

Remember This Important Fact

¶ The makers of Cox's Gelatine believe that "Honesty is the Best Policy." It has paid them handsomely to conduct their business along that line—at its inception the founders laid down stringent rules for its safe progress. And they have never deviated from these rules.

COX'S Gelatine

¶ No chemicals of any sort or nature enter into the manufacture of this world famous product. It is as pure as it is possible for a Gelatine to be. And whether you buy it in the shredded or powdered form it is always the same. Remember "Cox's" for its absolute purity.
