Different Kinds of Heat

Your furnace should not only give you plenty of heat, but the right quality of heat.

Some houses would be better without any heat than the kind their furnaces give them.

If you study the Sunshine Furnace you will know what the right kind of heat is and how to get it.

Too Much Doctoring

A medical journal vouches for this story: A distinguished surgeon, while making his rounds through a hospital, was momentarily dazed when a wounded soldier inquired querulously: "Say, doctor, when one doctor doctors another doctor, does the doctor doing the doctoring doctor the other doctor like the doctor wants to be doctored, or does the doctor doing the doctoring doctor the other doctor like the doctor doing the doctoring wants to doctor him?"

Hats Off to Canada Again

Boston Transcript:—On Vimy Ridge, that advanced point to which the Canadians carried the standard, they still stand like a rock. If the United States had answered the great call with the promptness and with the proportion of its man-power with which Canada responded, the German armies would have been hurled back beyond the Rhine long ago. Yes—we take off our hats to Canada.

When asthma comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

DISTRICT AND GENERAL

Miss Mary Leitch of Cowal has been engaged to teach the school at Campbellton.

There was a light fall of snow and several degrees of frost at Edmonton last week.

Mrs. Christina Campbell of Aldborough was discovered dead at her home by neighbors.

Detroit claims to have gained heretofore in passing one or more parts of the Upper School examinations for entrance to Faculty of Education at Queen's or Toronto University.—Marguerita Gardner, part II.; Catharine McBean, part II.

The following have secured their Middle School entrance into the Normal School by working three months on the farms—Jessie McAlpine, Elizabeth Leitch and Ernest McKellar.

While rigid selection from year to year is necessary for most kinds of vegetables when grown for seed, and while to keep them pure the different varieties have to be grown some distance apart, yet most of the seed grown in the home garden is likely to give almost or quite as satisfactory results or even better than that which is bought and as some seed may be difficult to obtain next year it is recommended for each person who has a garden to let a few plants or specimens ripen, from which seed can be saved.

It is better to mark the best plants and save the seed from them rather than to save the seed which remain after the plants have been cropped.

The following minimum number of feet, plants or specimens to be saved is suggested as being sufficient to supply enough seed for the home garden: Beans, 5 ft.; corn, 1 ear; cucumbers, 1; lettuce, 3 plants; melons, 1; peas, 5 ft.; radishes, 3 plants; spinach, 3 plants; squash, 1; tomatoes, 3.

Either reserve a few feet of the rows of beans or, better still, mark a few productive plants free from disease.

The seed stalks of lettuce are thrown away after the heads are full grown. The seed ripens rather unevenly, and in order not to lose any of it, each head should be picked over as it shows white, if being necessary to go over the plants every few days.

The plants can, however, be pulled and hung up to dry.

If some radishes are left unpicked after being ready for use, they will soon throw up stalks and good seed will develop. For best results the plants should be at least six inches apart.

Spinach, if thinned to six inches, will produce an abundance of seed.

In saving home-grown seeds it is important to dry them as soon as possible after they are ripe, then clean them and keep them dry until needed the following spring.

Peas and beans will soon be spoiled for seed if they do not dry rapidly in the pod after being harvested.

As corn sometimes has to be pulled before it is quite hard, it is desirable to see that there is a good circulation of air around each ear. A good plan is to stack the ears and then stick each one separately on nails driven into a board and far enough apart so that the ears will not touch.

The seed of tomatoes for home use should be saved from the plant bearing the largest crop of early and best fruit. Where a quantity of seed is saved, the tomatoes may be cut in half and the pulp pressed out into some vessel, adding about one-third its volume of water. Put in a dark room until fermentation sets in, which will be in about two days, when the seed will separate readily from the pulp. Wash out and dry where the sun does not shine on it.

Following are the quantities of seed which one might expect: Beans, 1 or more oz. per plant; corn, 300 to 600 kernels per ear; cucumbers, 1/2 to 3/4 oz. per specimen; lettuce, 1/4 oz. per plant; muskmelon, 1 to 1 1/2 oz. per specimen; onion, 1/2 oz. per plant; pea, 1 oz. per 3 ft. of row; pepper, 1-16 to 1/8 oz. per specimen; radish, 1 oz. per plant; spinach, 1 1/2 oz. per plant; squash, small seed, 2 1/2 oz. each; squash, large seed, 3 oz. each; tomato, 50 to 300 each; watermelon, 2 to 3 oz. each.

TRANSCRIPT HOLIDAY

There will be no issue of The Transcript next week, when we take our annual holiday. August 15 will be the date of the next issue.

Glencoe High School

The following candidates from the Glencoe High School were successful in passing one or more parts of the Upper School examinations for entrance to Faculty of Education at Queen's or Toronto University.—Marguerita Gardner, part II.; Catharine McBean, part II.

The following have secured their Middle School entrance into the Normal School by working three months on the farms—Jessie McAlpine, Elizabeth Leitch and Ernest McKellar.

Your Own Seed Grower

While rigid selection from year to year is necessary for most kinds of vegetables when grown for seed, and while to keep them pure the different varieties have to be grown some distance apart, yet most of the seed grown in the home garden is likely to give almost or quite as satisfactory results or even better than that which is bought and as some seed may be difficult to obtain next year it is recommended for each person who has a garden to let a few plants or specimens ripen, from which seed can be saved.

