

Recipes

Boil until tender four pounds chicken. When cold cut into small pieces as for salad. Make a dressing of one pint sweet milk, one-half cup sweet cream, one-third cup butter, juice of one lemon, salt and pepper to point of knife, scant one-half cup flour mixed smoothly in enough cold milk to be of the consistency of cream, one can mushrooms boiled until tender in the juice. Mix milk, cream, butter, salt and pepper and cook in double boiler. When boiling stir in gradually the flour which has been wet with the milk until it thickens. Strain the juice of the lemon and stir in last. Stir in the mushrooms and chicken, put in a baking dish and cover with finely rolled cracker crumbs. Bake about twenty minutes. Be sure to put in the lemon after the sauce is cooked or it will curdle.

Over half a cupful of corn meal, pour a pint of hot milk, and stir well, bringing to a boil together; add a saltspoonful of salt and stir in two teaspoonfuls of butter; let stand to cool to lukewarm, then add four eggs well beaten, but not separated; turn into a buttered baking pan and cook half an hour in a quick oven. Bat with maple syrup.

Two quarts of the yellow flowers, four quarts of water, grated rind of two oranges, grated rind of one lemon. Boil (lukewarm), add (and thoroughly stir) four pounds of sugar. When cooled, through three-quarters of a tea-cup of yeast. Then slice the oranges into it from which the thick rind and seeds have been removed, let it stand in an open vessel three or four days; then strain, bottle and cork tightly.

To three pints of soup stock add one quart of fresh or stewed tomatoes and a cupful of rice, and boil for one hour. When the rice is thoroughly done, add a lump of butter the size of an egg; season with pepper and salt and a table-spoonful of sugar.

Over eight quarts of elderberries pour four quarts of boiling water and allow them to stand for 12 hours, stirring occasionally. At the end of that time strain, pressing out all the juice. To this add four pounds of sugar (previously powdered) one ounce of powdered cinnamon and three pounds of sugar. (These proportions are proper for four quarts of juice. Boil for five minutes and set away to ferment in a stone crock. Cover with a cloth. When fermentation ceases pour off carefully, bottle and seal.

Take 20 pounds of grapes, free from stems, wash them thoroughly, pour six quarts of water over them, and let them stand for three days, stirring them twice each day. Put them into a bag and let them hang all night and drain. Add eight pounds of sugar to the juice; set it in a cask; bottle before the winds of March. Eighty pounds of grapes will make ten gallons of wine.

Minard's Liniment Lumbarman's Friend.

THE LADIES' AID. The old church bell had long been cracked. Its call was but a groan. It seemed to sound a funeral knell when the bell was rung. "We need a bell," the brethren said, "but the taxes that we must pay—how can we have money we can spare—don't ask the Ladies' Aid." The shingles on the roof were old; the rain came down in rain. The women slowly shook their heads and spoke of "monthly bills." The chairman smiled and arose, and said, "I am afraid that we shall have to lay the case before the Ladies' Aid." The carpet had been patched and patched. Till quite beyond repair. And through the ages and on the steps it is too bad," the brethren said. "An effort must be made. To raise an interest on the part of members of the Aid."

Sweden, according to a Paris newspaper, supplied half the pulp paper of last year's production and in 19 years we are told, Swedish forests will have disappeared. During the last election France required 30,000 kilograms of paper for bills alone. But, says our contemporary, money will have to be found to discover a substitute for wood. But how is it to be done? Another suggestion is that of getting paper from old tar yarn or rope. Another suggestion is that of making paper from the husks of malted barley, the furze bush and the sugar-cane. In the French Congo and Senegal, our contemporary says, there is an abundance of papyrus which lends itself to papermaking.

There still stands in the Paramus Valley, twenty miles from New York, in Bergen county, N. J., well preserved and kept, the mansion in which Aaron Burr courted the beautiful Estelle Provost, widow of an officer of the British army, herself an ardent royalist during the Revolution. In the days of this courtship Burr's command in the American army was stationed at White Plains, N. Y., and he was accustomed to ride from there to Paramus on horseback to the residence of his lady love, marking the journey to and fro between sunset and dawn. The mansion, known as "The Hermitage," is of rough stone with a Gothic porch. A sure sign of its antique character is the extensive grounds.

Not far away is the old church, likewise as it was in those perilous and romantic days, when Burr and the fair widow, his persistent and ardent wooing having won her, were married. Adjoining and belonging to this church is an ancient burying ground, many of those names grown grave-stones have quaint and grotesque inscriptions. One offers this cheerful invitation: Dear Brother and Sister, Come visit our Tomb; Prepare for Grain Besh; For this is your Dime. It's all right to get no steam, provided you don't get yourself in hot water.

