NEW ASSOCIATION MAY BE FORMED

Sport Enthusiasts in the Beach District Plan New Organization.

TO AMALGAMATE CLUBS

Great Progress Made by Kew Beach Presbyterian Church.

A general meeting of all sport enthusiasts at the Beaches has been arranged for Friday night to be held in the Kew Beach school at the corner of Queen street and Kippendavie avenue. The object of the meeting will be the organization of a Beaches Lacrosse and Athletic Association, and a large number of business men and citizens in the district have promised to attend. At present the large number of sports clubs in the eastern section of Ward One are all run independently, and it is thought that by the formation of a united association, the class of sport will be much improved.

There is now only about \$13,000 debt on the new Kew Beach Presbyterian Church, the total amount subscribed being something like \$27,000, and it is expected that the debt will be wiped off in three or four years' time. In every way the church has progressed rapidly, particularly in collections and attendance. The choir has been increased to forty, and the installation of a new organ in a few months' time will prove a big factor in the musical part of the services. The organ will cost between four and five thousand dollars.

A large gang of men are engaged in grading Elmer avenue and in filling in the roadway to make a new street from Kippendavie to Kew Beach avenues. This will also be an extension and double the length of Kew Beach avenue.

New Debating Society. Last night the young people from the district churches at the Beaches met at the invitation of the A.Y.P.A. of St. John's Anglican Church in the school room of the church and discussed a proposition designed to supply the various offices, municipal and otherwise, with experienced speakers and debaters, with decided to form a parliament, to which members will be elected, and regular debates held for the discussion of local issues and questions of general interest.

struction of the road. From the same enquiry it appears that Mackenzie and Mann, Ltd., for several years past have acted as agents for the C.N.R. and as such have made arrangements for the construction of the various lines which are now being built or which have been completed. The remuneration by way of commission payable to Mackenzie and Mann, Ltd., for their services in this connection have been released by Mackenzie and Mann as above stated. The government has strongly insisted upon this point which was long resisted, but has eventually been conceded.

Enquiry By Experts. The government has also constituted a board of railway engineers and other experts from the staff of the I.C.R. from the general staff of the department of railways and canals, and from the staff of the transcontinental railway. This

board has examined as far as it was possible to do so from information available the status of the road in respect of its physical condition and has assisted the government in considering the company's estimates of the amount necessary to ensure the completion of the system.

CHARGED WITH FRAUD. Alex Taroska, 43 Dundas street, was arrested on Queen street at 9 o'clock last evening, charged with defrauding a number of foreigners out of small sums of money. Taroska claimed to be an employment agent and took money from the men, which he said was to pay him for his trouble. Before the laborers discovered they had been swindled Taroska had fled the city, returning only yesterday.

When Detective Guthrie set out for Oshawa yesterday to arrest Evaro Rosenett, alias Henry Smith, he had no idea of the obstacles to be surmounted before the alleged film-frauder could be located. The chief constable of Whitby had refused to arrest the man, and told Guthrie if the Toronto police wanted him, to send for him. Guthrie, by some mistake, boarded the wrong train, one which did not stop at his destination. As a result of this error he had to tramp five miles from Oshawa back to Whitby. At Whitby the detective hired a horse and wagon and landed in the ditch two miles from town, when the old nag took fright and bolted. From here he had another fight, and eventually arrested Rosenett at his work on the lake front.

A laborer himself, Rosenett came to Toronto a week ago and posed as Henry Smith. He got hold of about two dozen Italians and told them that if he could secure them employment in Whitby, when the laborers arrived at Whitby they found no work for themselves, and had to return.

To Cure Catarrhal Deafness and Head Noises. Persons suffering from catarrhal deafness and head noises will be glad to know that this distressing affliction can be successfully treated at home by an internal medicine that in many instances has effected a complete cure after all else has failed. Sufferers who could scarcely hear a watch tick have had their hearing restored to such an extent that the tick of a watch was plainly audible seven or eight inches away from either ear.

Therefore, if you know someone who is troubled with head noises or catarrhal deafness, cut out this formula, the means of saving some poor sufferer from total deafness. The prescription can be prepared at home and is made as follows:

Secure from your druggist one oz. Parment (Double Strength), about 15 cents; 1/2 pint of hot water and add to it 1/2 pint of granulated sugar; stir until dissolved. Take one tablespoonful four times a day, after meals, and after the first dose, if the hearing is not improved, add a few drops of the tonic action of the treatment. Let the patient eat and drink freely, and drop the tonic at the throat and other symptoms of catarrhal deafness or catarrhal deafness are quickly overcome by this efficacious treatment. Nearly 100 per cent. of all ear troubles are directly caused by catarrh; therefore, there are few people whose hearing cannot be restored by this simple home treatment. Every person who is troubled with head noises, catarrhal deafness or catarrhal deafness should give this prescription a trial. There is nothing better.

Important—In ordering Parment, always specify that you want Double Strength. If not, send 1/2 oz. to the International Laboratories, 74 St. Antoine street, Montreal, P. Q., who make a specialty of it.

FIRE BRIDGES TO RETURN CRUZ. Canadian Press Dispatch. WASHINGTON, April 26.—Naval aviators who made flights over and around Vera Cruz today reported that several of the bridges along the coast had been damaged by the earthquake. This was cabled to the navy department by Rear-Admiral Fletcher.
