

THE TORONTO BINDER In Manitoba and the North-West.

LETTERS OF PRAISE—Continued.

ARROW RIVER, N. W. T., Aug 16th, 1884.

The Massey Mfg. Co., Toronto :

DEAR SIR,—This is to certify that the Toronto 6 ft. Binder bought from your agent, Mr. Hall, was started to-day in a field of barley and gave entire satisfaction. The "Sheaf Carrier" is a perfect success. We are, gentlemen,

Yours truly,

JOHN WALLACE.
W. WALLACE.

MORRIS, N. W. T., Sept. 19th, 1884.

MR. T. J. MCBRIDE,

Manager Massey Manufacturing Co., Winnipeg.

GENTLEMEN,—The Toronto six foot Binder purchased from your agent, Mr. D. W. Barker, has by far exceeded our expectations, having now cut 150 acres, and expect to cut 50 acres or more yet this season. We are at present cutting a field of very heavy tangled wheat (left by another make of Binders) without the least difficulty. We like the way of raising and lowering the machine, being able to cut the longest, shortest or worst tangled grain without stopping the team; and would not be without the Sheaf Carrier for fifty dollars, as it fully saves the labor of one man in the field. We have great pleasure in recommending the "Toronto" to any requiring a first-class Binder.

Yours respectfully,

T. R. WILDE.
S. DITLOR.

LITTLE PIPSTON, N. W. T., Sept. 9th, 1884

MR. T. J. MCBRIDE,

Manager Massey Manufacturing Co., Winnipeg.

DEAR SIR,—The Toronto Binder, I purchased this season is all that it has been recommended to be. I have started it and have cut both long and short grain. It does its work to perfection, nothing in the shape of a binder could do better, in fact I can find no fault with it. The Sheaf Carrier is quite a success. It will save one man's labor at least. I can safely recommend it to all my neighbors and friends in need of the like.

Yours respectfully,

JESSE SCAROTT.

R. J. PHIN, Witness.

LYTLE-TOWN PARK, REGINA, N. W. T.

I have much pleasure in saying that I am fully satisfied with the Toronto Cord Binder and Sheaf Carrier purchased through your Agent, Mr. McCasker, Regina, and put up and started by Mr. Clokey. It does good work in all kinds of grain, ripe and unripe; and is light on horses necks and themselves. I consider that any ordinary pair of horses can run it. Further I consider it my duty to recommend the Sheaf Carrier if only for the purpose of carrying the corner sheaves out of the way.

GEO. L. LYTLE.

HIGH BLUFF, N.W.T., Aug. 18, 1884.

T. J. MCBRIDE, ESQ.,

Manager of the Massey Mfg. Co., Winnipeg :

DEAR SIR,—The Toronto 5 foot Binder I bought this season from your agent, W. F. Irwin, was this day started in a heavy field of barley, some of it badly lodged, and the machine worked in the most satisfactory manner, drawing very light, making the neatest sheaf I have ever seen, and although after I bought, agents of other firms tried hard to make me cancel my order, telling me I could not lower the machine on the near side. This I find is false, as I can cut a level swath within two inches of the ground, and without stopping the team, instantly raise it to cut as high as wanted; so I consider this device the best. I am satisfied that the material in this machine is of the very best, and would advise any farmer wanting a good working and lasting machine to buy the "Toronto."

W. MOORE, SR.

We, the undersigned, were present at the trial of the above machine and can cheerfully subscribe to the above.

WILLIAM HEENEY,
JOHN HOWIE,
FRANCIS A. EVANS,
WILLIAM MOORE.

HIGH BLUFF, N.W.T., Aug. 23, 1884.

To the Massey Manufacturing Co. :

GENTS,—I am pleased to inform you that the Toronto 6 foot Binder I bought this season from your energetic agent, W. F. Irwin, was this day set up and started by him in a field of barley, the machine being drawn by two small horses. I must say it runs very easy. I am surprised at how easy it draws. It is very easy to turn at the corners, is quickly and easily adjusted to cut high or low and cuts a level swath at either point. The work done pleases me well, and I can cheerfully recommend the Toronto Binder to any one wanting a first-class machine.

J. B. SWAN.

SCHONHURST, N. W. T., Sep. 20th, 1884.

