A MANNISH FIGURE.

As early as Sunday night the people of Mobile had given recognition to the first flights of "Mother Cary's chickens," a rather timorous sea bird, which were coming in droves from the coast and passing Mobile in their early haste for shelter. Monday morning the more courageous seaguilis began to follow in the path of the timid "Mother Cary's chickens," and later in the day, whole flocks of pelicans brought up the rear of the procession that was headed to safety.

The shrill notes of these frightened birds could be plainly heard above the din and noise of the busy city, and in the outskirts their presence had been widely commented upon and accepted as a sure forerunner of the disaster that followed so soon after. The people had no further knowledge of the coming storm than that supplied by these aquatic birds, but that was assurance enough to satisfy all that a storm was invading the coast section and that it might take its course up the bay.

Throughout Monday the presence of the frightened birds from the coast was the feature of conversation. By Monday night there had been such a general storm discussion that the people of Mobile no longer doubted the storm's coming, but only speculated on the time of its arrival. The day and night of Monday had been a period of warning, and early Tuesday morning the first signs of the storm were visible. By Tuesday night Mobile was a stricken city, the extent of life and property loss still being a matter of much doubt, but sumclent to have it recorded as among the notable disasters of the This gives her a handsome figure. "Get an advance, skin the shoes, or lose money!" This was the slogan of the American shoe manufacturer at the opening of the season.

Canadians who buy imported shoes pay one dollar duty, a quarter of a dollar more in higher wages, or \$1.25 in all for their lack of perception. They fine themselves 33 1/3 per cent and get shoes which the made-in-Canada shoe can defeat on even terms in foreign markets.

Then the imported shoe may have been "skinned" of value to partly meet that handicap of \$1.25.

Follow the shoe market, and you will find that the honest United States shoe manufacturer has either withdrawn from the Canadian shoe market or raised his price too high.

"There are models who have not nice arms. The forearm may be bad. Ofter it is covered with down. And, where this occurs, the model is wise in her day and generation.

"Once a week she washes her arms with soap jelly and a special scrubbing brush. Then she goes over her arms with peroxide. This bleaches the hair upon them and makes the down inconspicuous.

"Frequently she adds a little ammonia to the water. Ammonia kills the constitution of the hair, and in time the arms will be smooth. This is one of the tricks of the artist's model.

"The girl of 1907 will have several other points which the models are studying and viewing with more or less dismay, and one of these is her style.

"Style is something few women can find out.

"Style consists largely in walking well. The woman who carries her arms badly will never have style. The woman who lets her chin sink into her throat will never have style. Style lies, also, in doing the hair becomingly and in making it frame the face, and the woman of 1907 will be very well dressed, but she will not dress in black. Her complexion is too glowing.
