

To Our Friends and Neighbors

You know us. You know we would not—that we could not afford to—go back on our word. Nor can you afford to ignore this money-back-if-not-satisfied offer on this splendid laxative.

We honestly believe we have the best bowel remedy ever made—the most pleasant-to-take, most permanently beneficial laxative for relief from the miseries and dangers arising from constipation.

We wouldn't say this if we didn't believe it to be true. We wouldn't risk our reputation by making such statements did we not feel sure you would find them true.

Our faith is built both on the knowledge of what Rexall Orderlies are made of and on observation of very many severe cases in which they have proven their merit.

Try them at Our Risk

If they do not abundantly prove their merit with you also—if you are not entirely satisfied with them—we will refund your money—and we will do that on your mere say-so. We don't ask you to risk a penny. Isn't that fair?

Just let the bowels fall in properly doing their work—just let their action be delayed and incomplete and the entire system and every other organ suffers. Wastes that

should have been dispelled remain to poison the system.

Headaches, biliousness, nervousness and other tormenting and serious ills are common when the bowels fail to act daily, as nature intended. All this may be avoided, if you will accept our advice.

Rexall Orderlies

taste just like candy. They are soothing and easy in action. They do not cause griping, nausea, purging or excessive looseness. They tend to tone and strengthen intestinal nerves and muscles. They promptly relieve constipation, and help to permanently overcome it.

Rexall Orderlies promote better spirits and better health. In all of these things they are vastly superior to old-fashioned, harsh salts and other purgatives, which are not only unpleasant to take but which usually leave the bowels in worse condition than before. We particularly recommend Rexall Orderlies for children, aged and delicate persons.

Rexall Orderlies come in vest-pocket tin boxes, 12 tablets, 10c; 36 tablets, 25c; 80 tablets, 50c.

CAUTION: Please bear in mind that Rexall Orderlies are not sold by all druggists. You can buy Rexall Orderlies only at the Rexall Stores. You can buy Rexall Orderlies in this community only at our store:

J. W. McLAREN

Watford Ontario
The Rexall Store

There is a Rexall Store in nearly every town and city in the United States, Canada and Great Britain. There is a different Rexall Remedy for nearly every ordinary human ailment—each especially designed for the particular ill for which it is recommended.

The Rexall Stores are America's Greatest Drug Stores

FEET USED TO BE LARGER.

A Modern No. 6 Shoe Would Have Fitted an Ancient Greek Belle.

Artists assure us that no Greek sculptor would have ever dreamed of putting a nine inch foot on a five and one-half foot woman. The types for the classic marble figures were taken from the most perfect forms of living persons. Unquestionably the human foot, as represented by the ancient sculptors, was larger than the modern one; and, in fact, the primitive foot of all peoples whereof we have any record, either of statuary or otherwise, was considerably larger than the restricted foot of later times.

The masculine foot, forming an approximate average of four different countries, was about twelve inches long. This would require at least a No. 10 shoe to cover it comfortably. The average masculine foot today is easily fitted with a No. 8½ shoe and is therefore not above ten and seven-sixteenths inches. Now, by the old sculptural rule of proportion, a man five feet nine inches in height should have a foot eleven and one-half inches long, or one-sixth his height. It was of no great consequence what size sandal he wore, but he would have required a modern shoe of at least a No. 10½ for a minimum fit or a No. 11 for real comfort.

For women, allowing for the difference in the relative size of the sexes, which was about the same then as now, a woman of five feet three inches in height would have had a foot ten inches long, requiring a modern shoe of the size No. 6 as the most comfortable, or a No. 5½ as the limit of comfort.—Harper's Weekly.

SALLY'S MISTAKE.

It Cost Her a Rich Husband and Gave London Guy's Hospital.

That bequests to individuals and to public benevolences are frequently the result of a mere whim or of caprice has no better illustration perhaps than the case of Thomas Guy, who built and endowed the great Guy's hospital of London at a cost of £238,292 nearly 200 years ago.

Guy had a maid servant of strictly frugal habits, who made his wishes her careful study. He resolved to make her his wife. The necessary preparations were made for the wedding, and among others many little repairs were ordered by Mr. Guy in and about his house. The latter included the laying of a new pavement opposite the street door.

It so happened that Sally, the bride elect, observed a piece of pavement beyond her master's house that required mending, and of her own accord she gave orders to the workmen to do this.

This was done in the absence of Mr. Guy, who on seeing more work done than he had ordered was informed that the additional work had been done by the mistress's orders. Thereupon Guy told Sally she had forgotten her position and added: "If you take upon yourself to order matters contrary to my instructions before we are married what will you not do after? I re-

nounce my matrimonial intentions toward you."

