

### DOMINION ATLANTIC RAILWAY

—AND—  
**Steamship Lines**  
 —TO—  
 St. John via Digby  
 —AND—  
 Boston via Yarmouth  
 "Land of Evangeline" Route.

On and after Oct. 16th, 1911, the Steamship and Train Service of this Railway will be as follows (Sunday excepted):

Express from Halifax	12.21 p.m.
Accom. from Richmond	5.40 p.m.
Express from Yarmouth	1.46 p.m.
Accom. from Annapolis	7.50 a.m.

### Midland Division

Trains of the Midland Division leave Windsor daily, (except Sunday) for Truro at 7.30 a.m., 5.35 p.m., and 7.45 a.m. and from Truro at 6.50 a.m., 3.20 p.m., and 12.45 noon connecting at Truro with trains of the Intercolonial Railway, and at Windsor with express trains to and from Halifax and Yarmouth.

### Boston S.S. Service

BOSTON-YARMOUTH SERVICE.  
 The Royal and United States Mail Steamship "PRINCE ARTHUR" sails from Yarmouth on Wednesday and Saturday on arrival of Express train from Halifax, arriving in Boston next morning. Returning leave LONG WHARF, BOSTON, at 1.00 p.m. Tuesday and Friday.

### St. JOHN and DIGBY

ROYAL MAIL S. S. YARMOUTH.  
 Daily Service (Sunday excepted).  
 Leaves St. John 7.45 a.m.  
 Arrives in Digby 10.45 a.m.  
 Leaves Digby same day after arrival express train from Halifax.

BASIN OF MINAS SERVICE.  
 S. S. "Prince Albert" between Parrsboro-Kingsport-Wolfville daily, (except Sunday).

P. GIBKINS,  
 Kentville  
 General Manager.

**In Constant Use 101 Years**  
 What other liniment has ever undergone such a test? For over a century  
**JOHNSON'S ANODYNE LINIMENT**  
 has been curing Sprains, Strains, Cuts, Lameness, etc. Its long service tells of its merit. It is the household liniment that does not go out. 25c and 50c bottles.  
**L. S. JOHNSON & CO., Boston, Mass.**

**The Monitor, Wedding Stationery**  
 will suit the most fastidious of brides. Correct in style, excellent in workmanship. Old English Wedding Text, Imperial Script, Tiffany Script on smooth or kid finish stationery. Ask for samples.

**To be Well Supplied**  
 with what you want is half the getting together of a good dinner. You have to be provident and lay in your supplies before they're needed. It gives you confidence to look up and see a **Fine Supply of Groceries.**

You can't make better preparation than to buy what you need of these from us now. We will give you choicest to be had and make price to suit you.  
 We pay 22 cents for Butter, 24 cents for Eggs.

**J. E. LLOYD and SON**

**Stoves!**  
 We offer to the public one of the largest assortments ever offered in Bridgetown.  
 Silver Moons, Oak Stoves, from \$5.00 up. Queen Stoves from \$8.25 up. Ranges and Cooks.

**Crowe Elliott Co., Limited, Bridgetown, N. S.**  
 Phone 1 ring Successors to R. Allen Crowe

**This Stove IS NOW MADE WITH Coal Linings**  
 so that it can be furnished to burn either **Wood or Coal**

**Special Prices for the next 30 days** Cash with order.  
 To burn Wood only, \$11.00. To burn Wood & Coal, \$12.50  
**FREIGHT PAID TO YOUR NEAREST STATION.**  
 We have also a full line of Ranges of all styles as well as a good stock of Heating Stoves at very low prices.

### Bridgetown Foundry Co., Ltd.

**Now is the time to SUBSCRIBE for THE MONITOR - SENTINEL AND GET Two Months FREE**  
 \$1.00 WITH A NEW NAME AND ADDRESS WILL PAY SUBSCRIPTION UP TO DECEMBER, 1912.

