# A COLUMN ON MINES

Canadiaa Gold Fields Syndicate Elects Officers.

Property on the Reservation-Progress of the Work on the Iron Colt and Other Notes of It t rest.

ited, was held Thursday at Montreal, when the following board of directors were elected: Messrs. George Sumner, E. P. Heaton and J. W. Graham of Montreal; T. G. Blackstock and W. H. Brouse of Toronto; Thomas Wilson of Clarence, Ont.; Alexander Pridham of

ing one of the ablest business men in Montreal. Mr. T. G. Blackstock of Toronto, is the well-known mining magnate, who is associated with his father-in-law, Mr. George Gooderham, in controlling the War Eagle and Centre Star mines at Rossland. Mr. Brouse is also a sen in law of Mr. George Gooderham, and doubtless represents that gentleman's interests, as Mr. Gooderham is the largest individual stockholder in the Canadian Gold Fields syndicate, limited. Mr. R. K. Hope, registrar of the city of Hamilton, Mr. E. P. Heaton, general manager of the Guar-dian Assurance company, and Messrs. Thomas Wilson, Pridham, Graham and Drewry are all heavy stockholders in the company and have been members of the boards of directors for some time. The new board is an exceptionally strong one, and it is safe to say that the affairs of the company will continue to be wisely and economically managed.

### ORE HAULAGE.

What the Two Railroads Make a Monta From Hauling Ore to the Stalters.

During the month of January the Spa-kane Falls & Northern branch of the Great Northern railway carried about \$,320 tons of ore to the Northport smelter, some 17 miles away. The rate charged is 75 cents per ton, so the railroad received for this service in round figures, \$7,000 for the

The Ornadian sme'ter at Trail received about 15,100 tons during the month, and for hauling this load some 13 miles, the Columbia & Western branch of the Canadian Pacific railway received 50 cents per ton, or \$7,500 for the month of January. Neither of the railways can complain of the returns received for hauling ore only last month. Fourteen thousand

redited with 50 tons, but the smelter weights given show 83,660 pounds or 22 tons. The Evening Star was credited with 25 tons. The Evening Star was credited with 25 tons. The Evening Star was credited or 30 tons. The necessary changes in the total condition of the property up to December 31st, 1892. Since this date development has been carried or 30 tons. The necessary changes in the total condition of the property up to December 31st, 1892. Since this date development has been carried on in the east and west drifts from the public how rich the ore of the public how rich the ore of the Rossland camp in the condition of the property up to December 31st, 1892. Since this date development has been carried by to the public how rich the ore of the Rossland camp in the condition of the property up to December 31st, 1892. Since the more complex apparatus of the church in genmine, its development and possibilities.

Mr. de St. Dalmas will take the ore exposed in the Miner window with him to London, England, to demonstrate clear by the church in growth in the condition of the property up to December 31st, 1892. Since this development has been carried on in the church in driven close to the Evenmine, its development and possibilities.

Mr. de St. Dalmas will take the ore exposed in the Miner window with him to London, England, to demonstrate clear the church in driven close to the church in driven close to the church in driven close to the chur tabulated form will be made on Sunday next.

# IS AN ABLE ENGNIEER.

W. H. Jeffery Enters the Services of the C. G. F. Syndicate

Mr. W. H. Jeffery, M. E., arrived last thursday from the Slocan and has entered the permanent employ of the Canadian Gold Fields syndicate, limited, as their mining engineer. Mr. Jeffery stands high his profession and the in his profession and the company are to be congratulated on securing his services. Mr. Jeffery has taken up his quarters at the Sunset No. 2 mine, and, when seen last evening by a Miner representative, stated that he expected to put that property on a regular shipping basis in the very near future.

# Smelling Rates Reduced.

When the Le Roi smelter at Northpor' was completed about two years since a contract was entered into between the smelter company and the Le Roi Mining company under which all the ore produced by the mine was to be reduced at a cost of \$3 per ton. The continued at a cost \$3 per ton. The contract was to run for five years. Since then the cost of the Northport smelter several months per ton on Rossland ore was put into ed. Superintentent Joseph Hamer, is in charge of the operations of the superintentent of the pleased with agement thought that the rate of \$8 per ton was too high and as the Le Roi mine

# A Find of Rich Ore.

About a year since Messrs. P. Burns and Blake Wilson took hold of a claim, on the Colville Indian reservation, which is located 16 miles west of Bossburg and between that place and Cascade City. There was a large surface showing on the property, and since that time considerable work has been done. Among this was a shaft, which has been sunk to a depth of 100 feet. At this depth a large ore shoot 100 feet. At this depth a large ore shoot has been met and assays show that the ore runs from \$60 to \$400 to the ton. The ore is identical with that found in the Re-

this property erects be congratulated, as it seems certain that they have in this property one that should make a valuable

The Le Roi Superintendent.

