Airplane Models Carved At B.C.I. Vocational School Presented to ITS

A considerable part of the wood-working program in the Junior classes of the Collegiate and Vocational school during the school year 1943-44 involved the making of model airplanes to be used in the course in Aircraft Recognition given at No. 5 I. T. S. Mr. George Bear, instructor in woodworking, spent much time in preparing plans for these models which were all built to scale. On Wednesday these models were presented by Mr. Bear to Fl. Lt. Percy McGuire and Sgt. Rhoda who assured Mr. Bear that the splendid models made by the boys were much appreciated and would be very valuable as instructional material. The model planes were painted at the Bristol Aircraft Company plant.

AIR CADET SQUADRON STARTS CAMP JULY 6

Approximately 35 members of the Belleville Air Cadet Squadron will spend 10 days camp at Mountain View Bombing and Gunnery School starting on July 6th, it has been announced by officers of the local squadron. During the ten day period they will familiarize themselves to some extent with station equipment and see for themselves the operating schedule of one of Canada's foremost bombing and gunnery schools. During the ten day period they will be under the direction of one of their local officers, Air Cadet Pilot Officer Jack Wilson.