### POWER FROM WASTE STEAM.

**New Type of Turbine Utilizes Exhaust From Reciprocating Engines.**  
 The advent of the steam turbine engine has proved beyond cavil that fully half the power of steam is wasted in the exhaust of the old reciprocating types of steam engines, says the Philadelphia Record.  
 It was only a few years ago that Charles G. Curtis, working in the shops of the General Electric company at Schenectady, N. Y., proved that the turbine engine was a commercial possibility, and since that date hundreds of these turbine engines have been placed in the mills and factories. The turbine engine, as is well known, is a form of steam engine which is propelled by steam power in much the same way as a water wheel is driven by the weight and fall of water. The pressure of the steam striking against a large number of curved blades whirled the moving parts of the engine. Very recently it was found that a certain type of steam turbine with extra large blades could be made which would utilize the exhaust steam from the old reciprocating engines and turn it into valuable horsepower. One electric light station in Pennsylvania felt the need for more power, so asked for bids to install new engines. When the engineer came to figure on the job he recommended a large low pressure Curtis turbine to be installed to use the exhaust steam from the old engines. Such a turbine was placed, and today it turns this old waste steam into 500 horsepower without burning a pound more of coal.  
 Steam at two or three pounds pressure when exhausted into a vacuum is capable of great power if the working surface of the engine is large enough. It could not be used in a reciprocating engine to advantage because the cylinders would have to be enormous to take care of such a volume of low pressure steam. But the low pressure turbine equipped with wide blades will do the trick very nicely.  
 Diamonds Phosphorescent.  
 Stories of diamonds shining in the dark are more or less familiar to everybody, but few persons perhaps have ever seen this mysterious light of the greatest of gems. One distinguished expert in precious stones claims to have discovered that not only do diamonds really shine in the dark, but that this property may be employed as a test of the genuineness of a diamond.  
 In order to make the gem shine it must be rubbed on wood, cloth or metal. Some diamonds exhibit light after having been exposed to the sun, and since all are not thus affected, it was formerly supposed that the property belonged only to particular diamonds.  
 It is now stated, however, that all diamonds of every grade as to color possess this phosphorescent power, while other kinds of precious stones lack it.  
 It is accordingly possible to ascertain whether a gem is really a diamond or not by observing whether it can be made to emit light in the dark. The cause of phosphorescence of the diamond remains to be explained.  
 Springless Electric Clock.  
 The students of the St. Louis watch-making school have completed a new type of clock that is driven by electricity. Different from the usual form, the pendulum of this clock swings from a point above. It is made from an ordinary clock, but the pendulum is impelled by an electro magnetically operated armature of the oscillating type.  
 The armature in its approach toward the emerging coil closes the circuit by which the coil is energized. Under the attractive influence of the coil the armature is impelled against the pendulum, driving it forward, after which the circuit is broken, leaving the armature free to be returned to its original position under the momentum of the pendulum in its returning swing. The swinging pendulum also operates the escapement lever by which the clock mechanism is advanced, so no weights or springs are necessary.  
 Whaling in the South Atlantic.  
 Seven whaling companies now occupy sites in the island of South Georgia, where the whole carcass of the whales is converted into oil and fertilizers, says the British colonial report from Stanley, the capital of the Falklands. Six companies fish in the waters of the south Shetlands, pursuing the whale through Pelagic straits to the icy shores of Graham Land. The 1909 season in the dependencies was a good one, but was not so remunerative around the Falklands. A station at New Island, fitted with the latest machinery and lighted by electricity, was completed during the year. There were exported from the Falklands last year 4,000 tons of whale oil, worth \$221,426, against 2,929 tons, worth \$275,930, in 1908 and 2,300 tons, worth \$210,000, in 1907, which shows a wide variation in market values.

**Protection of Boilers.**  
 Zinc is often used to prevent the corrosion of boilers. Its efficiency is due to the fact that any metal with a greater tendency than iron to dissolve, on which hydrogen is liberated with more difficulty than on iron, will protect the latter at the expense of the more soluble metal. The protection, however, becomes more ineffective in pure water at a distance greater than an inch. Salt or some other electrolyte will extend the zone to twenty inches or more.  
 Minard's Liniment Cures Distemper.

