will the members of the legislature and the officials of the departments. From very extensive inquiries made by The World, hardly a single response favorable to the park site was secured. The answer was: It is inconvenient. We will insist that there will be a constant loss of time and money if the park is selected.

As to the Upper Canada site, the Globe practically admits the desirability of a down town site, but sees insuperable difficulties in the way. Upper Canada college must go out of the present site irrespective of the parliament buildings. Even the Globe admits that the present grounds are "too circumscribed."

But it is not on account of "too circumscribed" grounds that the college must go; the province at large is determined to abolish it, or at least reorganize it, and all the special pleading of the Globe will not save it. The Globe's article of yesterday is a mere special plea in favor of Upper Canada college than the park site. The college must get out of King street, and the buildings must come down, so the Globe makes nothing in preaching up the value of the buildings now on the Upper Canada block.

The Globe says the present site is the best of the down-town ones. It is a good one, but not so good as Upper Canada. But it is preferable to the park. Why should a rich province like Ontario adopt an inconvenient site merely because it may be had for nothing? The province will not grade the cost of the site if convenience and ultimate economy are thereby secured. But we have shown where a down-town site can be had for the taking.

Another absurd idea that the Globe preaches is that "the present site might be given up to meet the growing demand for land in that quarter of the city for business purposes." What has the province got to do with supplying land for business purposes for the city or county? If the province has a site that suits its purposes it will use it irrespective of the "growing demand" of others. It is just because parliament buildings are business buildings that we wish to have them where they are.

We have a great deal more to say on this question. But what we have said is sufficient to establish our way of contention, namely, that the park site would be an inconvenient and ultimately an expensive site; second, that a convenient and free site may be had down town on either the present or the Upper Canada block or Upper Canada college.

WONDERFUL OBSERVERS.

What a Manitoba Authority Has to Say About the Northwest Country.

Messrs. Joshua S. Bowman and John Ratz have written to the Daily News, of Berlin, Ont., concerning their impressions of what they say and heard while in Manitoba. They recommend persons contemplating a settlement in this country to ask themselves the following questions: "What about the winters? What about the summers? What about the length of summer and winter? and their regularity?"

It is wise on the part of intending settlers to ask such questions as these, but our "observers" are a little astray in telling people to ask "themselves" such questions as the above. A better way would be to ask other people that are residents of the country, who have spent some years here, questions very different from those which Messrs. Bowman and Ratz have given to "themselves."

"What about water?" It is well known to a moderate depth, and by using pipes to prevent influx of surface water, in what other city can flowing wells be obtained almost anywhere in the Northwest? By sinking artesian wells to a depth of only sixty feet various kinds of grapes grow in abundance. As to other fruits, what we can neither raise nor afford to import we can live comfortably on the above. A better way would be to ask other people that are residents of the country, who have spent some years here, questions very different from those which Messrs. Bowman and Ratz have given to "themselves."

"What about storms and blizzards?" These are quite as rare as they are in Ontario, and the worst ones are by no means more violent than occasionally occur in the other provinces.

"What about the length of summer and winter?" Our summer is as long that vegetation comes to maturity without suffering from early frosts more than that of any other province. Our winters are steady, and are rendered less disagreeable by the snow. Few citizens of this country can be found who would vote for an exchange of the Manitoba for the Ontario winter, if the opportunity were afforded.

A Vision by the Sea.

A friend of mine, who has returned from a visit to the coast, has revealed to me secrets which are calculated to destroy the illusions pertaining to the nymphs that disport in French bathing dresses in Paris. There he discovered that beneath the tight-fitting jersey water, stays are worn, and many other appliances to aid in fashioning a beautiful figure. I remember going with a lady to one of these French watering-places. We both emerged from our respective bays. Her hair was flowing round her shoulders, her eyes glistened, her cheeks bloomed with a beautiful flush, and her dress lent her a beautiful figure. Soon a wave came and she was gone. I missed my friend. Close by me was a larger family her form was angular, her cheeks hollow, a wisp of hair, not as a ripple in a sea, was hanging from her head. Where was the glorious vision that had stood by me? A voice came from the clattering seats of the bay. It was the vision; but, O, how changed!

Mother's Mothers! Mothers! If you are disturbed at night and broken of rest by a sick child suffering and crying, with the excruciating pain of teething, if so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—send upon it; there is no mistake about it. There is no mother on earth who has ever used it, who does not regard it as the best and most reliable remedy for her child, and in the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere at 25 cents a bottle.