The Massey Mfg. Co. :

SIRS,—The Toronto 6 ft. Binder which we bought of your agents, Schram & Heyden, of West Lynne, has just finished our second harvest. It has never cost me a cent for repairs nor ever failed to do its work in all kinds and conditions of grain. We have as yet seen no Binder equal to the "Toronto" for taking up down grain, and we cheerfully recommend it to all in need of such a machine.

JACOB SEWATZKY.
DAVID FEHR.

P.S.—I have also used the Toronto Binder for two seasons, and can fully corroborate the above.

JACOB FUNK.

SCHONHURST, N.W.T., Sept. 10, 1884.

Massey Manufacturing Co., Toronto :

SIRS,—The Toronto 5 foot Binder which I bought of your agents, Schram & Heyden, has far exceeded my expectations. My grain was very heavy to cut, as much of it was badly lodged and tangled, but it went through in grand style, never failing to do its work. All who saw the machine were delighted with the way in which it worked. Can recommend it to all in need of such a machine.

CORNELIUS MARTENS.

WEST LYNNE, MAN., Aug 23rd, 1884.

The Massey Mfg. Co. :

The Toronto Binder which I purchased from you through your agent at West Lynne, we started to-day in a field of wheat that was quite green. We only used two horses, although the bottom was quite soft on account of so much rain. They seemed to handle it quite easy, and worked it to my entire satisfaction.

Yours truly,

LAWRENCE HOGETOOM.

WEST LYNNE, N. W. T., Sep. 18th, 1884.

The Massey Mfg. Co., Toronto :

DEAR SIRS,—I bought last year, through your efficient agent, Wm. Schram, of West Lynne, one of your justly celebrated Toronto Binders. Although I happened with the misfortune of having it burned this spring by prairie fire, the manner in which it wrought afforded me the advantage of knowing where to buy again. I find some valuable improvements upon the machine which I purchased this year, which makes it even superior to that of last year. I cut 125 acres, some of which was badly down and tangled, and the machine worked to my entire satisfaction. As to draught, I would state that my horses are light, and when I commenced to cut their shoulders were very sore from plowing. Although the ground was very soft, on account of so much rain, after finishing my harvest their shoulders are entirely well. I cannot too highly recommend it.

Yours very truly,

T. W. GOODHEW.

TREHERNE, Man., Aug. 26, 1884.

MR. T. J. MCBRIDE,

Manager of the Massey Mfg. Co., Winnipeg :

I am pleased to write to tell you that I am working the Toronto Binder I bought from your agent this year, and that I am well pleased at how well it does its work and how easily it is handled. I am running it with oxen and they handle it very easily. I am well satisfied with the manner of changing the cut for high or low grain, as it is so easily and quickly done. I believe that although dearer, it will work better and last longer than any other machine, therefore will be the cheapest in the end. I think the "Toronto" will be all the go around here next year.

ROBERT BREWSTER.

TREHERNE, Man., Aug. 26, 1884

T. J. MCBRIDE, ESQ.,

Manager of the Massey Mfg. Co., Winnipeg :

DEAR SIR,—The Toronto 5 foot Binder which I bought from T. A. Medcalf, your agent, was this day set up and started with a small pair of horses. The Binder working like a charm and drawing quite easy. Every sheaf was well bound and very tidy, although the wind was blowing very hard at the time. I admire the arrangement for the adjustment of the reel, and the tilting and raising and lowering of the machine works to my perfect satisfaction. So far I am more than pleased with the "Light Toronto." Wish you every success in selling your two thousand for next year.

WILLIAM H. SHARP.

I was present and can truthfully attest the above.

JNO. R. RANNARD.

MCGREGOR STATION, Aug. 15, 1884.

T. J. MCBRIDE, ESQ.,

Manager Massey Manufacturing Co., Winnipeg.

DEAR SIR,—It gives me great pleasure to testify to you that the Toronto five foot Binder which Yeochum Horst purchased from your agent, W. F. Irwin, this season, was thoroughly tested on my farm to-day, Mr. Robert Orr, your expert, being present. We ran the machine, drawing with two horses, into a field of green oats which was very full of weeds; the machine drew very easy and handled without the least trouble. The binding done is the best I have ever seen. The whole machine works like a charm and makes little or no noise.

S. M. YOUNG.

TREHERNE P.O., Man., Aug. 25, 1884.

