Wheat-Very little came in today; prices were steady and unchanged.
Oats—Receipts were fairly good; new developed unexpected strength, selling all the way from 94c to 97c; old were neglected and lower, the range being \$1.05

The quotations given for all other kinds The quotations given for all other kinds of grain are based on latest transactions, there being no deliveries today.

Hay offered freely and sold slow; the demand was light and prices were unchanged. Live hogs sold at \$6.80 to \$6.85; trade

Dressed hogs were in good demand, and brought \$3.75 to \$9. General quotations today were as fol-

FOR HOUSEKEEPERS. There was a good-sized attendance of farmers at the market here today. The bulk of the offering were confined to vegetables and fruits. Buyers seemed anxious to purchase, and trade was lively as a result.

Hay-Thirteen loads offered, selling at \$7 25 per ton to \$7 75. The ruling price is \$7 50 per ton.

Butter and Eggs-Both of these articles were scarce. Butter in crocks sold higher, at 18c to 19c pound; rolls sold at 20c to 21c per pound in basket lots. Eggs are higher in price, selling wholesale at 111/2c to 12c in crate and basket lots.

Fruits-Peaches were not so plentiful today. Dealers express their opinion that the bulk of the peaches have been marketed, and that future prices will not be as low as they have been in the past. Peaches in 12-quart baskets sold at 65c to 80c per basket; 8-quart baskets sold at 40c to 45c. Plums sol d at 40c to 50c per basket. Grapes at 25c per 10-pound basket. Pears sold at 60c to 80c per bushel, or 15c oc per peck. Apples were dull sale at

Poultry-Not a great deal in; selling at 45c to 65c per pair for dressed chickens and 40c to 45c per pair for live. Dressed Hogs-At lot in, selling at \$8.75

per cwt; a few choice sold at \$9 per cwt. Live Hogs-Mr. D. McIntyre purchased 157 for shipment from here yesterday, paying \$6 85 per cwt. Quotations WHOLESALE DEALERS' PRICES.

#### OFF THE COAST!

The Ophir, With the Royal Party on Board, Supposed To Be Near Canadian Soil

Halifax, N. S., Sept. 10 .- The Ophir, with the royal party on board, is supposed to be off the coast, as the warships Indefatigable and Tribune, and the destroyer Quail left last evening to escort her to Quebec, where she is

#### A THOUSAND THANKS.

Quebec Man Cannot Be Too Grateful for Dodd's Kidney Pills.

St. Elyear, Que., Sept. 9, (Special) .-A feature about the work of Dodd's Kidney Pills is the great gratitude they arouse in those whom they restore to health. Health and sickness are as different from each other as happiness and unhappiness, misery and joy. Is it any wonder that those who are transported from sickness to happiness and joy by Dodd's Kidney Pills are grateful to that wonderful medicine? And as Dodd's Kidney Pills have cured people all collections. people all over the world, one may judge of the multitude which bless the name of Dodd's Kidney Pills.

Here is what a Quebec man says:
"I thank Dodd's Kidney Pills. They
cured me of Kidney disease which orced me to rise every hour at night. Today I am perfectly well. I sleep without rising. You can believe me I am glad to have regained my health. Thanks a thousand times to Dodd's Kidney Pills."

The spoils system is practiced only by the opposition party when in power. Poverty brings us strange bed-fellows, out riches bring us queer nightmares. PLEASANT AS SYRUP; nothing equals is as a worm medicine; the name is Mother Graves' Worm Exterminator. The greatest worm destroyer of the age. There are two kinds of men; the dogs owned by one won't follow then. Lors of men marry young because they are not old enough to know bet-

signals of danger.—Have you lost your appetite? Have you a coated tongue? Have you an unpleasant taste in the mouth? Does your head ache and have you dizziness? If so, your stomach is out of order, and you need medicine. But you do not like medicine. He that prefers sickness to medicine must suffer, but under the circumstances the wise man would procure a box of Parmelee's Vegetable Pills and speedily get himself in health, and strive to keep so.