### CAUSES MUCH DISEASE

**Advice About Stomach Troubles and How to Relieve Them.**  
 Do not neglect indigestion which may lead to all sorts of ills and complications. An eminent physician once said that ninety-five per cent of all the ills of the human body have their origin in a disordered stomach.  
 Our experience with Rexall Dyspepsia Tablets leads us to believe them to be among the most dependable remedies known for the relief of indigestion and chronic dyspepsia. Their ingredients are soothing and healing to the inflamed membranes of the stomach. They are rich in pepsin, one of the greatest digestive aids known to medicine. The relief they afford is very prompt. Their use with persistency and regularity for a short time tends to bring about a cessation of the pains caused by stomach disorders.  
 Rexall Dyspepsia Tablets help to insure healthy appetite, to aid digestion, and thus promote nutrition. As evidence of our sincere faith in Rexall Dyspepsia Tablets, we ask you to try them at our risk. If they do not give you entire satisfaction, we will return you the money you paid us for them, without question or formality. They come in three sizes, prices 25 cents, 50 cents, and \$1.50. Remember, you can obtain them only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

### A COLLECT FOR THANKSGIVING.

I thank thee, Father, for thy sky,  
 Wherein thy little sparrows fly,  
 For unseen hands that build and break  
 The cloud pavilions for my sake,  
 This feeding beauty, high and wild,  
 Toward which I wonder as a child.  
 And thanks for morning's stir and light  
 And for the folding hush of night;  
 For those high duties that spread  
 The star-filled chasm overhead;  
 For elfin choristers that yield  
 The green fire of the April field;  
 For all the foam and surge of bloom  
 For leaves gone glorious to their doom—  
 All the wild loveliness that can  
 Touch the immortal in man.  
 Father of Life, I thank thee, too,  
 For old acquaintance, near and true;  
 For friends who came into my day  
 And took my loneliness away;  
 For faith that held on to the last,  
 For all sweet memories of the past—  
 Dear memories of my dead that send  
 Long thoughts of life and of life's end,  
 That make me know the light  
 Of a deeper world than it reveals.

### THE CLARK CASE

(St. John Times.)  
 C. F. Sanford, of Earnhill, Ewin; & Sanford, who has been in New York in connection with the Clark case, returned yesterday to St. John from Ottawa, to which city he went in connection with the proceedings necessary to secure extradition papers.  
 Mr. Sanford said yesterday that there was nothing he could say about the case except that the formalities in connection with the extradition would be completed within a week or two and that then Clark would be brought to St. John and placed on trial.  
 Regarding the accusations against the prisoner, Mr. Sanford declined to speak, saying that these would come out in due course in court.  
 Clark is charged with larceny, and so far as the Bank of New Brunswick is concerned it is understood that the amount for which he is held responsible is twenty-five thousand dollars.  
 Clark is now held without bail, having been remanded for thirty days but the extradition papers will be ready before that period expires and he will probably be brought to St. John within a week or two. He will be taken to the police court here and held for trial at the next circuit court.  
 The New York Sun of Saturday, in its account of the proceedings in the Clark case in the Harlem police court said:  
 "Frank M. Patterson, who is counsel here for the Bank of New Brunswick, an institution which has branches scattered throughout Canada, said last night that the two charges against Clark represented only a small part of his stealings. The total, he said, would amount to twenty-five thousand dollars. One hundred and ten thousand dollars more was stolen from the bank through the connivance of a gang of American crooks, of which Clark was supposed to have been a member, according to the lawyer.  
 Clark when arraigned in court seemed to feel disturbed and humiliated. The Pinkertons had been described in one of his letters as having "done punk work on the case," and the detectives were somewhat disposed to remind the prisoner that his description was not precisely borne out by what had happened.

**Learn why PURITY FLOUR is unlike any other brand**

**PURITY FLOUR** is unlike any other brand of flour. No two milling companies follow exactly the same process of milling. In fact, no two different brands of flour in the world are exactly alike in quality.  
 And here is another fact worth knowing: Every wheat berry contains both high-grade and low-grade portions.

The process of milling PURITY flour costs more than to mill ordinary flour. The low-grade portions are separated and excluded. PURITY is an ALL-HIGH-GRADE, hard wheat flour. It has greater strength, greater absorption and greater expansion. It is a thirstier, more elastic flour. It drinks more water and expands into more loaves.

Use PURITY FLOUR for your next batch of bread. Count the loaves. You'll find you have made "MORE BREAD AND BETTER BREAD" from PURITY than when you've used an equal weight of weaker and cheaper flour.

**"More bread and better bread"**

IMAGINE, if you can, how much whiter, and more toothsome, and more nutritious, the bread made from such a HIGH-GRADE flour must be.

