SATISFACTION GUARANTEED.

BAIN WAGON COMPANY'S KNEE-BOB

PATENTED JANUARY 13, 1886.

REASONS WHY OUR SLEIGH IS THE BEST IN THE MARKET.

- Because with our Patent Attachment to Hind Bob it is the easiest running Sleigh made.
- Because it will go in and out of pitch-holes without any strain on itself, even when heavily loaded.
- Because it will go in and out of pitch-holes without the hind bolster sliding back and forth on the box or rack as it does with the old coupling.
- Because with our Improved Coupling it can be backed up the same as a wagon.
- Because with our swivel in coupling it can be used on the roughest roads without any twist to the reach.
- Because with our swivel in coupling it will allow either Bob to turn up on its side when loading or unloading logs without any danger of breaking the reach.
- Because with our improved coupling it can be turned around in its own length.
- Because it is always in line and will track under all circumstances.
- Because it runs off less than any other sleigh made.
- Because it is well made of the very best wood and iron.
- Because it has a good length of runner and isced with a two-inch steel shoe.
- Because all sleigh makers who have seen our coupling say that it was just what was wanted to make the Bob-sleigh perfect, and wonder why such a simple and necessary improvement was not thought of before.

Made only by BAIN WAGON CO., WOODSTOCK, ONT.

FAY CURRANT GRAPES

Come, Fellow Farmers!

It is the good things and the new things you want. Here is a Catalogue full of them! Do you want tested seed, raised from stock selected with extra care, grown from the best strains, not from the original ones? I claim to have also just such. Do you want new varieties that are really good, and not merely novelties? I claim to have many such. Do you want seed that the dealer himself has, with enough in to warrant a warrant, as so Catalogues do? You want an exceptionally large collection to select from? Mine is such. Do you want them directly from the grower? I grow a large portion of mine—free seedling grow any! My Catalogue and Pioneer Seed Catalogue for 1890 FREE OF CHARGE. GEO. S. JOSSELYN, Fredonia, N.Y.

The "Corbin" Disk Harrow

In over 30 Field Trials with other Disk Harrows the past year the "Corbin" was sold, and settled for.

Every Farmer should insist on a trial with the "Corbin" before buying any other.

Read What the Best Farmers Say! Mr. THOS. SHAW, Ed. Live Stock Journal: "No farmer will make a mistake in investing in this harrow."

J. C. BATES, Esq., Elmstale, Muskoka, manager of a 500 acre farm, writes: "Aug. 22nd, 1888. "Have found it to be the most labor-saving implement ever used on a farm. It is ahead of any gang plow, cultivator or harrows that has ever been in use."

J. C. DANCE, Esq., Ex-Rector of Doocaster Twp., and Ex-Warden of Elgin Co., writes: "King Mill, Elgin Co., Aug. 25th, 1888. "I consider it one of the best of implements, and far surpasses anything of the kind I ever saw as a pulverizer; also, for working up soil, uneven ground, or among stumps, I believe it has no equal."

Wm. T. Wilson, Esq., Lullaman, Peel Co.: "Nov. 22nd, 1888. "Have used it three years. Boxes not much worn. Disks are now 1 1/2 ins. diameter (originally 1 1/4 ins.) Have cultivated about 900 acres with it (once over). Can cultivate from 12 to 16 acres per day with it. I work 300 acres, and find I can do work better, easier and faster. I use them for nearly everything, sowing all my grain, fall and spring, breaking sods on fallow, etc."

(Memo—Mr. Wilson uses a 7 ft. Corbin with Seeder. He also bought another 7 ft. No. 30, last spring, having use for two harrows. The work above referred to was that of the first harrow only.)

T. TIERNEY, Esq., Ex-Rector of Twp.: "Nov. 19th, 1888. "Have used it for three seasons, and given entire satisfaction. Boxes and disks not worn to any appreciable extent. The draft is considerably less than the Spring Tooth harrow, in fact this harrow has been laid aside since we tried the Corbin. Can cultivate about 10 acres per day with ease."

J. T. TIERNEY, Esq., Ex-Rector of Twp.: "Nov. 19th, 1888. "Have used it for three seasons, and given entire satisfaction. Boxes and disks not worn to any appreciable extent. The draft is considerably less than the Spring Tooth harrow, in fact this harrow has been laid aside since we tried the Corbin. Can cultivate about 10 acres per day with ease."
