

# KING OF SIAM ON TOUR OF EUROPE

Newspaperman Describes Incidents of Recent Trip of Eastern Potentate

(Correspondence of New York Times).  
Lucerne, July 19.—Six tons of baggage, in all more than two hundred pieces! A motley crew, comprising all sorts, sizes, shapes, colors—suit cases, zinc uniform trunks, helmet and gas boxes, the inevitable "hold all" a dozen of them, rolled linen and boot bags. Such is the shipment scattered over the landing stage—part of the impedimenta belonging to the King of Siam when he set foot in Europe to visit the Italian Riviera, Switzerland, England and Denmark.

And at precisely the moment it was required for "afternoon tea" in the

to be missed from the "ice basket." That added to the confusion. The destination of King Chulalongkorn is the Falls of the Rhine, where the Hotel Schweizerhof has been reserved for him.

The king makes close acquaintance with these majestic falls, so his Majesty falls in with the custom. Enveloped in a waterproof coat, he hazards a dash into the Rhine, where he is pelted with the foaming waters of the Rhine as they dash in chaotic madness over the rocks. The king is seen scattering clouds of blinding spray in all directions.

8.30 p.m. "Where is the manager?" The king is the first to speak. "I am the proprietor!" His Majesty will breakfast at 9. An omelet, toast, coffee, and a glass of milk at 8.30 a.m. "The garage where it is placed?" "Much obliged!" His Majesty De Vere, will motor at 10. Have the motor cars brought to the door. The conditions are given by Prince Rabi dars Rayburi, a trusted and expert amateur driver, his royal master, to the chief chauffeur, who is a Frenchman, named W. De Vere, who has the five automobiles and their drivers under his command.

As the King is a little tired this morning after the journey, the omelette, coffee and toast are taken in bed. A motor car is sent to the hotel. The king guides a motor car up to the hotel with no less precision, another follows him, and a third car, with a French waiter, as do cosmopolitan "snaphooters" who are armed to the teeth with cameras. Along the corridor outside the apartments stand six or seven dozen or more of the court, the king's brother, the A. D. C. and hereditary prince, and a whole host of attendants to this sort of thing. Today there are matters of state requiring attention. Telegrams to despatch to Bangkok and to the king's mother in Siam have arrived and has to be seen. And so time passes. At last there is a brisk movement in the hall, the door opens, and the king is seen in the doorway and upon the camera's sensitive film.

## Duties on British and Foreign Goods

In case all the water should evaporate from all the places, especially in the far north, the water freezes from the bottom upward.

Waves are deceptive things. To look at them, you would gather the impression that the whole water travels with Tals, however, is not so. The water itself goes on. In great storms waves are sometimes 40 feet high, and their base, the distance from the bottom of the base of a wave (the distance from valley to valley) is considered as being almost twice the height of the wave. Therefore a wave 40 feet high would have a base extending 375 feet. The force of waves breaking on the shore is often seen to be the square of the height. —*Tit-Bits.*
