BACKUS APPLICATION

Concern Ask the Government For More Pulpwood Concessions.

Application has been made to the Ontario government by the E. W. Backus interests for an additional pulpwood concession of nearly \$2,500 square miles, and waterpower rights

Ontario daily newspaper publishers are opposing that application on the ground that in view of the refusal of the Backus interests to supcurrent contract prices for export to foreign countries, it is not in the public interest that they should be granted additional concessions.

E. W. Backus, who has been in Toronto during the past week, has agreed that if his application for additional pulpwood limits and waterpower rights is granted the new paper mill to be erected at Kenora will supply its proportion of the domestic newsprint requirements. That is not satisfactory to the publishers lishers, as it would be at least two years before that mill will be in operation, and meanwhile the Backus in-terests have cut off the supplies of the Canadian newspapers they were sup-plying thru their Fort Frances mill.

Cox's Chances of Winning the Presidency

While Senator Capper's Topeka Capital (Rep.) considers Republican victory at the polls not even in question, declaring that "after November the Democrats will know that a political party can not carry a presidential election in this country by sprinkling a little booze on its clothes," other Republican papers agree with the New York Tribune that it "would be most foolish if they (Senator Harding's supporters) did not frankly recognize the formidableness of the Cox and Roosevelt ticket."
