

**PULP NOTES.**

Sir Alfred Harmsworth and a number of newspaper proprietors of London, England, are reported to have just closed negotiations for 1,500 square miles of timber lands in the interior of Newfoundland, on which they propose to erect an immense pulp mill.

It is reported that the industries contemplated by the Quatsino Power & Pulp Company at Quatsino Sound, B. C., are to be proceeded with under a contract that

provides for the operation of the plant within one year. The plans call for a pulp mill of 125 tons capacity daily, and it is intended as soon as business warrants to build a paper mill to manufacture the pulp into paper.

A boiler explosion occurred in the Kinleith Paper Company's mill at St. Catharines, Ont., on August 13th, by which the building was badly wrecked. The exploding boiler was one of the rotary rag boilers situated on the second floor of a three storey stone

section of the mill. Another similar boiler was carried out into the old canal, together with all the other machinery and debris. The rag boilers were generally operated at a pressure of 25 and 30 pounds. They were fed by pipes from a large steam boiler in another part of the establishment which carries a pressure of 125 pounds, and it is the impression that the regulator must have failed to work and allowed the low pressure boilers to receive the full 125 pounds.

It is again reported that English capitalists will build a pulp mill on the Gilmour & Hughson water power at Chelsea, Que.

# Fire Clay Products

## THE GLENYARDS FIRE CLAY CO.

BONNYBRIDGE, SCOTLAND.

Cablegrams: Glenyards, Bonnybridge.

Codes used, A.B.C. and Glenyards.

Manufacturers of all kinds of **Fire Clay Goods, Ganister and Silica Goods**, for **Iron and Steel Works and Gas Works**, including **Boiler Seating Blocks and Covers of all sizes.** **Ground Fire Clay, Ganister and Silica** In all kinds of Packages
