THE INVESTMENTS

Have been made at a most favourable rate of interest; and no loss from them has been incurred. THE ROYAL INSURANCE COMPANY has, in addition to the Investments on the Life Account, large resources of capital paid up and reserves on other branches of business, all of which are liable for claims on the Life Accounts, and could, within a short time, realise that sum far more than doubled, if it were required to do so.

The MORTALITY among Declined Lives and the advantages to be expected from a judicious selection of Lives for Assurance.

A Company exercising such care will be selected by the best Lives. Healthy Assurers will be aware that being admitted among a more selected class, all the advantages to be derived from Assurance will be secured to them in the ENHANCED BOXES, which the system of watchfulness will create.

The Directors invite attention to a few of the advantages the ROYAL offers to its Life Assurers.

1st.—The guarantee of an ample capital and exemption of the Assured from Liability of Partnership.

2nd.—Moderate Premiums.

3rd.—Small Charge for Management.

4th.—Prompt Settlement.

5th.—Large participation of Profits by the Assured, amounting to two-thirds of their nett amount every five years to Policies then two entire years in existence.

The rapid progress and position of this Branch will be shown by the following statement of the new Life business effected for the—