Mr. W. B. Wilson, superintendent of the Le Roi mine, who met with such a painful accident at the mine in the end HAS VERY STRONG DIRECTORATE of November last, fracturing his act knee cap, has considerably improved during the past fortnight. For the past 24 hours he has been entirely free from pain for the first time since the accident and

easily in consequence.

The superintendent feels greatly the enforced inaction imposed upon him by the accident and he is very anxious to get The annual stockholders meeting of the Canadian Gold Fields syndicate, limited, was held Thursday at Montreal,

development work is being made with a force of 15 men under the superintendence this shaft will be pushed down to a depth of at least 200 feet.

### A Strike in the Strawberry

Mr. A. B. Clabon had advices from Superintendent Trainor to the effect that a ledge of pay ore nine feet wide had been crosscut on the Strawberry, which is located on the north fork of the Kettle river He left yesterday for the purpose of inspecting the find and will be back early next week.

### Supplies for Mining Properties.

A pack train of 10 animals left this city Thursday with supplies for the Evening and Arthur claims on Sheep creek, at a point about 13 14 miles west of this city.

### Changes in the Mines

Foreman W. D. Mason has resigned from the Le Roi mine, and Ike Kenty of the Nickel Plate, has taken his place, Kenty's position being filled by Pooley, formerly of the Josie, and later of the

Kenty's position being mind by severy of the Josie, and later of the Le Roi mine.

The Properties of Some New Aloys.

This was the caption of an address recently delivered by A. E. Tackee, in which development work has been done to pinch of some time, the first, listened to intently, though officially.

The effect of binmuth on copy and the power of the separate metals was regarded to the match english the summed up the power of the separate metals was regarded to the match english the summed up the power of the power ore only last month. Fourteen thousand five hundred dollars per month is a good showing under all the circumstances.

Showing under all the circumstances. Some Corrected Returns.

During the month of January the I. X.

L. sent down two carloads to the smelter at Northport, and was credited with 50 tons. The smelter weights show the snip ment to amount to 95,800 pounds, or 48 tons. The Giant also sent out two carloads during the month, and was also credited with 50 tons. The Ciant also sent out two carloads during the month, and was also credited with 50 tons, but the smelter or coulded the month of the smelter of the could not be forested by any reasoning from analogy. The past masters of metallurgical art, the Japanese, had only reached their skill by generations of intelligent plodding, and often buffled us, with all our science, in the case covery of their methods. He alluded to the application of metallic aluminum as a loads during the month, and was also credited with 50 tons, but the smelter. by a judicious addition of manganess: 110-foot level, and superintendent Mussen tungsten alloy, the solidity of the ngots being insured by adding aluminum nickel. that the past month's work has shown file said that it would be apparent, bearing in mind the number of metals at presen at practical disposal, that an infinite of research is open, and one in which the reward to the worker is great. The amaz-

# TEN FEET OF ORE.

An Important Find Made on the Strawberry Property

Mr. A. B. Clabon returned Saturday Mr. A. B. Clabon returned Saturday ore, the three shipments must be confrom a visit to the Strawberry property, sidered as one lot. The returns are as follows: which is located a few miles from Grand Forks. On the 70-foot level, at a point 26 feet from the shaft, the ledge was encountered. When Mr. Clabon was there, on Thursday and Friday, this had been crosscut for a distance of 10 feet, and there was no sign of the other wall. The ore is pryhotite, and seems to be rich. Mr Fred M. Wells, M. E., was with Mr. Clabon, carefully sampled the ore body, and the samples have been brought to this city, and will be assayed tomorrow, when the value of the ore body will be announce ton on Rossland ore was put into ed. Superintendent Joseph Trainer, who Strawberry, is greatly pleased with the

that it cannot be taken to represent the special stored in bins for shipment. The force of men now employed in sinking is making good headway, and a considerable amount of solid ore is being hoisted. The point of view, Superintendent Mussen says: "We are at present working upper

# Falliers Re-elected

most disadvantageous circumstances. Not only does the lack of development force us to use expensive methods. The Salmo Consolidated Gold Mining and ful. Deeds, not words. Deeds alone have a marketable value in the salmo the status should be theoretical by truthful. It must be practically use ful. Deeds, not words. Deeds alone have

as is usual in custom smelters, only \$19 has done only 150 feet of work and is in an ounce for gold, and only 25 per cent of debt to the Bank of Montreal to the extent of \$2,700. It would be better for all direct charge, which, in the case of the first three shipments, amounted to \$3.13 parties to know if this is true or false, for the News Advertiser of Vancouver, is and perhaps you can give an authoritative in the city. This is Mr. Francis' first visit per ton, and in the case of the fourth shipment to \$2.28.

