

Canadian Investment in Finland

The stock value of Canadian direct investment in Finland is negligible, amounting to less than C\$5 million in 1986. This value will probably be revised upward because Polysar now holds a 50% interest in Raisio Polysar Oy, a joint venture company that will produce latex. Polysar's partner in the venture is Raisio Tehtaat.

The few other Canadian companies with investments in Finland include Bombardier, with an interest in Trapper Oy; and IP Sharp Associates, with a 20% interest in TM Team Oy (software).
