SWEET, PURE MILK—always on hand when you want it!

If you have never used Libby's Evaporated Milk, you will be amazed to find how good, how convenient and economical it is. Many women who first tried it in some emergency now use it always—they find it gives such satisfactory results.

There's no waiting for the milkman—you can always keep several cans on the shelf and in summer there's no bothering with ice, and in winter the milk waggon can get stuck in a heavy drift of snow as often as it wants to!

And there's less waste—a can of Libby's Evaporated Milk will keep indefinitely before being opened—and after you have opened a can you can use just what you need; the rest, put in a cool place, will keep several days.

Libby's Milk comes from the finest dairying section of America and is processed in our own sanitary condensaries—it is not the "distributed" product of an unknown and nameless plant.

Order a tin from your grocer to-day.

Kemal's Army Gives Greeks Much Worry.

With the Greek Army in the field, Sept. 30. (The Associated Press)—Mustapha Kemal's daring cavalrymen and irregulars who are scattered about Anatolia have given the Greek Army a great deal of anxiety by their attacks upon Greek columns and their bold attempts to capture the Greek General Staff. Crown Prince George of Greece had a narrow escape from injury in one of these Turkish surprise attacks and was hurriedly taken to a place of safety. It was the first real danger he had experienced since he came to the front. While the Greek army was advancing toward Ankara, thousands of these Turks in the rear of the Greek line, were a constant menace to the Greek communications. They turned up when least expected. They advanced quietly to their positions at night and began their attacks at daybreak.

When The Associated Press correspondents were at Urmah, south of the Sakaria River, several hundreds of these Turkish horsemen descended upon the village and attempted to carry off the General Staff, including General Papoulas, Commander-in-Chief, and Prince George. They shelled the barracks and tents of the Greeks and kept up a steady rifle and machine-gun fire. One of their shells fell within 40 yards of Crown Prince George, but fortunately it did not explode. The Greek General Staff was preparing to move 25 miles nearer the front, and the Turkish assault from the rear took them completely by surprise. Only the fact that headquarters had 300 infantrymen available saved the whole Greek executive organization from capture. Had the Turks come the day before they would have found only a handful of men to oppose them, and it is probable at least a part of the Greek staff would have fallen into their hands. The Turkish cavalrymen sallied across the low-lying hills at daybreak and took up positions about a mile from the village in which Greek G.H.Q. were located. At the sound of the alarm from Greek sentries on the crests, General Papoulas ordered every available man, even clerks, typists and orderlies, to take up rifles. The Turkish shells and bullets were humming overhead. Within a few minutes the Greeks had several hundred men ready to answer the Turkish attack. The enemy's fire was so hot and close that the Greeks were able to advance only slowly. They were soon joined by other forces, however, and after two hours of sustained rifle and machine-gun fire the Kemalists were obliged to fall back. They then took refuge in the distant ravines and valleys, and the Greeks returned to their work of transferring G.H.Q. to another spot.

The Swiftest Town on Earth.

PROMINENT CLERGYMAN MAKES THIS STATEMENT.

BRIGHTON, Eng., Oct. 5. (Associated Press).—This popular city by the sea, where thousands of Londoners are wont to spend their week-ends, is declared by the Rev. Dr. Downes, a prominent Wesleyan minister, to be the "fastest town in the world." By that he means the wickedest. "Brighton," he says, "is full of slaves of sensuality. Babes are being nursed in the cradle of immorality and vice. Conscience is here waiting in darkness for earnest Christian work."

The Rev. J. Dixon, another Wesleyan minister, backed him up in his denunciation of the immorality of Brighton. "There's not a town in England in greater need of Methodism," he said. "Nowhere else can you see such a display of the vagaries and follies of fashion."

Jules Verne in the Shade

AROUND THE WORLD IN 17 DAYS.

