	PAGE
I. GENERAL REMARKS ON OPERATIONS.—Their Limitations, Division, Planning the Operation, Preparation of the Animal, Place of Operation, Assistance, and After-treatment	1
II. MEANS OF CONTROL.—The Blinds, Hood, Nose and Leg Twitches, "Bull-Dogs," Loop-Twitch, Bull-Holder and Leader, Nose-Rings, and Mouth-Gags for Horses and Dogs	5
Restraint by Fastening a Fore to a Hind Leg, by Lifting a Fore or Hind Leg, by Securing both Hind Legs, the Hippo-Lasso	13
Methods of Restraining Oxen	16
The Side-Stick; Cradle or Beads; the Stocks or Trevis	17
Operating Tables for Horses	19
Casting with Ropes and Hobbles; Cross Hobbles; Apparatus to Prevent Spinal Fracture	24
Continental Methods of Casting; Securing and Releasing limbs	28
Russian Method of Single-handed Casting	37
Securing Cattle, Sheep, Swine, Dogs and Cats for Operation	38
Operating Tables for Small Animals; Complications, etc.	39
III. ANÆSTHESIA.—Introduction, Historical and General	41
General Anæsthesia	42
Anæsthesia in the Horse.—Apparatus	44
Surgical Anæsthesia by Chloroform; Fatal Issues, etc.	46
Administration in the Standing Position; Partial Anæsthesia	50
Morphine and Chloroform, Atropine, Ether, Chloral, etc.	51
Anæsthesia in Ruminants and Swine	55
Anæsthesia in the Dog and Cat	56
Conclusions regarding General Anæsthesia	59
Local Anæsthesia	59
Local Anæsthesia by Cold, Ice and Salt, Ether Spray, etc.	60
Local Anæsthesia by Cocaine; by Infiltration—Schleich's method	61
Spinal Anæsthesia in Animals	64
IV. ANTISEPSIS AND ASEPSIS.—Historical; Lister's and Guérin's Experiments	67
Antiseptic and Aseptic Methods; Wound Infection	68
Antiseptics—Carbolic Acid, Sublimite, Zinc Chloride, Potassium Permanganate, Hydrogen Peroxide, Mercury Bichloride, Iodine, Iodoform, Formalin, Chinisol, etc.	72
Disinfection of the Hands	75
Disinfection of Instruments, Suture Materials, and Dressings	76
Disinfection of the Skin, Mouth, Nasal Cavities, Eye, Ear, Intestine, Uterus, Vagina and Feet	80
First Dressing of Operation and of Accidental Wounds	84