Sick Headache Cured Quickly

Here is a Remedy That Stops Headache and Bilious Turas and Keeps You Strong and Healthy.

When the stomach needs cleansing, the bowels increased activity, the liver additional power, don't use mercurial pills, try Dr. Hamilton's Vegetable in composition, extremely mild, yet sure to flush out all impurities and wastes, no remedy is so well adapted for family use. Positively a cure for biliousness and sick headache, unfeeling in constipation and bowel trouble, exceptionally good for indigestion, no medicine is so universally needed in every home as Dr. Hamilton's Pills. Good for the young, the old, the sick and the well ones, the benefits of Dr. Hamilton's Pills are manifold. Sold everywhere in 25c boxes.

ILLEGAL VEGETABLES. In France at the present time it is illegal to raise certain vegetables, such as celery, lettuce and other things which grow near the ground, upon sewage disposal lands, because of the supposed danger of poisonous germs being carried and introduced into the human system. Some experiments have been performed recently which have demonstrated the needlessness of this alarm. Microbes do not enter the body of the vegetable under any circumstances, although it is possible for them to be entrained along the stem and leaves, but this location does not seem to be very favorable to their lives. No evidences of typhoid or cholera were found, although a special search was made for such indications. Generally speaking, only the hardest germs, such as tetanus, were found, and there is no danger whatever in taking these into the system through the stomach.

SCOTCH SABBATARIANISM. (From the London Chronicle). Looking out of the window used to be an indictable offence on Sabbath. In 1709 the Kirk Session of Edinburgh, "taking into consideration that the Lord's Day is profaned by people standing in the streets, vaguing in the fields and gardens, as also by idly gazing out of the windows, it is ordered that each session take it upon them to cause the streets on Sabbath, and to visit each respected house in each parish by elders and deacons with beadle and officers, and after sermon, when the day is long, pass through the streets, and to reprove such as transgress and inform on such as do so refrain."

Literary Copyright in France. A curious question of literary copyright has been raised in France in an action brought against Mr. Antole France, the academician, from whom the publisher, Mr. Lemerre, acquired in 1882 rights on a two volume history of France for the sum of £120. The manuscript lay for twenty-nine years in the publisher's desk, and it was only in November last that M. Lemerre decided to publish it. He sent the proofs to the author, who, however, refused to correct or return them, contending that the publishing rights have lapsed, the works representing views he held three decades ago. This interesting point will be argued by the leading lights of the Paris bar. London Evening Standard.

Substitutes suggested. Sweden, according to a Paris newspaper, supplied half the pulp paper of last year's production and in 19 years we are told, Swedish forests will have disappeared. During the last election France required 30,000 kilograms of paper for bills alone. But, says our contemporary, money will have to be found to discover a substitute for wood. But how is it to be done? Another suggestion is that of getting paper from old tar yarn or rope. Another suggestion is that of making paper from the husks of malted barley, the furze bush and the sugar-cane. In the French Congo and Senegal, our contemporary says, there is an abundance of papyrus which lends itself to papermaking.

Minard's Liniment used by Physicians. THE REAL REASON. Adam sat down. "I am the greatest man in the world," he said to himself; "the wisest sage, the highest financier and captain of industry; I hold all the records from the hurled yard dash to the Marathon; my wife is the best-dressed woman in the world; I am the best dressed man; Gadsdons, I am too good to be true; I will eat of the fruit of the tree of life." He died.

CHEAP PERFUMES.

Some of the Sources From Which Musk is Obtained. Most women who indulge freely in the use of cheap perfumes do not know of what they are compounded. The principal ingredients of low priced perfumes is musk, animal musk, musk obtained from several creatures. The muskrat is probably the best known of these, and a few decades ago the wives and sweethearts of men who set traps around ditches and ponds in the countryside carried proudly the bags of musk obtained from this source. As an article of commerce the musk supplied by several varieties of civet cats is probably the best known to-day. The odor is strong and sweet. The strength is the particularly noticeable feature and is the reason why it is the foundation of the perfumes. In the small mammal houses at the Zoological Gardens are two sizes of civets, and any one with an investigating turn of mind may stand near the cages and catch the musky odor. The musk is used in the cheap perfumes, as an ingredient, in order to give a most lasting odor to an ounce of perfume, but the musk itself is not cheap and it is one of the articles of the attendant of the mammal house to collect it. It is then sold through regular channels and is one of the sources of revenue to the zoo, although a small one.

AN INVALUABLE MEDICINE.

