Give us a chance to let our hair down, too.

We're not as square as you think! Behind our seemingly straight-laced image, there throb some pretty way-out projects. And people.

Alcan is involved in many unexpected areas. Because we do a lot more than just produce aluminum. We and others try to find new uses for it.

For example, one new use that came to our attention was developed in Belgium and refined by a Montreal artist. Through a process called Aluchromie, he "paints" on specially prepared aluminum panels. The resulting work of art has

a water-colour effect with unusual depth and perspective, and endless applications in art and architecture.

And that's just one of the exciting new developments in aluminum.

Alcan researchers and scientists are continually searching for better ways to do things with aluminum. And it's not always easy. Often they have to struggle for years to find ways of making their ideas come to life.

So you see, they aren't the only ones who have to cope with hairy problems.
