Frank W. Horner Inc. was founded in 1912 and since 1962 has been part of the Carter-Wallace International family of companies. Horner develops, manufactures, markets and distributes a wide range of pharmaceutical specialties, and both over-the-counter and prescription drugs. In association with its affiliated companies, Horner manufactures and markets many diagnostic reagents for the detection of pregnancy and of diseases.

The company's manufacturing capability includes the production of a wide range of solid and liquid forms of pharmaceuticals and sterile and lyophilized filling of diagnostics. Horner's modern equipment produces highly efficient packaging of compressed and coated tablets, capsules, suppositories, creams, liquids, injectables and diagnostic kits.

**Global Research Ltd.**  
Highway 69 North  
Nobel, Ontario  
Canada P0G 1G0

Tel: (705) 746-4500

*John Lautzenhiser*  
*President*

Global Research Ltd., a Canadian company established in 1985, specializes in developing innovative electro-mechanical health care devices. Global's familiarity with state-of-the-art microelectronics, lightweight metals and plastics, and its original design development create cost-effective and practical products for the health care market.

Global manufactures lightweight, precision controlled add-on power-drives for non-electric wheelchairs. The Global lightweight unit (12 lb.) has an easy-to-operate joy-stick and allows the user to enjoy an excellent range of speeds, automatic braking and natural pivotal turns.

*The add-on, joystick-controlled Wheel EZ power drive engineered by Global Research Ltd. fits most non-electric wheelchairs to provide a smooth ride at the full range of available speeds.*