Cardinal Mezzofanti spoke 114 lan-

Cardinal Mezzofanti spoke 114 lan-guages and dialects, 50 of them with such ease and fluency that he was sometimes mistaken for a native of the lands where they were used.

Mrs. Winslow's Southing Syrup. Has been used for over FIFTY YEARS by MILLIONS OF MOTHERS for their CHILDREN WHILE TEETHING. with PERFECT SUCCESS. IT SOOTHES the CHILD, SOFTENS the GUMS, ALLAYS all PAIN, CURES WIND COLIC, and is the best remedy for DIARRHEA. Sold by Druggists in every part of the world. Be sure and ask for "Mrs. Winslow's" Soothing Syrup.

## THE GREAT FAIR!

Attracts an Immense Crowd in Spite of Threatening Weather.

No Rest for Tired Ticket-Takers--- Magnificent Displays in the Various Departments--- Exhibits of Western Ontario Products That Are Well Worth Visiting -- Today's Meeting of Directors.

Despite lowering clouds, the day be- | the Sanford Manufacturing Company morning. The unprecedented attendance yesterday was highly encouraging to the directors and their high hopes for a record-breaking aggregate seem likely to be realized. The exhibition grounds are fairly swarming with people. The staff of ticket-sellers on the different gates were a worn-out lot of men last night, when the last ticket had been sold and the last quarter had been raked into the bulging moneybags, and today they are not likely to get any rest.

The most remarkable thing about today's crowd is the vast army of farmers who are taking advantage of this annual opportunity to compare notes, and to get new ideas in the progressive science of agriculture. They are out in thousands, and they have come from every corner of Western Ontario. And they will not be disappointed, for never before, since the Western Fair became an annual institution, have the agricultural, horticultural, dairy, poultry and stock exhibits been more extensive or more representative of the garden of Canada.

THE DAIRY BUILDING. The dairy building is in itself well worth a journey of many miles to anyone interested in that important branch of Canadian farming. When one pauses to consider the marvelous strides made by this country, and particularly by Western Ontario, in the manufacture of dairy products, the importance of this branch of the Western Fair will at once be realized. The exhibits in the dairy building are not only more extensive, but of a much superior quality than those of any former year; indeed, it is doubtful whether a more magnificent display of the kind was ever seen in the Dominion. Nearly every well-known cheese and butter manufacturer and apiarist in the west is represented, and some of the exhibits are of unusual magnitude. The display of honey is particularly good. Here also are to be seen every sort of contrivance for the manufacturer of dairy products; here are the machines that have revolutionized the making of butter and cheese, and here are the finished products of the factories that have placed the name of Ontario prominently before the whole world as a dairy country

THE GREAT CANADIAN HEN. The poultry pavilion is another department that is crowded today. Hand in hand with the progress made in other lines in Western Ontario during the past few years, has been the advance in poultry breeding. The great Canadian hen has become something more than a mere term, for in addition to the attention devoted to the breeding of fancy stock, there has been a general improvement in the development of egg-producing and market fowls. The exhibits in the poultry pavilion are excellent, and include the best stock not the successful breeders of the city, but of all Western Ontario. They include almost every known variety, from the more well-known breeds to the rarer and more expensive varieties.

SPLENDID STOCK DISPLAY. To adequately describe the stock sheds would require the entire issue of a newspaper. The huge cattle shed is literally filled to overflowing with the choicest fancy cattle in Ontario, which means the choicest of Canada, which, in turn, means the choicest of the world. Such a magnificent collection of well-bred stock was probably never before seen in the Dominion. Nearly every breeder in the west is present with entries, and every breed in the county is represented. The horses are in no way inferior; and to the growing hand of men who are endeavoring, with so much success, to improve the quality of Canadian horses, the exhibit is indeed encouraging.

