a consumptive's grave, when by the timely use of Bickle's Anti-Consumptive Syrup the pain can be allayed and the danger avoided? This syrup is pleasant to the taste, and This syrup is pleasant to the taste, and unsurpassed for relieving, healing and curing all affections of the throat and lungs, coughs, colds, bronchitis, etc.
