DELOIMITUM LEEFO MODULLO

By Staff Reporter.1 Toronto, March 12 .- The deputation from London which came to Toronto to ask the Provincial Government for a grant of \$150,000 towards building and equipping the Western Medical School in connection with Western University, reached Toronto at noon, and after lunching at the Queen's Hotel, proceeded direct to the Parliament Buildings, where the premier met the visitors at 2 o'clock. Practically all the members of the board of governors and the faculty of the university, as well as members of the senate and a delegation from the Chamber of Com

nerce were among the party. Dr. E. E. Bralthwaite and Bishop M. F. Fallon met the deputation nere. Bishop Fallon came to Toronto last night and Dr. Braithwaite has been here since Monday and has already had an audience with the premier. He believes that the Ontario Government almost certainly will accede to the request for a grant, and his optimism is shared by the other members of the party, who express the feeling that the amount asked for is less proportionately than that given to other universities under similar circumstances.

of the Dominion Sugar Company. He was also interested in the brass works and the Wallaceburg cut glass works. For some time he had been devoting his attention to lumber holdings in the south.

A few years ago he suffered from a stroke, and while nothing definite has been learned here, it is believed that a recurrence of the trouble caused his death.

An active interest in municipal matters was always taken by him, and for some years he served Wallaceburg in the council, and in 1899, 1900 and 1901 was mayor. In 1904 he was elected to the Dominion House as Liberal member from East Kent, and held the seat until it was taken from under him in 1911, when Kent was made one riding.

Suggestion Is Made That German River Be Placed Under Control of Special Body—Kiel Canal To Be Used by All Nations in Time of Peace.

Paris, March 12.-Recommendation that the navigation of the Rhine be opened to all nations without discrimination, was made in a report to the peace conference today by the commission on the international regime of waterways, railways and ports. It was suggested the Rhine be controlled by a commission similar to the Danube commission. The status of the Kiel Canal has been settled by the commission on the basis of the freedom of use for all nations for merchant vessels or warships in time of peace. The canal would continue under German ownership and operation. The question of the fortification of the canal is left by the commission to the decision of military and naval experts.

The report of the commission was not favorable to allowing the Bel gian claim that special duties be imposed on German vessels. The report further recommended that a general conference be held within a year to deal with all questions pertaining to the navigation of international waterways, which are regarded as too intricate or complex to be settled finally within the limited life of the peace conference.

No Exaggeration.

The Advertiser willingly prints the telegram from Dr. Ryan, but in justice to the article printed yesterday regarding conditions at the Sanatorium, there several statements should be made,

is follows:

1.—As to the first sentence, there is no exaggeration so far as 'The Advertiser is concerned. A reporter spent some time at the Sanatorium talking to the men, and the mildest of their statements were printed.

2.—As to the third sentence, that "no complaints of medical or nursing service have been received." there was no suggestion in The Advertiser article that any such complaints were made. Dr. Ryan denies something that was not even suggested in the article.

3.—As to the fifth sentence, "Sir Adam Beck's name was not mentioned in the petition," it might be pointed out that this is a quibble. The petition refers to "the interference and bad organization ability of the head of the London Health Association," noes Dr. Ryan suggest that Sir Adam Beck was not the "said head?"

4.—As to the last sentence "The 1.—As to the first sentence, there

4.—As to the last sentence, "The soldiers in Byron have always been happy and contented and as well cared for as in any other institution under the jurisdiction of the department." If such be the case, was it not strange that 140 out of 147 men approached to sign the petition should have attached their names to a document which indicates discontent that resulted in a veritable ultimatum to the authorities?

The Pettilion as it is.
In view of the statement by Dr. Ryaff and his version of what the petition of the soldier patients contained, the petition is herewith reprinted:

treatment at the Queen Alexandra Sanatorium, R. R. No. 7, London, Ontario, do hereby humbly and respectfully pray that your honorable commission take immediate steps to change a condition of affairs that now exists at this institution, that is fast becoming unbearable to your patients, and intolerable to your excellent staff here.

The trouble appears to be the con-

stant undercurrent of friction that has always prevailed here, caused by the interference and bad organ-ization ability of the head of the London Health Association, who considers himself supreme to dictate all policy and plan of management of the institution, and treatment for the patients, always with an eye to rigid economy in nothing but the food for the patients and staff; with the result that the meals now served are, to say the least, exceedingly cheap, unpalatable, undesirable and often unwholesome, and not the kind of food recommended in the treatment of tuberculosis.

Superintendent Powerless. It is beyond the power of our medi-cal superintendent or of the matron here, to alter said diet, or even suggest a better, for the reason that the business manager, who does all the purchasing, and his wife, who is the so-called head dietitian, are employed by, and will apparently only take instructions or suggestions from the said head of the London Health Association. They appear to have his entire confidence, without efficiency or ability; the same is the case with all other employees of this association, with the result that confusion, friction, and inefficiency are rampant, and spying, fault-finding and tale-carrying are the usual orgest a better, for the reason that the and tale carrying are the usual or-der of the day, while the orders or suggestions of your medical super-intendent and staff are ignored, often

This condition of affairs has become such that we fear the excellent staff of officials we now have will resign in a body, and God knows, we need them to fight for us, and see that we get at least a little of the consideration your honorable com-mission is so generously paying for.

902,000 BRITISH SOLDIERS IN THE ARMIES OF OCCUPATION

London, March 11.-The Government announced in the House of Commons yesterday that the total strength of effective and non-effective British troops in the armies of occupation in all theatres of the war amounts to 902,000 men, including officers. The strength of the British army in France, Belgium and Germany, including dominion troops, on February 15, was 1,324,106. It was stated that 197,000 German prisoners are being fed by the British commissary department.
