Now some have always in March.

Now some have always in March. Now some have almost secured what may be regarded as a season's trip. We remember a few years back see ing a number of bankers in Fortune Bay, much later than the present time of the year, looking for their first baiting, and we spent two days aboard a St. Jacques banker, early in round winter have been the weather April, which was then going to make conditions here since the month of her first venture on these grounds December. as an experiment and that was early in April. One firm in town told us that eight of their bankers had already secured 5,000 quintals all told, and that it was estimated that the West Coast bankers had already secured \$300,000 worth of fish. Grand Bank, Fortune, Belleoram, St. Jacthews of cod traps in Port au the bank fishery, are to be especially fellow fishermen, will grant their congratulated on their enterprise. Mr. Isaac Morris has paid a tribute to quite a number of the men of these places, and they deserve well the mead of praise paid to them. What been so successful this year as formis badly needed on the West Coast are refrigerators to ensure a supply of bait, when bait is scarce on the us-which impeded the fishermen in the ual grounds, in order that valuable free use of their nets and traps, time may not be lost. We are told Some of the Port au Port smelters that of the places most favorably situated for this purpose those between Fortune Bay and Placentia Bay would suit bankers best. With the waters of Flat Bay and did fairly bankers out in January and Febru-ary on the La Poile ground, on the Grand Banks in the summer, and on the Labrador Banks in autumn, these subject of elementary military drill places on the West Coast interested here in the beginning of the year and must thrive, and the fisher-
