

WALTHAM WATCHES.

In soliciting anew the public patronage of Watches of domestic production, the American Watch Company respectfully represent:

That no fact in the history of manufactures is more completely demonstrated than that the best system of making Watches is the one first established by them at Waltham. That system always had the warrant of reason and common sense, and now the test of time in the trial of the watches themselves cannot be denied to have been ample and satisfactory. It is admitted on every hand—the evidence of daily observation and common repute—that the Watches not only keep correct time, but that as machines they endure. It should seem that nothing more is needed but that their sizes, shapes, and appearance should suit the tastes of the people. As to all these conditions the American Watch Co. are now fully prepared to answer the exactions of the market. They confidently assert there is no longer any need for such reasons to import watches of any description whatever. Every size in ordinary demand, every shape and every variety of finish and decoration, may now be had. And as to price, the recent reductions leave no room for doubt that the Waltham system of Watch-making is the most economical as well as the most reliable, and that the Waltham Watch is the cheapest as well as the best.

Many new varieties of movements have been added during the last year, all of which display the latest improvements in design and finish, and evince the rapid progress the Company is making toward perfection in the art. Among these the new small size Watch, for Boys and young gentlemen, is to be specially noted. A very low price has been made for this Watch because it is a boy's watch, and with the object of bringing it within the means of boys of all classes. Price being considered, no such watch, in quality and beauty, has ever, in any country, been produced.

The "Crescent-street" full plate Watch, added during the last year, is now made either with or without stem winding and setting attachment. This Watch, in either form, the Company challenges all manufacturers of all countries to beat or equal for its price. It is made with all the latest improvements in every part—improvements which improve—and which not only make it better for its purposes as a time-keeper, but will make it the great favorite with watch-makers. This, the highest grade of full plate watches made in this country, in size and appearance, in finish, and general excellence, is especially intended for and recommended to business men, and in particular to Railway and Express men, to constant travellers—in fact, to all live men who must be told by their watches the correct time of day whenever they want it. All such men should have the "American Watch Co., Crescent-street." Counting on such destination for this variety of their manufacture, the Company devote the greatest care to its construction, employ upon it only their best men and best machinery, and issue it with their reputation at stake upon its success.

For sale by all leading Jewellers. No watches retained by the Company.