Mrs. W. Arnold, Edmonton, Alta., writes: "Kindly send me a box of Baby's Own Tablets. They have been invaluable to me, and I really do not know how I ever would have got along without them. Baby was poorly; his digestion was bad, and he was constipated. I gave him the Tablets and they made a fine healthy boy of him. Now, whenever he is cross or troubled with constipation, I always give him the Tablets and they relieve him right away. I tried a lot of other medicine, but nothing seemed to do him any good. I got the Tablets. I would not be without them." The testimony of Mrs. Arnold is that of thousands of other mothers. Everyone who ever uses Baby's Own Tablets knows the words of praise for them. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SCOTCH SABBATARIANISM. (From the London Chronicle). Looking out of the window used to be an indictable offence on Sabbath. In 1709 the Kirk Session of Edinburgh, "taking into consideration that the Lord's Day is profaned by people standing in the streets, vaguing in the fields and gardens, as also by idly gazing out of the windows, it is ordered that each session take it upon them to cause the streets on Sabbath, and to visit each respected house in each parish by elders and deacons with beadle and officers, and after sermon, when the day is long, pass through the streets, and to reprove such as transgress and inform on such as do so refrain."

AN INVITATION TO CONSUMPTION. Everywhere you go the germ of tuberculosis is a menace. An irritable throat is the field in which it develops quickest. Catarrh is loathsome, but takes a rest, catarrh is awful to contemplate. Every form of catarrh is quickly subdued by "Catarthozone," and that is why it is so universally used for throat, bronchial, lung and chest troubles. You simply inhale its soothing vapors. Breathe in its healing essence, and you are cured, relieved and cured. No possibility of disappointment with Catarthozone. Try it for Catarrh, Bronchitis, Irritable Throat and Lung Weakness; sold everywhere in 25, 50c and \$1.00 sizes.

BAKING FOR AN ARMY. No feature of the United States manoeuvre camp at San Antonio has attracted more attention than the division bakery. The bakery can turn out 20,000 two pound loaves daily, and is at present delivering about half that quantity, and it is good bread. This is the first time that the bakery has been called upon to feed a division of regulars, and it is performing the task without half trying. Capt. L. R. Holbrook, of the Fifth Cavalry, and Commissary Sergeant Pat Dunne invented the bakery and patented it, and then let the war department have the use of it for nothing. Ovens and accessories are designed to fit into one wagon without exceeding the 6,000 pound limit. The ovens are built of sheet iron and asbestos. Certain parts of the ovens are collapsible, and, with other accessories, may be packed within the actual baking chambers.—Bakers' Weekly.

TRY MURINE EYE REMEDY. For Red, Watery, Watery Eyes and GRANULATED EYELIDS. Murine Doesn't Smart—Soothes Eye Pain. Murine Solves Eye Trouble, Lined, Etc. \$1.00. EYE BOOKS AND ADVICE FREE BY MAIL. Murine Eye Remedy Co., Chicago.

COMMERCE. I feel my days and then get paid in thought; Ships come from far deep down with precious freight; Exports come from heights in mighty flow; How sweet the welcome of the radiant Q. landing place of life to living soul. New lines are forged, new ties complete the whole; Goods to life's extending chain, And nimble fingers dissipate the pain. My thought has wings that lift above the clouds; Above the dull, dull, earth wrapped around; Come, spirits, meet me in the air! And so will feast at banquet rich and rare.—H. T. Miller.

NOT BOYCOTTED. (Puck). Label—Have you seen the walking delegate's bride? Carder—Yes. Label—Is the pretty? Carder—No. Then why have you to admit she is in the bride's list.

AN AUTHOR'S HANDWRITING.

The handwriting of literary men is supposed to have improved during recent years, but there are still a few who are fondness of hieroglyphics. At a meeting of the Methodist Conference in Melbourne the other day the Rev. Dr. Fitchett, author of "Deeds that Won the Empire," and other popular works, handed up a resolution. The president looked at it, turned it upside down and round about, and at length gave it up in despair. The clerk was equally unable to decipher it. "I must ask Brother Fitchett," said the president "to be good enough to rewrite his resolution and try to make it readable. At present it resembles a doctor's prescription."—From the London Chronicle.

MILITARY SERVICE FOR WOMEN. Fraulein Pauline Werner, one of the leaders of the feminist movement of Germany, has come forward as an advocate of military service for young women. Men have developed physically and intellectually, she says, by reason of military training and women are entitled to these same advantages. She is not an advocate of battlefields and manoeuvres for her sex, but recommends the domestic side of military service; she would put the women into the army kitchens, clothing stores and laundries. This training, he says, will increase rather than diminish women's marriageability and their usefulness as wives, and at the same time it will be an excellent thing for the comfort and efficiency of the army.—From "Success Magazine."

