New York, March 21-Noon.-The stock market has done very well today. After pening strength there was an attempt orce prices off a little, but it met with a little, the market displayed a a he received \$3 25 per cwt. lecidedly buoyant tone, and prices are moving up sharply at the noon hour. Indications point to an increase in the short interest, and there is a lack of stocks for sale. These conditions must inevitably produce a further advance not likely to have any seriou setback until the transactions increase argely and we have a big day. On any reasonable break would advise coservative buying of the good railroad stocks, taking Southern Pacific, Union Pacific and the stocks that have lagged a little.
