Paris, May 15.—12.30 p.m.—An attack was made by the Germans last night on an extended front. Today's official statement says it was repulsed by the French fire. The Germans were able to get a footing only in an advanced trench.

London, May 15.—A heavy attack was launched by the Germans today on British positions in the Bullecourt region on the Arras front. Today's official statement says the Germans were repulsed in Bullecourt, but that the British advanced posts in the northwestern portion of the village were forced back a short uance of the war and de

this defense is you remain inactive in your trenches. Frequently only an offensive can repel or check a hostile offensive, frequently those who await in an attack perish. Soldiers and comrades having sworn to defend Russian liberty, do not renounce the offensive. Fight and struggle for this liberty and while fighting and struggling fear the enemy's traps. The fraternizing which is taking place at present at the front can easily become a trap. Do not forget that revolutionary troops have only the right to fraternize with troops who are also ready to die for peace and liberty.

"The German army is not a revolutionary army wif it is still blindly following William and Charles, Emperors and capitalists. You are fraternizing openly not with enemy soldiers, but with officers of the enemy's general staff, disguised as common soldiers. Peace will not be obtained by separate treaties or by the fraternizing of isolated regiments and battalions. This will only lead to the loss of the Russian revolution, the safety of which does not lie in a separate peace or armistice.

Strike of Engineers in old REFUSE Land May Have Permanent Effect Upon Troops; The Demand for Tanks is Very Great

Courier Leased Wire.

London, May 15.—Dr. Christopher Addison, minister of munitions, in the course of a statement dealing with the engineers strike,

Gravest Feature.

"The people say the army in France has heaps of shells. But that isn't the point. I am glad to say they have plenty of shells at the front, but these strikes are particularly affecting such things as big guns, tanks and airplane motors. The supply of all these has been gravely affected. A continuation of the offensive in ly affected. A continuation of the offensive in June depends upon the things which are being in his statement to The Social D finished in the shops. We have lost three weeks over the supply of important war munitions at Barrow. That will be felt later, but what is being held up now is that which will affect the soldiers in June and July, as they will not, unless of the Dutch and Scandinavian del rapid work is resumed, be able to go forward sates who are sathering with that protection from the tanks that they should have. This is the gravest feature of the get as much light as whole thing."

Tanks Popular.

Dr. Addison dwells further on the impotrance of the tanks, saying they are very popular with the army and that the authorities have considerable difficulty in supplying them and espesitive stockholm, via London cently ordered 2,000 tons of steel set apart week-ly for the building of them.

Dr. Addison and Frederick G. Kellaway, the ministers representative in the House of Commons, said Monday night that the situation was no more serious than at the end of last week and that there was ground for hoping the worst was passed. But reports have been received from several centres showing that the strike continues there, although it has been ended elsewhere and is still causing anxiety.

Many Idle.

Statements published in the newspapers to-day indicate that the abstention of the strikers from work is making a number of other work-ers in the Sheffield district idle.