GYROSCOPES ON AEROPLANES. In France, Monsieur Girardville has been experimenting with model aeroplanes furnished with gyroscopes to insure greater stability. The principle is the same as in the application of gyroscopes to counteract the rolling of ships. In a report to the Paris Academy of Sciences, Monsieur Girardville says that his models, when used as gliders without motors, were free from periodic oscillations, and that they automatically re-established their equilibrium after being disturbed. The difficulty, of course, is that the gyroscope introduces an extra weight to be carried. With six models, Monsieur Girardville used gyroscopes weighing about twelve pounds, and rotating at the rate of 600 turns per minute.

HOPE DEFERRED. (Chicago Tribune). Weary and footsore the Wandering Jew stopped for a moment at a wayside house to get a drink of water. "Is the Maine yet?" he inquired. "No," they answered. With a discouraging sigh he resumed his wanderings.

THE COSTLY MONROE DOCTRINE.

It would be interesting if somebody would calculate how much it has cost Uncle Sam to perform his presumed obligations as guarantor of the Monroe Doctrine. In 1898 he fought a war with Cuba, and acquired various colonial liabilities. That war introduced him into the first circles of world powers, and the effort to travel in such society has kept his household expenses steadily advancing until now they exceed a billion a year. Before the Spanish war, a billion biennially was supposed to be scandalously high. To mention just a few cases, the Monroe theory nearly embroiled us in a war with Great Britain over Venezuela; it made us the financial guarantor of Santa Domingo; and the same of Venezuela; it forced us to drive the dictator Zelaya out of Nicaragua; it has recently involved us in a general complication of Central American affairs; and finally, it has brought about the mobilization of a great American army on the border of Mexico, as a warning to that country that it must be good.—From "Success Magazine."

THE SAME OLD STORY.

On Saturday last nearly every prominent fisherman in Williamsport was fishing for trout in Lyeonck creek. Mies, red-worms, minnows and every kind of lure and bait was used, but no one seemed to be catching any trout—that is, anything above six or seven inches. Finally along came a small boy, Willie Rogally, aged 10 or 12 years, fishing with a crooked stick, a "penny line" and a big hook. He baited it with an angle worm and threw it in just under the new Third street bridge. Hardly had the line got ten into the water before he had landed a big fat trout 16 inches long. The boy never stopped to play the fish—just gave him one throw and flapped him out onto the bank. Around the lad were a dozen men fishing with expensive tackle, and they were nearly sick with envy. Every one cast into the same spot, lines got crossed and a general tangle resulted, but no one caught any fish except the small boy, who later landed a ten-inch fish further down the stream.—From the Philadelphia Record.

Do You Feel the Pinch of Corns?

Loosen up, with twenty-five cents buy yourself about ten dollars' worth of foot comfort, which you get in a bottle of Putnam's Corn and Wart Extractor. Its soothing, healing balms positively cure any corn or wart in twenty-four hours. You'll be more than satisfied by Putnam's Painless Corn and Wart Extractor. Try it.

A DOG'S WONDERING EYES.

Harper's Magazine.) Many times a day Calhoun comes to my armchair, as I sit studying, with no apparent purpose except just to say, "How do you do?" and, never without waiting for the word of permission, he jumps up on my knee, remains a minute, and then goes about his affairs. And many a time I have been half startled by a wondering yet wholly loving expression in the great brown eyes so inquiringly searching mine. Only asking me to throw the prey back, he goes walking with him? Now that expression is quite different. Those eyes look as if they were searching for something that we two might hold in common and so have a silent understanding of each other. Is it something higher than can enter his dog consciousness? I am often moved to respond: "It's you and I, Calhoun. We do know each other in some things, don't we?" Who am I, to be scrutinized so? What is man's office in the sum of things, when such great liquid eyes are gazing up at him from below?

ELECTRIC LIGHT FARMING.

(Kansas City Journal.) Work on one particular farm in Kansas does not have to stop when daylight fails. At the Ringle ranch, in Reno county, electricity is used so freely that when there is a rush the electric current furnishes plenty of light. So completely has electricity been installed on that ranch that motors supersede windmills, and the chickens in the incubators are being heated by electricity. And, of course, the farm machinery is driven by the current. The houses and the barns on the ranch are lighted by it.

IN WRONG.

(Philadelphia Record.) The student of American history was holding forth. "I am a great admirer of Grant," he said. "I am convinced that he was one of the greatest men ever lived." "Now, quit your kidding," replied the baseball fan. "Lieber can put it all over Grant. We got the big end of that trade, all right."
