

BOAT DRILL ON THE EMPRESS OF RUSSIA

Empresses) and British Columbia generally will wish success to this latest enterprise of the "C. P. R." By leaving England on the initial voyage on board one of these new liners, which come here by the eastward route, and then crossing Canada by one of the through trains to Montreal and taking passage in the Empress of Britain or the Empress of Ireland for Liverpool, it will be possible for a passenger to "put a girdle

round the earth" exclusively by means of the boats and trains of this great company. The ordinary sailings of the company from Liverpool to Montreal, its train journey across Canada to Vancouver, and the voyage on a Pacific Empress from here to Hong Kong, represent a continuous trip of 11,840 miles. In that great triumphal arch of modern travel, Vancouver may justly claim to be the keystone.
