THE BRITISH EMPIRE

There has never been under single sway so great a part of the earth as is now British. Before the world war the empire was credited with 13,153,712 square miles, distributed in Europe, Asia, Africa, the American continent and Australia. The War added immensely to these possessions. From Germany, Great Britain took over 1,027,620 square miles and other hundreds of thousands of square miles in Palestine, Mesopotamia Arabia, Persia and Egypt, making a total of war requisitions of 2,264,040 square miles. Thus is made up an empire of 15,417,752 square miles; and about 500,000,000 souls. In three continents, North America, Africa and Australia, the empire is the largest landed proprietor; in the fourth, Asia, her 3,073,970 square miles represent nearly twice the extent of Imperial Rome. Of her 500,000,000 souls, about 65,000,000 are self-governing citizens, the rest, subjects. If the reader wants to settle in a wide awake community, all he has to do is to look at the local newspapers. A wide-awake, well supported home newspaper is always associated with good schools, churches, active business, and intelligent people. It never fails. No business man or pioneer in any community makes any better investment than in the support of a home newspaper. The three commodities out of the list of 76 which have not come down in price are newsprint paper, wood pulp and banana

Grand Pre News

Mrs. Louise Bishop returned home on Saturday after spending a few weeks with her sister, Mrs. Jackson, of Berwick. Mr. and Mrs. G. F. S. Townsend left on Monday for Halifax. Mrs. Townsend will likely return after a week's visit in the City. Miss Phyllis Fuller spent Sunday at her home here. A public meeting of the Farmers' Association will be held in Evangeline Hall on Friday evening, March 4th, the subject for the evening being Dairying. Mr. W. J. Bird, B. S. A., Provincial Dairy Inspector, will speak on this work.

THE RETURN OF THE TRAMP

The tramp, who almost disappeared during the war, is returning to the highways of the country and the cheap lodging of the towns. By report, the new tramp although as shiftless and as homeless as ever, is better dressed than the old tramp was, and since he cannot get whiskey, has generally a more respectable air. The increase in number of those who wander in search of work—or to avoid it—raises the old question of how to prevent vagrancy. Some authorities advocate farm-labor colonies. At any rate there should be some place where men with neither means nor inclination to support themselves could be put to productive work. The more vagrancy, the more criminals.

FERTILIZING ORCHARDS, VINEYARDS, AND SMALL FRUITS

In fertilizing vineyards, orchards or small fruits, best results are obtained by applying the fertilizer away from the trees, vines and shrubs, so that it may be immediately helpful to the feeding roots. In trees these active roots are found at a distance from the tree about as far as the tree's branches stretch. Fertilizers should be applied to vines and cane fruits about a foot from the vines and canes. The best time to apply the fertilizer is early in spring when the growth and cultivation start. At this time the added plantfood is most helpful to the crop. The fertilizer should be thoroughly worked into the soil. The quantity and analysis of fertilizer to use is as follows: For grapes, use fertilizer analyzing about 3 to 5% ammonia, 6 to 8% phosphoric acid, and 1 to 4% potash. Good results have been obtained by applying 400 to 800 pounds per acre of such fertilizer. For orchards, fertilizers analyzing 3 to 6% ammonia, 8 to 10% phosphoric acid and 3 to 5% potash applied at the rate of about 10 to 15 pounds per tree have given profitable results. Cane fruits and strawberries as well as orchards benefit greatly from an application early in the season of bonemeal or fertilizer analyzing 3 to 4% ammonia and 8 to 10% phosphoric acid.—Henry G. Bell, B. S. A.

Doctor—Your wife's mind is completely gone. Husband—Well, I'm not surprised. She's been giving me a piece of it every day for about two years.

Supervisor—I just found a new spike on your track; practice economy, Mike. Section Foreman—Good fir ye! Oi've bin having two of me min huntin' fir that spike all morning!

It's not the rooster's early rising that makes him unpopular, but his talking about it.

The population of Montreal is given as 800,000 most of it engaged in the liquor business.

For real "honest to goodness" value you will use Red Rose Tea. The same good tea to-day as for over 26 years.

A Man's Estate

There is but one certain way of having an Estate, and that is through life insurance.

At age 21 "twas all the Estate he had"

At age 30 he wisely increases his insurance.

At age 40 he finds the security of his Estate unquestioned by his Banker.

At age 50 he has no fear of hardship for himself or his family.

At age 60 his "Estate" fully paid for becomes a substantial fund, earning dividends.

The records of the Surrogate Office of New York County, covering a period of five years, showed that the average number of deaths among adults for those years was 27,011. Of these: 23,051 or 85 per cent. left no estate at all. 1,171, or over 4 per cent. left estates valued at \$300 to \$1,000. 1,428, or over 5 per cent. left estates of more than \$1,000, but less than \$5,000. 476, or nearly 2 per cent. left estates of more than \$5,000, but less than \$10,000. 490, or nearly 2 per cent. left estates of more than \$10,000, but less than \$25,000.

The Canada Life Way

This Company will guarantee to provide at your death an Estate which is twenty or thirty times greater than the amount of your annual deposit. And if you live—

Every dollar of regular annual deposit will be returned at the end of twenty years, along with substantial dividends.

Fifty dollars a month will be paid to you while living if you should become totally and permanently disabled before reaching the age of sixty.

Our "Capital Return" Policy

- 1st. Deposits are made yearly. This is what you are saving, and at the end of 20 years the Canada Life guarantees the return of every dollar paid in. 2nd. Your life is insured from the day you make the first deposit,—for \$5,000, or whatever amount you decide. 3rd. Dividends are paid at stated intervals in addition to the return of all deposits at the end of 20 years. 4th. These dividends may be used to increase the amount of your insurance, or be allowed to accumulate at interest for 20 years. 5th. The cash value of Policy and Dividends represents a valuable asset, useful in business, and your "estate" is protected by the insurance. 6th. At the end of Twenty Years you can draw out all you have paid in, along with the accrued dividends—

you can draw a Special Cash Guarantee, together with the Accumulated Dividends, making a substantial sum, and leave the \$5,000 Policy fully paid for and continuing to earn Dividends as long as you live—

this Special Cash Guarantee may be applied to increase the amount of your policy to more than \$7500.
