including several from country societies, to the amount liver a course of lectures. of nearly £250, leaving about £150 of debt still unprovided for. This amount, as all available resources here are exhausted, the Committee hope will be made up by conwhich have not yet subscribed towards this relief fund.

V. PROGRESS OF THE CAUSE.

Britain.—There are some indications of decided progress in the mother country. 1st, The total prohibition of the sale of intoxicating drinks in barrack canteens, a measure respecting which the Montreal Temperance Society had the honour of petitioning Her Majesty, as Chief of the Forces, several years ago. 2d, There is a great increase in the consumption of coffee by the la-Souring classes instead of beer, in many parts of Britain, and especially in the metropolis. 3d, Temperance pubfications continue to be issued freely, and many of them! f a high order.

United States.—The struggle for the prohibition of he sale of intoxicating drinks is going on with various access in several of the States, and lecturers and the fess are actively employed in various parts of the buntry in advancing this great cause.

Canada East.—We have to record with feelings of great atisfaction, the salutary change which has been effected, hiefly through the efforts of the Rev. C. Chiniquy among ar French Canadian neighbours. The revolution in ablic feeling respecting the use of intoxicating drinks being very great, and, more or lest, pervading all classes. Our Courts of Justice also give forth a certain sound the subject. Judges Mondelet and M'Cord have, in targes delivered to grand juries, taken ground respecting e use of, and traffic in, intoxicating drinks, which will use their names to descend with honour to posterity, Received from Rent of Hall for five meetings, d we may add thut grand juries, and especially that of is last Court of Quarter Sessions, held for this district, Be responded in a no less decided manner.

New Year's Day, which in this city used to be a seaof peculiar intemperance, has also been to a great font rescued from drinking usages, as was specially pilest at the commencement of the present year, and in the whole, we believe the consumption of intoxiing drinks has very much diminished in the city.

the surrounding country, several parishes have been fely cleansed from the traffic in intoxicating drinks, nearly the whole of the population have taken the age of total abstinence.

Sountry merchants in those places have, in many s, returned their supplies to the wholesale Canadian chants in town, and some of the latter declare their ation of discontinuing the traffic as soon as present ke are exhausted.

dur Rechabite brethren have also been actively em. ged in the Temperance cause. They have held a s of Temperance meetings in various parts of the during the past two months, with excellent results. Canada West .- Two or three districts in Canada t have been actively engaged in the Cause through past year, among which may be specially noted the and and Home Districts, each of which has engaged

been obtained, chiefly from members of committee, and our former Recording Secretary, Mr. Wadsworth, to de-

The Committee cannot relinquish their charge without recording their continued and increasing conviction of Pributions from the societies throughout the whole country the excellence and importance of this cause, and that no other good enterprise can flourish, if the means of those who support it are to a great extent wasted on intoxicating drinks, and if the mind: of those who should be becefited by it are clouded and stupified by the same baneful agency.

ABSTRACT OF TREASURER'S ACCOUNT.

The Montreal Temperance Society in account with James Court, from 1st January, 1848, to 1st February, 1849.