THE PALACE OF ARTS. The Palace of Arts is, of course, the one point on the exhibition grounds toward which visitors first direct their steps. Today it is packed with a mass of interested people, and so great is the crowd that it is almost impossible to gain access to the building. The many beautiful booths on the main floor form a very attractive picture. Some of them are elaborate in the extreme, and a visit to the palace is in itself an object lesson of the industrial and commercial progress of the past year. The merchants and manufacturers of London are well represented, and here the visitor may see all manner of manufactured products, from a

spool of thread to a piane. The Midway, with its numerous interesting side-shows, is attracting thousands of people. To have seen the big fair without having seen the Midway is to have missed half the

The best of order has been maintained among the great crowds, and the force of regular police and special con-stables under Sergt. Crawford has had little to do but look pleasant. In the machinery and carriage pavil-ions there is an extensive display, and farmers who believe in keeping abreast of the times in the matter of machinery are thronging the buildings. At a meeting of the board this morn-

ing several unimportant matters were discussed. Secretary Nelles read two letters, one from Mrs. Rennie, referring to a mistake in judging in the goods department, and the other from John Kelly, of Shakespeare, with reference to the judging of his sheep. Both matters were laid over.

Director Reid referred to the propo-sition to allow the stockmen to enter the ring after the showing of cattle. The matter was carried after a great deal of discussion.

#### SOME GOOD EXHIBITS.

Oak Hali.

Oak Hall, as usual, is making a very attractive display in the Palace of Arts. A feature of the exhibit is The Dr. Zina Pitcher Company, To-the famous "Peerless Pocket," which ronto, Ont.

gan auspiciously at Queen's Park this is now putting into all its clothing. The "Peerless Pocket" is a very simple device by which, without causing the pocket to sag, the strain of a weight in it is thrown altogether on the inside of the garment. In addition it does away with any danger of the pocket tearing at the corners. The ingenious little device, which is patented, promises to become one of those big little" inventions which will be very popular. Oak Hall's display of fashionable men's clothing is of particular interest to men who wish to dress well. Down-town fair visitors are again reminded of this progressive clothing establishment by the tastily decorated windows of the Dundas street warehouse. The work has been done with rare skill and is attracting much attention. In one of the win-dows is a mechanical device which shows how money can be made by purchasing Oak Hall clothing.

#### Cowboys in Their Element.

The performance given in front of the grand stand by the rough riders of the Wild West Show is only a small sample of what may be seen in their mammoth tent on the Midway. The troupe embraces 15 men and 40 horses, and their performance is a complete epitome of life on the boundless plains of the west. The riders are all Canadians from the ranches or Alberta, and are a fair sample of the class from which were chosen Canada's brave rough riders in South Africa. Among them are such expert riders as Horsehair George, Broncho Pete and Lee Marshall. The bowboys guarantee their ability to ride any horse ever foaled, and it will delight them for any owner of a fractious beast to bring it to their tent. The livelier and worse-tempered it is, the better they will like it. A feature of the exhibition is the hanging of a horse thief. The entertainment is free from objectionable features, and the most refined can witness it.

#### The Bell on Top.

With the largest factory of the kind under the British flag, and with over \$1,000,000 invested, it is no wonder that Organ and Piano Company occupies the deservedly high place it has achieved by merit in the ranks of the foremost manufacturers in the world. It is characteristic of the Bell Organ and Piano Company to do nothing in a restricted way in pushing their great industry, and in presenting to the public their exhibit at this year's Western Fair the company went about the undertaking on the most liberal plan, with the result that one of the most superb and extensive piano displays ever attempted at a great fair has been evolved, and is at once the delight and pride of all loyal and progressive Canadians. When the visitor at the fair calls at the Bell quarters he is courtequely received, and the merits of the several instruments are set forth pleasingly and convincingly. One can spend an hour at the Bell quarters and want to go back and have another hour's enjoyment the next day. The Art Upright and the Art Grand, the wonderful "Appolo" and "Beliolian," self-players, not to mention the Compensating Pipe Organ ar each and all a very revelation in their distinctive lines. The superi-ority of the "Bell" lies in its exclusive features, which have only to be examined to captivate the intending plano buyers. Skilled players are at the service of the musical public who wish to hear all that the Bell Piano reveals. The exhibit is in charge of Mr. J. E. Keenleyside, the genial and courteous local representative of the company, and he is ably assisted by an efficient staff. Mr. Keenleyside will be pleased to have the public call. \*