So Sally lost a rich and gronchy husband and London gained a noble institution for the poor.

Deadly Venom of the Cobra.

A full sized cobra is able to eject enough venom at a single full and complete bite to kill about twenty men. The Indian cobra yields as much as twenty drops, and Dr. Hanna mentions having obtained as much as twenty-eight drops.

In experiments with the venom of the cape cobra F. W. Fitzsimons, an expert, found that one drop diluted in a little water and injected into the tissues of the leg of a large monkey killed it in half an hour's time. A fraction of a drop was sufficient to kill a rat and a fowl within an hour. Judging from the effects of cobra venom on the higher animals, Mr. Fitzsimons considers that one full drop is a fatal dose for a strong, healthy man.—Westminster Gazette.

Walnuts, Five a Penny.

From one of Steele's letters to his wife we learn the price of walnuts in Queen Anne's reign. "I send you seven pennyworth of walnuts at five a penny, which is the greatest profit I can give you at present of my being with my whole heart yrs."

Outside the letter Lady Steele has written, "There are but 20 Walnuts," so apparently her "passionate lover and faithful husband" had given in to the temptation of eating a few before sending them. He made ample amends for this on the following day by a gift "half a hundred more."—London Standard.

Convenience.

"You find that an automobile helps you to keep your engagements?"

"It does better than that," replied Mrs. Chuggins. "If you don't want to keep them it enables you to explain everything by saying that you broke down."—Chicago News.

The Scared One.

Aunt—Last night before retiring I looked under the bed as usual and really found a man there. Niece—I suppose you screamed for help. Aunt—No; he hid.—Meggendorfer Blatter.

An Expert.

"Does your wife do much fancy work?"

"Yes; when I'm late in getting home evenings she fancies all sorts of things."—Boston Transcript.

If you leap into a well Providence is not bound to help you out.—German Proverb.

Children Cry FOR FLETCHER'S CASTORIA

Facts About Coffee.

Coffee originally came from the island of Mocha, whence in the year 1616 coffee trees were transported to Holland. This article of diet was first scientifically cultivated at Surinam by the Dutch in 1718. Though coffee was not known either to the Greeks or Romans, it was used as a beverage by the Persians in early times. The first coffee house of which there is any record was opened in Constantinople in 1511, and coffee was first brought to France in 1662 by Thevenet, the famous traveler.

A Record Business.

It is expected that the exports from St. John by the various steamship lines during the present winter will reach a value of \$5,230,000, and more has gone forward since, while the business will increase as the season wears on. The shipments of grain are heavy, being already close to 3,000,000 bushels.

RALEIGH, N. C. CHILD

Made Strong and Well by Vinol.

When we tell you that Vinol is the best remedy in our whole stock for making weak, puny, ailing children strong, robust and rosy, we are only telling you what has been proved by hundreds of mothers.

Mrs. W. O. Strother, Raleigh, N. C., says: "My little girl, Hazel, has been taking Vinol to build her up after a severe spell of sickness. It has done so much good by restoring her appetite and building up her strength that I think Vinol is the finest tonic ever prepared, and I am telling everyone about it."

What Vinol did for this little girl it will do for every weak and ailing child, because sickly children need the strengthening cod liver elements and the tonic iron that Vinol contains—that is why Vinol builds them up quickly and gives them a fine, healthy color. It is pleasant to take, and we guarantee that the results will satisfy you—money back if they do not.

T. B. Taylor & Sons, Druggists, Watford, Ontario.

Bread sponge, if made with rice water, has a velvet texture, and it is as good as that made with either potatoes or milk.

Press cooked cereals or mashed potatoes into empty marmalade jars, when cold they can be turned and spiced for frying.

The N. B. Howden Est.

This label has no "second grade"

THERE'S only one quality of Canada Cement. It is the highest quality that can possibly be made with modern equipment, scientific methods and rigid inspection by expert chemists.

The Canada Cement you buy for a garden walk is the same cement that is sold by the trainload for great dams, elevators and bridges. The engineers in charge of these great works have ample facilities for testing the quality of cement.

Canada Cement

comes up to their most rigid requirements.

The farmer has not these facilities for testing the quality of cement. He must buy a product upon which he can depend for a grade that is always of highest quality, and that therefore does not need to be tested.

You can place absolute reliance upon the quality of Canada Cement.

It's always the same and always the best. The large output—which enables us to keep the price down, enables us also to maintain the factory equipment and organization that keeps the quality up.

A Canada Cement label appears on every bag and barrel of genuine Canada Cement. See that it's on the bags and barrels of cement that you buy.

WRITE for our free book "What the Farmer Can Do With Concrete." It has told a hundred thousand Canadian farmers of the money-saving and profit-making possibilities of concrete.