And can you imagine yourself enjoying the flaky pie-crust and the light, delicate cake? —your reward for using PURITY flour  
 When making pastry, please remember to add more shortening than required with ordinary flour—for on account of its extra strength, PURITY FLOUR requires more shortening for best pastry-results  
 Yes, PURITY FLOUR costs slightly more than ordinary flour. But use it once and you'll say it's worth more—much more—than the difference.  
 Add PURITY FLOUR to your grocery list right now.

### DISTRESSING TRAGEDY

A distressing tragedy occurred at Petite Riviere, Lunenburg county, Friday afternoon, when Mrs. Jans Lohnes cut the throat of the five-months old child of Jacob Cross of that place.  
 An epidemic of scarlet fever has been prevailing at Petite Riviere and among the homes visited was that of Jacob Cross. Under the stress of her troubles Mrs. Cross became demented, and was sent to the Nova Scotia Hospital at Dartmouth. There being no one at home to properly look after the child it was given to the care of Mrs. Lohnes, who is about fifty-two years of age. About two weeks ago the nine-year-old daughter of Mrs. Lohnes contracted scarlet fever, and since that time Mrs. Lohnes has been quarantined in her home with the two children, seeing no one but the physician, and occasionally the Overseers of the Poor.  
 It is thought that the isolation from her friends caused the woman to become melancholy. What prompted Mrs. Lohnes to commit the crime is not known, but it is surmised that she looked upon the Cross child as the cause of her trouble, and in a fit of melancholy cut its throat.

### FOR HAPPIERNESS IN MARRIED LIFE.

If the bride should apply the motto, "Live and let live," if fancy she would find that wedded life would go much more smoothly.  
 I know a married woman who frets because her husband will not wear the same kind of underwear that she does, and another who protests almost every morning because her husband eats his fruit at the end instead of the beginning of his breakfast, and a man who is unhappy because his wife goes to the Presbyterian while he goes to the Methodist church and another who is deeply disturbed because his wife believes in woman's suffrage while he does not.  
 I think they are perfectly foolish.  
 All these differences are tremendously unimportant.  
 Doubtless husband may change a habit or give up an eccentricity for a wife he loves, and vice versa, but why should they be asked to?  
 As long as habits do not hopelessly collide and eccentricities are not really objectionable, why shouldn't they both "live and let live?"  
 The best governed countries, they say, are those which have the fewest laws.  
 And it seems to me that the most harmonious wedded life must be that in which the parties place the fewest possible restrictions on each other.  
 Ruth Cameron.

### A GREAT DISCOVERY

Certain Ingredients That Really Promote Hair Growth When Properly Combined.  
 Resorcin is one of the most effective germ destroyers ever discovered by science, and in connection with Beta Naphthol, which is both germicidal and antiseptic, a combination is formed which destroys the germs which rob the hair of its natural nourishment, and also creates a clean, healthy condition of the scalp, which prevents the development of new germs.  
 Pilocarpin, although not a coloring matter or dye, is a well-known ingredient for restoring the hair to its natural color, when the loss of hair has been caused by a disease of the scalp.  
 These ingredients in proper combination, with alcohol added as a stimulant and for its well-defined nourishing properties, perfect perhaps the most effective remedy that is known for scalp and hair troubles.  
 We have a remedy which is chiefly composed of these ingredients, in combination with other extremely valuable medicinal agents. We guarantee it to positively cure dandruff and to grow hair, even though the scalp in spots is bare of hair. If there is any vitality left in the roots, it will positively cure baldness, or we will refund your money. If the scalp has a glazed, shiny appearance, it's an indication that baldness is permanent, but in other instances we believe baldness is curable.  
 We want every one troubled with scalp disease or loss of hair to try Rexall "93" Hair Tonic. If it does not cure dandruff and grow hair to the satisfaction of the user, we will without question or quibble return every cent paid us for it. We print this guarantee on every bottle. It was effected a positive cure in ninety-eight per cent of cases where put to a practical test.  
 Rexall "93" Hair Tonic is entirely unlike, and we think, in every particular, better than anything else we know of for the purpose for which it is prescribed. We urge you to try this preparation at our entire risk. Certainly we know of no better guarantee to give you. Remember you can obtain Rexall Remedies in Bridgetown only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.
