Publishers' Department

The old and reliable house of Wm. R. Warner & Co. will be incorporated under the laws of Pennsylvania, with Mr. Wm. R. Warner, Jr., retaining his connection as President of the corporation. This move enables Mr. Warner, who has managed the entire business, to transfer to others many of the details of management, and at the same time assures his host of friends and patrons in the trade of a continuation of the safe and conservative policy which has proven the keynote of its success, and which has characterized it from its foundation in 1856.

TREATMENT OF DYSMENORRHEA.—Since dysmenorrhea, like all other anomalies of menstruation, is merely a symptom of a pathologic state of the uterus or one or more of its appendages, it is perfectly obvious that remedial agents capable of effecting the removal of the underlying cause are preferable, in its treatment, to drugs that are solely palliative in action. In the treatment of all varieties of dysmenorrhea it is possible to relieve the pain at once, normalize the pelvic circulation, restore the uterine contractile power and correctively affect the acting cause. By such a course the comfort of the subject is more promptly brought about and durable relief is more easily effected. These ends can be achieved by the administration of Ergoapiol (Smith) in doses of one capsule four times daily during the menstrual period. In the treatment of recurrent dysmenorrhea, the most gratifying results are obtained by beginning the administration of Ergoapiol (Smith) three or four days in advance of the catamenia and continuing its employment until menstruation has ceased. Despite the fact that Ergoapiol (Smith) exerts a pronounced analgesic and sedative effect upon the entire reproductive system, its use is not attended with the objectionable by-effects associated with anodyne or narcotic The unvariable certainty, agreeableness and singular promptness with which Ergoapiol (Smith) relieves the several varieties of dysmenorrhea has earned for it the unqualified indorsement of those members of the profession who have subjected it to exacting clinical tests. Whilst hot sitz-baths, vaginal injections and similar measures may be advantageously employed in conjunction with Ergoapiol (Smith), their use is not essential; in fact, the