#### Blue Ribbon Tea.

The exhibit, occupying the most prominent position in the main builddoes, in the estimation of ing as it discriminating housekeepers, is that of Blue Ribbon Tea, as its stand faces the visitor immediately on entering the western door. The dainty decorations of blue and white bunting, to correspond with the label of the company, together with palms, ferns, and tropical plants, present an appearance which could not be excelled for beauty. The pagoda is kept brilliantly illumin-

#### CHILDREN'S KIDNEYS

Dr. Pitcher's Backache Kidney Tablets the Most Successful Treatment for the Kidney Weakness of Children.

Mothers know what distress and anxiety they have when the little ones cannot retain their water properly, or have any trouble with their kidneys. For any weakness of the kidneys, bladder or urinary organs of children, Dr. Pitcher's Backache Kidney Tablets, which are the prescription of the eminent specialist, Dr. Zina Pitcher, are the most effectual remedy known to science.

Mrs. W. M. Clover, Pearl street, Brockville, Ont., says: "One of my children that had been suffering from sluggish kidneys read about Dr. Pitcher's Backache Kidney Tablets, and procured a bottle. They removed the whole difficulty promptly. That de-pressing pain over the kidneys step-ped, dizziness and headaches ceased, and there was a general invigorating of the system. There is no question regarding the merits of those Tablets for the back and kidneys We have great confidence in them and recommend them highly."

Dr. Pitcher's Backache Kidney Tablets are 50 cents a box at all druggists.

shows great enterprise in thus practically demonstrating the good qualities of Blue Ribbon Tea, now used in thousands of homes throughout the country. Visitors will be amply repaid for their translations. for their trouble if they will call at the booth and get a cup of tea. Blue Ribbon Tea is so well and favorably known that commendation would almost be out of place at this particular time if it was not feet that this time, if it was not for the fact that this is a subject to which too much attention can hardly be given. Being one of the main articles of diet, the purity or impurity of tea becomes a serious matter, and when an opportunity arises like this, when people can investigate and satisfy themselves it is a privilege which should be taken advantage of by every visitor to the fair.

#### Jumba, the Man-Eater.

No attraction on the fair grounds is creating more genuine interest than Jumbo, the man-eating crocodile from the west coast of Africa. Jumbo is 14 feet long and weighs 482 pounds, and is altogether the most ferocious-looking creature one would imagine. The huge saurian, though he is very fierce lies so quietly for the greater part of the time that one would imagine he was asleep. If the arm of a spectator should get too close to his huge jaws, however, the wicked little green eyes will open suggestively. With less good specimens of the Florida alligator which a little negro boy handles. This show is not of the "Fake" variety, and is really well worth seeing, for it enables one to witness alive a monster, which is almost unknown outside the stories of African travel. Jumbo's cage is directly south and opposite the Western Fair offices.

#### Chosen by the Cultured.

It is a significant fact that of all the great musical artists who have visited Canada in recent years, they have almost without exception chosen the Heintzman piano for the proper expression of their genius. Such great pianists as Friedheim, Burmeister, Hyllested and Nutini and Jeannette Durno, have considered it the only instrument adequate for their use. Such vocalists as Antoinette Trebelli, Sofia Scalchi, Pel Plancon, Plunkett Greene, Watkin-Mills, David Bispham, Ben Davies and Harold Jarvis have selected it for their accompaniments. This verdict of the master minds of music has only been an indorsation of the conviction so long entertained in Canada, that the Heineman Piano is par excellence, the instrument which appeals to the cultured ear and the artistic touch. This is apparent from the number of Heintzman pianes which will be found in the homes of musicians and in musical institutions throughout the Dominion. The Heintzman is the only instrument used in the London Conservatory of Music. A magnificent new Baby Grand Heintzman has just been purchased by Prof. J. W. Fetherston, the well-known musician, for his home on Queen's avenue. The Heintzman exhibit at the fair is under the direction of Mr. J. A. Croden, the company's local agent.