Paris, Oct. 4. (Associated Press).—At the great airway congress now being organized in Paris in conjunction with the autumn Aero Show, an effort is to be made to join up missing links in the world airchain. Should this be accomplished a rush round the world by air in 408 hours, and at a cost of about \$250 will be one of the possibilities of the future. Airway experts are now ready to specify the machines and map out the route. Leaving London at 8 a.m. on Monday, they say Constantinople could be reached at 4 a.m. on Tuesday and Cairo the same day. Then with a berth booked on an air liner, Sydney, Australia, would be

Variety and Desserts

As variety is the spice of life, so variety of desserts is one of the charms of dinner. A dainty touch to the end gives the thrice-dinnered guest a previous course. Many housewives are known for their desserts—the secret of their dainty dishes resting in Knox Gelatine. Prove it today—try

Knox Maple Syrup
Bull two cups brown or maple sugar and 3/4 cup hot water in a syrup. Soak 1 envelope of Knox Sparkling Gelatine in 1/4 cup cold water and pour hot syrup over this. Put in cool place when nearly set, beat in stiffly beaten whites of two or three eggs and cup of English walnuts, cut up fine. Serve with custard made of yolk of the eggs, 1 pint milk and 3 tablespoons sugar.

Two Puddings—Plum and Apple.
Both Making Two Quarts (16 cups) of Jelly.
With the Plum Pudding, lemon are used for flavoring, but with the Apple Pudding, lemon is an essential of concentrated lemon juice—two envelopes when the two puddings are made. Both require a tablet for coloring.

Let us send you the Knox Gelatine Book and show you the advantages of Knox Gelatine to make one pint—enough to try with any one of our desserts, puddings, salads, jellies, ice cream, etc., etc.

Write back for your free gift—no purchase necessary. CHARLES E. KNOX CO., 400 East Ave., Indianapolis, Ind., U.S.A.

reached at 10 a.m. the following Tuesday. After this, taking the Pacific in another great air voyage, they figure that the passenger would arrive at San Francisco at 4 p.m. on Saturday. The next stage would be the Trans-American route to New York which would be reached at 10 p.m. on Monday to take another air liner to London where it would arrive at 8 a.m. on Thursday.

The distance covered would be 27,000 miles in the space of 17 days. This would put Jules Verne's 80-days trip sadly in the shade. But this is as yet a dream of the future.

AUTOMOBILE TIRES—End of season sale: 32 x 4, straight side, \$28; 33 x 4, clincher, \$36. These are being offered at less than landed cost to clear. E. D. SPURRELL, 365 Water Street. oct5,oct11

Where Musk Comes From.

Musk in the raw looks a good deal like axle grease, and smells worse. The popular notion that the musk of commerce is obtained from the muskrat is a mistake. A somewhat similar perfume may be obtained from the muskrat, but most of the supply comes from the muskdeer, a creature that is carefully reared in India for the sake of the secretion. The secretion is shipped in the crude shape, and is used not only in the manufacture of the liquid perfume sold as musk, but also in very small quantities to give strength and staying power to many perfumes made from the essential oils of flowers.

Curiously enough, the blossoms of two native plants have a noticeably musky odour. One is the well-known small yellow blossom. Its odour is marked, and is counteracted in the commercial perfume called musk. The other is the blood-root.

The pure, white blossom of that early spring plant has a distinct though delicate musky odour. A bean known as the muskbean is a cheap substitute for animal musk.

Beneath the Waves.

Lying along the beds of oceans are about two hundred and twenty-five thousand miles of submarine telegraph cables. More than half of this immense mileage is British, and every year British messages number all told 100,000,000 words. In forty years we have virtually forgotten that the seas were once barriers to international communication. Now they have been narrowed by speedy ships and the deep-laying cables until, as far as communication is concerned, they are little wider than streams across which men can shout to one another. The greatest known depth of the sea is in the mid-Pacific Ocean, and is recorded as five thousand two hundred and sixty-nine fathoms—thirty-one thousand six hundred and fourteen feet—or sixty-six feet short of six statute miles. This sounding was obtained on the United States steamship "Nero," and it is greater than any elevation on that continent, or as far as known, in the world.
