

After the whole slab is thus laid out, cement mortar, mixed thin enough to fill in the smallest space between blocks and reinforcement, and consisting of one part portland cement and three parts sand, is poured into joints. The great advantage of this mortar over concrete is its great and reliable adhesion to steel and terra cotta, which has never been known to be diminished by vibration or shocks or age.

On May 1st, the Clinton Wire Cloth Company, Clinton, Mass., will move its New York office from 33 Park Place to 261 Broadway. At the same time, the Chicago office will be removed from 237 Lake street to 30 and 32 River street. For over half a century this concern has been manufacturing wire cloth of every description, embracing woven wire fence, electrically welded wire fabrics for concrete construction, wire lath, hexagonal netting, perforated metals, etc., during which period these products have been the standard in their line.

Sidewalk
Prisms

The Paschall Interlocking System of Steel Beam Construction for Sidewalk Prisms is unequalled

Because on account of its structural formation it has greater strength for its weight than any other known sidewalk construction. The grooved bar and cement interlock in such a manner that any separation of iron and cement is impossible.