It is better to mark the best plants and save the seed from them rather than to save the seed which remain after the plants have been cropped.

The following minimum number of feet, plants or specimens to be saved is suggested as being sufficient to supply enough seed for the home garden: Beans, 5 ft.; corn, 1 ear; cucumbers, 1; lettuce, 3 plants; melons, 1; peas, 5 ft.; radishes, 3 plants; spinach, 3 plants; squash, 1; tomatoes, 3.

Either reserve a few feet of the rows of beans or, better still, mark a few productive plants free from disease.

The seed stalks of lettuce are thrown away after the heads are full grown. The seed ripens rather unevenly, and in order not to lose any of it, each head should be picked over as it shows white, if being necessary to go over the plants every few days.

Father Fought in Crimea

Pte. Edward A. Skill, a Glencoe old boy, who went overseas with the band of the 95th Battalion, has returned to Toronto after 19 months' service and is, under treatment for neuritis in Spadina Ave. Hospital.

Pte. Skill's father, the late Peter Skill, who died in 1900, enlisted in the 33rd Infantry Regiment in Ireland in 1854 and served in the Crimea until peace was proclaimed, when he came with the regiment to London, Canada. He carried two medals and two good conduct badges.

His widow, Mrs. F. M. Skill, is now living in St. Thomas.

Father and Son Hurt

An accident which might have proved fatal occurred on Monday afternoon when Wm. H. Reycraft and his son Clifford of Mosa township were driving a team of horses attached to a gravel wagon over the Grand Trunk railway on Main street. The horses became frightened and ran away, throwing Mr. Reycraft and his son off the wagon. Both were taken to Dr. Walker's office, where the wounds were dressed. Mr. Reycraft was badly lacerated about the head while the son was badly bruised and shaken up. They were removed to their home on Monday evening, where Miss Margaret Watterworth of Glencoe is attending them. Both are doing well.

Winner of Medal

Among forty nurses of Vancouver General Hospital to receive graduation diplomas at the convocation exercises held in the University of British Columbia auditorium recently was Miss Marion Otton, formerly of Glencoe, who was the leading prize winner, taking the gold medal for general proficiency.

Miss Otton is a daughter of Mr. and Mrs. A. W. Otton, now residing in British Columbia, and is a niece of Mr. and Mrs. Robert Clananahan, Glencoe.

Oddfellows Decorate Graves

Glencoe Oddfellows on Sunday afternoon decorated the graves of their deceased brethren in Oakland cemetery. The ceremony consisted in placing a spray of flowers and a Union Jack on each grave, while the secretary of the lodge read the name and date of initiation into the order of the deceased and Rev. D. Robertson, pastor of Burns' Presbyterian Church, Mosa, offered a prayer. Those whose graves were decorated were:

Thomas Harris	Mar. 11, 1874
George Harris	Mar. 11, 1874
Neil McLarty	April 15, 1874
James Stevenson	May 27, 1874
Arch. McEachren	Oct. 20, 1876
James Harris	Mar. 7, 1877
John McNeil	Oct. 14, 1877
R. R. McKellar	Dec. 1, 1880
Peter J. McAlpine	Feb. 1, 1882
George Parryott	May 31, 1882
J. L. Luckham	April 4, 1898
G. A. Dewar	Nov. 7, 1899
M. C. Campbell	Jan. 27, 1902

Advertising Firm Honored

J. E. McConnell, of McConnell & Ferguson, advertising agents, London, Ont., was elected president of the Canadian Advertising Agents' Association at their annual meeting in Toronto. Both members of this firm are advertising experts. The standard set by them is a high one and such as to give the President Darcy of the Advertising Club of the World, during his trip through Canada, the statement that "the advertising done by Messrs. McConnell & Ferguson of London was the highest type of advertising in Canada."

St. John's Church

The rectory will be absent during the month of August. His headquarters address will be 144 Gladstone avenue, Windsor.

During his absence services will be held as follows: 1st and 4th Sundays, 8 p. m.; preacher, Rev. Mr. Murphy. 2nd and 3rd Sundays, 11 a. m.; preacher, Rev. Mr. Du Plan. Sunday school as usual.

Wanted for Theft

D. C. McKenzie, police magistrate, issued a warrant on Thursday night for the arrest of Mrs. Horton of Wardsville, who is charged with entering the house of Mrs. Constant in Mosa township during the latter's absence from home on Sunday, July 21, and taking therefrom dresses and other goods to the value of about \$35. Constable Weaver, having executed a search warrant, found the missing goods in a trunk belonging to the accused in her father's house in Wardsville. Mrs. Horton has not since been located.

Red Cross

The ladies of the Red Cross are not making a canvass for cakes for the garden party on Friday night, but cakes sent by anybody will be thankfully received.

Retired Farmers' Opportunity

Many men living in town today have spent most of their busy lives on the farms. They have earned their retirement. But the need for saving the 1918 harvest is very great. Retired farmers have a splendid opportunity to help out in the present crisis and many have volunteered to work on neighboring farms for the rush period. Every one that can do so is needed, for experienced men are at a premium. Their knowledge of how to do things would help make inexperienced men and boys efficient.
