Identical with this is the apple sent by Capt. Campbell from St. Hilaire as the RAMBOUR BARRE. Of this variety there are a good many trees about Mount St. Hilaire, the oldest about forty years of age and in the garden of Mons. C. E. Testu, who got it among a number of others from a man named Moore, who was gardener to the late Mons. de Rouville. This was about forty years ago and about seven years after the importation of the sonamed Mank's Codlin by Mr. Lunn.

Canada Baldwin (described in Fourth Montreal Horticultural Society's Report, p. 120), though by no means new here, is yet a stranger to many parts where it might prove useful. No bright

red, fine qualitied, good sized, long keeper can anything like approach it in general satisfactoriness on the heavyish soils of North Shefford. On the warm, quick soil of Abbottsford, the early rising of the sap tends to sunscald and to premature decay, yet we must still plant it, as we have no other to take its place, while on heavier soils we expect it to become widely popular.

LATE STRAWBERRY (erroneously so-called) is described and its