A Delicious Beverage. The verdict yesterday of thousands who sampled the perfection cocoa of the Cowan Company, of Toronto, was that it excelled all the imported cocoas ever brought into the Canadian market. It costs less to the consumer and is absolutely pure. Purchasers should ask their grocer for Perfection Cocoa, and insist on getting it. The Cowan Company will serve the dainty cups of cocoa every day this week at their booth in the main building, and extend a cordial invitation to all to call and sample their delicious beverage. A staff of at-tractive and deft-handed young ladies is on hand to meet the demand, and the few moments required to drink a cup of cocoa is well spent. The company's western traveler, Mr. J. E. Whaley, is in charge of the exhibit, and will be pleased to welcome all his old custom-The New Ontario Exhibit.

Fair visitors are manifesting much interest in the New Ontario exhibit, which was brought here by Mr. R. A. Burgess, of Port Arthur, the Dominion crown lands agent. Mr. Burgess has and now a commodious two-story returned home, and the exhibit, which hewed log house, and about twelve is located in the agricultural building, is now in charge of Mr. J. A. Robertson, of Toronto. Just outside the entrance to the dairy building is a affords a visible means of support, roomy tent in which Mr. Thomas Timber for buildings, fencing, fuel and Southworth, director of colonization market. There is cordwood and ties for the Ontario Government, has to be taken out. This can be done in established a bureau of information the process of clearing. More than which will be found of great conveni- this, there is some land easily cleared ence to anyone interested in New Ontario, and particularly to any veterans One man in Gillies township, who are to receive land grants from the Ontario Government for their ser- one year ago, and now has 50 acres in vices to the province. information of Mr. W. In this bureau of information one may learn those facts about it which are essential to an appreciation of its vast possibilities. Some of these questions which naturally suggest themselves are: What are the staple crops and

average yield? About how long is the season without frost? What fruit can be raised? Is the climate severe in winter? Is wood plentiful for fuel, and is there any coal? How about water? Is the country subject to drought and frequent failures of crops? Can desirable free grant land be had? It is just such questions as these that the bureau of information is designed to answer adequately. In regard to the staple crops and the average yield it may be said that New Ontario is particularly fortunate. No other in the world yields timothy and clover. The country second crop of clover is good, and frequently on Rainy River the second crop of timothy is good. Fall and spring wheat yield well; the same can said of rye. It is a fine country for oats. Three years ago a farmer on Slate River had twenty acres that yielded one hundred bushels per acre. For the truthfulness of this statement, the present mayor of Fort William pur-chased the oats. No country yields better potatoes. Prolific crops are grown, and this can be said of all root and garden crops with the excep-tion of tomatoes. While settlers have Every visitor receives a glass souripened tomatoes occasionally, they have not succeeded yet in growing them for the market. People seem surprised because they do not ripen corn and tomatoes in this latitude, but when one thinks that bananas and oranges do not ripen in the Eastern or Middle States, the fact is no longer a surprise. In Port Arthur potatoes grow large enough for the table in 60 days from fime of planting. But go one thou-

ated at all times, and this adds to its good appearance. A staff of deft and obliging young ladies are kept busy dispensing tea. This explains why the place is always so crowded. The firm shows great antennies in thus prac-

sand miles north or northeast to Moose Factory, on Hudson Bay, where they have the glorious growing sunshine for almost 24 hours a day, and potatoes grow large enough for the table in six weeks. It is the hours of sunshine which enables such phenomenal crops