A SHAREHOLDER.

A SHAREHOLDER.

In order to get over these difficulties we will have to treat the whole bulk of the vein matter, as mined, by some suit-able process on the ground. With a view to deciding upon a suitable process, we have just sent a lot of 1,000 pounds of our couver. He will report to us in the course of a month or six weeks as to the adapt-ability of the ore to the cyanide process, Another mining deal of considerable importance to West Kootenay has just why it should not, the value of the combeen completed by Mr. J. C. Drewry, the pany's property will be greatly enhanced.

Been Exposed.

Superintendent H. Hansen and Prof. Grenville, Quebec; R. K. Hope of Hamil- On the Iron Colt good progress with the silver-lead, the ore carrying a consider- Gold Mining company, went out Friday development work is being made with a subsequent meeting of the board, At a subsequent meeting of the board, Mr. George Sumner was elected president, and Mr. J. C. Drewry re-elected managing director for the ensuing year.

Mr. Sumner, the new president, is a member of the firm of Hodgson, Sumner & Co., one of the leading wholesale houses of Canada, and has the reputation of being one of the ablest business men in Mr. Mr. C. Drewry of Rossland.

At a subsequent meeting of the board, At a subsequent meeting of the board, Mr. Alex. Sharp. The upraise has been made for a distance of 70 feet in ore of a good quality. Work on this upraise has been suspended and a station is being director for the ensuing year.

Mr. Sumner, the new president, is a member of the firm of Hodgson, Sumner & Co., one of the leading wholesale houses of Canada, and has the reputation of being one of the ablest business men in Mr. St. Delmas thought that the development work is being and evith a development work is being and with a force of 15 men under the superintendence of 15 men under properties. It has already been proved for a distance of over 2,000 feet by a series of open cuts, test pits and one shaft, which has been sunk to a depth of 30 feet. In each and all of these workings good concentrating ore has been discovered, with pay streaks of high grade grey copper ore which can be sorted and shipped. Two tons of this ore have already been packed out to Crawford bay and shipped to the Hall Mines smelter at Nelson, netting Hall Mines smelter at Nelson, netting width is met, a specimen of which is disover \$200 per ton. The best showing of clean ore is in the bottom of the 30-foot clean or in the 30-foot cle shaft. A tunnel has also been driven on yet been assayed. After passing through a parallel ledge for a distance of nearly the quartz an ore body is met, containing 300 feet, opening up a fine body of concepter pyrites, galena and zinc. This body centrating ore.

The Commonwealth group has been quietly developed for the past three years were taken by Mr. de St. Delmas and by the recent owners, Messrs. T. G. some pieces of ore brought to town, and Proctor of Nelson, W. S. Drewry of New are on view in the window of the Miner and L. Shelly state of the state of

Mr. Drewry says that it is any inter-tion to immediately sink the shaft on the main ledge another 100 feet to prove the took samples for assay, and expresses the belief that this ore will be of sufficient

# Plant for the McCrae Mine

The Jenckes Machine company has sold that in the east drift much recher of and to the Jenckes machine company has son that we should indeed be ever read been encountered than in any of the other to the McCrae Mines of Deadwood camp, to give an answer as to the reasonable er workings of the property, while in the Boundary Creek country, a plant. 11118 ness of our faith. Faith inadequately consists of a 35-horse power boiler, a 20ing variation of properties caused by a slight change in alloy composition has long been known, and as the number of metals available for alloying steel are large the possible combinations are practically infinite.

Same values as that averaged from the shork of allowing steels as that averaged from the shork of allowing steels as that averaged from the shork of the short of the horse power hoist and two 3 1-4-inch Rand considered almost worthless, and was plained away.

abandoned by two or three different locators. Recently, however, some systeed of first and second class ore, sorted from the matter taken out in development, with some additions from side stopes from the shaft. In calculating the value of this one than the shaft of the Mother Lode, a nearby the three shipments must be son.