T. J. MCBRIDE, ESQ.,

Manager Massey Mfg. Co., Winnipeg :

DEAR SIR,—The Toronto Cord Binder I bought this season from your agent, Thomas Medcalf, was this day started in a field of heavy wheat, the Binder drawing very easy on the oxen and doing a perfect job, binding every sheaf in a proper way; and I find that the raising and lowering way this machine has is a complete affair. No delay, but done just as you go along. All the stuff that other agents say about this way is misleading, as I find the "Toronto" can cut as low as wanted and as high, and level too, that is the fact. The stuff this machine is made of is tough to be sure, and I feel sure it will last a decent life-time. Wishing you good luck in selling lots of Toronto Binders.

I remain, yours,

DENIS CAVANAGH,
JOHN R. CAVANAGH.

MCGREGOR STATION, N.W.T., Aug. 14th, 1884.

T. J. MCBRIDE, ESQ.,

Manager of the Massey Mfg. Co., Winnipeg :

DEAR SIR,—It gives me great pleasure to inform you that the Toronto Cord Binder which I purchased this season from your agent, W. F. Irwin, was this day set up and started by Mr. Robert Orr, of your Works, Toronto. The machine was set up and driven straight into a field of green barley, and every part worked like a charm the Binder doing its work perfectly, not missing a single sheaf. The mode of raising and lowering and tilting the machine does its work perfectly, and is so easily handled that a boy of ten years could handle it well. I am so well satisfied that I have paid the cash for it this day.

JAMES MUIR.

FLEMING, N. W. T., Sept. 1st, 1884.

We the undersigned settlers in Township 12 and 13, Range 30, having this day seen a test trial on Mr. John Day's farm, Township 15, Range, 30, between two machines, the Toronto 6 foot Binder and the Dundas; were convinced the "Toronto" was by far the best machine. It is free from any side draught; being drawn for several rods with the tongue lying on top of the neck-yoke, it did not vary one inch from centre. It ties the sheaves much more snugly, not leaving any littering straw the same as the Dundas. The "Toronto" was worked with two horses, doing their work with twice as much ease as three on the Dundas; and we further wish to say that the Sheaf Carrier did its work well, leaving the bundles in perfect windrows for shocking.

SAMUEL DAY, Ex-Warden, County of Elgin.

M. C. CAMERON. JOHN KNOX.

JOHN DAY. ALBERT DAY.

FLEMING, September 1st, 1884.

This is to certify that the Toronto Cord Binder sold by J. Maw to M. W. Macdonald, was this day started in heavy wheat and oats and gave me perfect satisfaction. The test was on the farm of J. Day, Sec. 4, Township 13, D. 30. Having heard that the table could not be raised or lowered on driving wheel, I find that is an erroneous statement, for the same can be raised and lowered by the tilt bar while the machine is in motion with perfect ease. The Sheaf Carrier worked well leaving the sheaves in windrows ready for shocking.

Yours truly, W. M. McDONALD,
Tp. 12, R. 30.

CLEARWATER, N. W. T., Sep. 11th, 1884.

MR. T. J. MCBRIDE, Manager.

The Massey Mfg. Co., Winnipeg :

GENTLEMEN,—The Toronto Cord Binder we purchased from your agent, Mr. Tait, and started by Mr. Watson, has given the best satisfaction. I have cut 100 acres of heavy grain, part of which was badly lodged, but it handled it with all ease. The lightness of draught is one great feature of the machine; two horses can handle it with ease. There are a number of other Binders working in this section; but from what we have seen of them we are glad that we purchased a "Toronto" Binder. We think those other machines, which are only a load of iron and wood, are only a thing of the past. I would advise anyone about to get a Binder to purchase your machine.

GEO. MCTAVISH.

MANITOBA, Sept. 3, 1884.

The Massey Manufacturing Co. :

Having purchased one of your celebrated Cord Binders from your agent, Mr. George Lawrence, I have given it a good trial and it has given entire satisfaction. I think it has no superior, and for heavy down grain I do not know if it has an equal, and I would recommend it to any one wanting a good, light, serviceable machine.

WILLIAM MUNRO,
Silver Spring, Manitoba.

BUELAH, MAN., Aug. 22, 1884.

A. B. HARRIS,

Agent for The Massey Manufacturing Company.

SIR,—The Toronto Cord Binder bought from you this season, is now working in my field, and I am greatly pleased with it. I am working it with two horses and can cut grain from 2½ to 12 inches from the ground by measurement. The Sheaf Carrier is a great success, and I can recommend the machine as being equal to your recommendation to me.

R. A. IRWIN.