The climate, that is an important question. Many people believe that New Ontario is a land of frost and snow. To be sure there is plenty of cold, and the people are the better for it, but there is no more danger of damage to crops from frost than there is in Old Ontario. Think of the mercury never

states in the Union The fruits: All kinds of wild fruits -strawberries, blueberries, raspberries, saskatoons and plums-can be raised in great quantities. Wood is so plentiful that the settler does not require coal. There are no barren prairie lands in New Ontario. In New Ontario the land is covered with timber. This is valuable to the poor settler. He may have a family,

with just enough money to pay his transportation and get on his 160 acres of free grant. With his axe he can construct his own home out of logs. One gentleman in Burriss township, Rainy River, came from Texas with wife and four children. In Rat Portage he spent about all his money for provisions. He went on his lot erected a good house for 40 cents. He hewed log house, and about twelve acres under splendid cultivation has replaced the first one. here on the free grant lands at once Timber for buildings, fencing, fuel and "the burnt off land" as it is called. one year ago, and now has 50 acres in The bureau of cultivation, without a stump, and will with sufficient timber to last a life-

> The country is so well-watered that without a spring or creek somewhere erican. on it.

An absolute failure of crops from drought or other causes has never been reported from New Ontario. Cyclones and destructive storms are un known there.

There is enough free grant land in Rainy River district, north of the Rainy River alone, to give 5,000 men 160 acres each. This valley is 100 miles long, and the good fertile land extends back from the river 10 to 40 miles. There are 24 free grant townships surveyed there

All details as to the method to be pursued to obtain government free land may be had from Mr. Fee at the bureau information tent.

#### A Grand Exhibition.

An attraction of unusual merit at the fair is the exhibition given by the Famous Backman Troupe of Glass Blow ers, who are located near the King street entrance. Six first-class artists are constantly making handsome ornaments out of ordinary glass, which are given away to their visitors free of charge.

A steam engine made of glass, in full operation, glass dresses, neckties, etc., are some of the novelties they display. No one should miss the opportunity of paying them a visit during their

#### UNDER TWO FLAGS

How a Sailor's Life Was Saved by the British Consul at Valpariso, Chili.

The following stirring incident of the two flags happened at Valparaiso, Chili, and was related at Montreal in 1881 by the Rev. Dr. J. O. Peck. Dr. Peck said:

"The man who gave me the facts I am about to relate was Mr. Haskins, an American sailor, who had sailed to climbing up to the hundred-mark in summer, and your ideas of frost will a port in Chili. On going ashore, he be dispelled. The summer is long and said, to enjoy his day of liberty he steady, and the grass, despite the heat, never burns up as it does in some One of the police officers, instead of warning him not to make a noise in the street, drew his sword, and, strik ing him a blow, knocked him down. On that the American sailor got up, and knocked the policeman down in return. He was on that arrested and tried, and condemned to be shot in the morning of the following day. Mr. Loring, the American consul, expostulated with the authorities that it would be monstrous to shoot a man for such an offense, but they paid no attention to him, so e thereupon made a formal protest in the name of the United States government against the barbarous act. Mr. Haskins, the sailor, was in the morning brought out pinioned to be shot. \* \* \* As the English consul preparing to hoist the Union Jack he saw the crowd in the field opposite where the execution of the American sailer, of which he had heard, was to said: "I live on a 50c farm, in a 40c house." Two years have passed by, can consul he said: "Good God! Loring, you're not going to let them shoot that man! 'What can I do?' he said. 'I have protested against it. I can do no more.' Quick as thought the English consul shouted: 'Give me flag!' and in a trice the Stars and Stripes were handed to the English representative. At once taking his own Union Jack in his hand, he hastened across the field, elbowed his way through the crowd and soldiery, and, running up to the doomed man he folded the American flag around him, and then laid the Union Jack over it. Standing a few paces back, he faced the officer and soldiers, and shouted defiantly: 'Now, shoot, if you dare, through the heart of England and America!' And they dared not de it, for they feared the consequences, so
