David Shaldoff, President

7-11 Pools & Metalfab Ltd. manufactures a broad range of above ground, onground and inground steel walled, vinyl-lined swimming pool kits. The above ground products feature walls fabricated of hot-dipped galvanized steel with baked-on brown metallic enamel paint. Walls are an attractive brown woodgrain finish. The vinyl liner is of 20 mil virgin vinyl. Sizes run from 15 feet to 27 feet (4.6 m to 8.3 m) in the round shape and 15 feet $\times$ 24 feet (4.6 m $\times$ 7.4 m) to 18 feet $\times$ 33 feet (5.5 m $\times$ 10.1 m) in the oval shape.

The onground and inground product lines feature Z700/G235 zinc protection on 14 ga. steel walls and adjustable A-frames for added wall strength. Liners are 30 mil virgin sanitized vinyl decorated with exclusive patterns. The

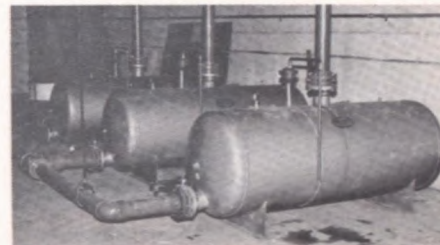

onground is designed for surface installation with sizes ranging from 13 feet $\times$ 24 feet (4 m $\times$ 7.4 m) to 19 feet $\times$ 41 feet (5.8 m $\times$ 12.6 m), along with 20 foot (6.1 m) and 26 foot (8 m) sizes. The inground product line consists of various shapes ranging in sizes from 12 feet $\times$ 24 feet (3.7 m $\times$ 7.4 m) to 20 feet $\times$ 40 feet (6.1 m $\times$ 12.3 m). The inground pool features a patented coping for installation ease.

S.S. Filtration & Development Co. Ltd.

1429 Speers Road
Oakville, Ontario
Canada L6L 2X5
Telephone: (416) 827-3171
Main Export Contact:
Austin Carroll

Incorporated in 1961, S.S. Filtration & Development Co. Ltd. has built quality commercial and semi-commercial water filtration systems for over 25 years. The company's Past President and Founder, J.W. Carroll, is said to be the inventor of the high rate sand filter. The innovative design of using one grade of sand and screens, instead of multiple layers of filter media, (ie; sand and gravel) allows for higher flow rates without sacrificing filtration performance. From the sand and screen method comes the company's name — S.S. Filtration.

The commercial filtration tanks from S.S. Filtration are constructed of $\frac{1}{4}$ inch steel and constructed in a horizontal configuration which requires less space (up to 25 per cent less) and allows the units to be stacked if

necessary. As a replacement system, these units can be moved through a standard doorway. The inside of the tank has two applications of epoxy coating to protect against corrosion and the outside has a primer and top coat. The heavy duty tank is also outfitted with a sacrificial anode.

The underdrain system is constructed of PVC plastic laterals as is the diverter assembly.

Sauna Craft

115 Bowes Road
Unit 3
Concord, Ontario

Al Wynn, Manager

Sauna Craft manufactures pre-built sauna rooms, sauna liner kits and sauna heaters. The pre-build sauna is ideal for the do-it-yourselfer as the walls and ceilings are assembled using the 2 inch by 4 inch (50 $\times$ 100 cm) double tongue-and-groove, clear, kiln dried, western red cedar. The sauna room slides together in just three hours. The benches are pre-built and solid cedar door, with window, is pre-hung on channelled jambs. The sauna comes complete with a heater, control, light and floor.

The sauna liner kit is designed for the building contractor or handy man. The kit includes 1 inch by 4 inch (25 mm $\times$ 100 mm) tongue-and-groove western red cedar in 7 foot (2133 mm) or 8 foot (2438 mm) lengths for the walls and ceilings, and 2 inch by 4 inch

(50 mm $\times$ 100 mm) clear cedar for the benches. The liner kit comes with a heater, control, light, sauna door and complete instructions.

Sauna Craft also manufactures the widest range of sauna heaters on the market.
