

GENERAL WILLIAMS' PRIZES.

EXAMINERS' REPORTS.

KING'S COLLEGE, June 26th, 1871.

*The Venerable Archdeacon McCawley, D. D.*

DEAR SIR,—We have carefully examined the answers returned by the candidates for the General Williams Prize, in the department of Mineralogy applied to Mining, and find that Messrs. Uniacke and Townshend have obtained an equal number of marks. We therefore recommend that the Prize should be divided between them.

We have the honour to be,  
Your humble servants,

R. S. FRECHEVILLE.  
HENRY Y. HIND.

KING'S COLLEGE, WINDSOR.

MY DEAR PROFESSOR HIND,—

I have received your note on the Examination for the Williams Prize, signed also by Mr. Frecheville. General Williams strongly objected to dividing the Prize in the case of Modern Languages, and the Governors at that time confirmed this opinion. I have suggested to Mr. Frecheville that if you and he would have the kindness to propose a very few test questions to the candidates, the matter might be decided fairly in favour of one or the other of them without infringing our usages. This is a mode, too, which we have employed in other doubtful cases. I am only sorry that it may involve a little additional trouble to the examiners.

Believe me to be,

Yours truly,

GEORGE MCCAWLEY.
