What to Do to Get Fat
and Increase Weight

The Real Cause of Thinness.
A PHYSICIAN'S ADVICE.

Most thin people eat from four to six pounds of good solid fat-making food every day and still do not increase in weight one ounce, while on the other hand many of the plump, chunky folks eat very lightly and keep gaining all the time. It's all about the quality of the food, not the quantity. It isn't Nature's way at all.

Thin folks stay thin because their powers of assimilation are defective. They absorb just enough of the food they eat to maintain life and a semblance of health and strength. Stuffing won't help them. A dozen meals a day won't make them gain a single "stay there" pound. All the fat-producing elements of their food just stay in the intestines until they pass from the body as waste. What such people need is something that will prepare their blood to absorb them and deposit them all about the body—something, too, that will multiply their red blood corpuscles and increase their blood's carrying power.

For such a condition I always recommend eating a Sargol tablet with every meal. Sargol is not, as some believe, a patented drug, but is a scientific combination of six of the most effective and powerful flesh building elements known to chemistry. It is absolutely harmless, yet wonderfully effective and a single tablet eaten with each meal often has the effect of increasing the weight of a thin man or woman from three to five pounds a month. Sargol is sold by good druggists everywhere on a positive guarantee of weight increase or money back.

PARDONED BY PRESIDENT WILSON

ROBERT HICKS
AND TWO OF HIS
CHILDREN, ROBERT
AND SARAH
PHOEBE.

Freed from prison through a pardon granted by President Wilson, Robert Hicks, whose conscience forced him to give himself up to justice after twelve years, returned to his wife and three small children in their tiny apartment in New York city, prepared to take up again the tangled threads of his life. Despite his white hair and fifty-seven years, Mr. Hicks is untroubled by the uncertainties of the future. Mr. Hicks was indicted by a Grand Jury in 1903 on a charge of using the mails to defraud. He fled to Europe and several years later came back to America. Mr. Hicks was sentenced to ten months in prison and a fine of \$1,000. He served forty days of his sentence, when he was pardoned.
