Toronto Women Might Tell Hair Secret

A great many Toronto women, who have an abundance of beautiful hair, know about a remarkable hair formula which every woman ought to know about. For a number of years Toronto druggists this formula. Undoubtedly the use of this formula is largely the secret of the beauty and luxuriance of the hair of very many Toronto women—and men, too. The formula consists of six ounces of bay rum two ounces lavona de composee, and one helf drachm of mentital crystels. and one-half drachm of menthol crystals. Some people add a teaspoonful of per-fume. A New York physician and a New York chemist were recently consulted regarding the efficacy of this mixture, and they both say they know of nothing better to destroy dandruff, stimulate hair frowth, cleanse and invigorate the scaip, stop falling hair, and to make the hair fluffy and give it invited in the state of the state of the same of the state of the same they both say they know of nothing better to destroy dandruff, stimulate hair frewith, cleanse and invigorate the scalp, stop falling hair, and to make the hair fuffy and give it lustre. WANTS CANADA TO PROBE SHIFTING OF OFFICERS

Canadian Associated Press Cable.
LONDON, Nov. 3.—This week's Truth recommends that the Canadian military authorities make enquiry into statements current at Shorncliffe regarding wholesale changes in artillery comnands, which was apparently done without warning or reason given. All these officers, says Truth, some of whom, if not all, have come out in command of their batteries from Can ada, are transfered to the reserve brigade. This means that their prospects of going to the front are closed for an indefinite time in favor of the new selections of the brigadier. Such wholesale shunting of men at such short notice will require a good deal of

CANADIAN ORGANIZER

Hamilton and Attended the Meetings.

Several sessions were held yesterday in the Labor Temple by the Hydro men who are on strike, but nothing was definitely decided on. and the press committee had nothing to report at the conclusion of last night's neeting.

John Flett, Canadian organizer of

the American Federation of Labor,

the American Federation of Labor, sarrived in Toronto from Hamilton and attended the meetings.

Refused to Strike.

Twenty of the 233 hydro-electric linemen who were called out on strike by their union on Tueseday evening, refused to strike and reported for duty at the hydro yesterday morning. General Manager Couzens of the hydro stated that everything was running all right. A few street lights burned out, but were fixed by a temporary staff of repair men. Mr. Couzens also stated that after the men went on strike a 1400 foot service was installed in the old General Hospital, which is to be used by the soldiers. "The hydro," he said, "is prepared to install new services, despite the strike."

Mr. Couzens stated that he thought it was not improbable that the strike

tions contained in an existing award, not having been lived up to by the hydro commission, notified the hydro-electric system of their dissatisfaction, and as this award expired on May 1, 1915, it became necessary for them to give 30 days' notice to the system of any intended change.

"This was done and a committee was appointed to see the manager, Mr. Couzens. After several interviews a reply was handed to the men by him.

June 20, 1914, and to bring the same into harmony with the conditions as they exist on the system today, the following are to apply:

"In the case of employes with less than one year's service, intermittent periods of employment will not be considered when calculating the length of service unless such periods are separated by breaks of less than a week's duration, and provided also that such break or breaks in the period are due. break or breaks in the period are due to a reason that, in the opinion of the management, is bona fide. If breaks occur after the completion of the first year of service, and are similarly bona fide, and are of less than three months' duration, they shall not be considered as a cause for recommencing the period of employment for the purpose of calculating the wages to be paid. In every case, however, the ac-

tual duration of the time lost from any cause shall in all cases be deducted from the period of employment.
"It must, of course, be perfectly clear that length of service of necessity does not carry with it increased wages, but only where this length of service is coupled with efficiency.

An Interpretation.

"An effort has apparently been made to read into the arbitration award the meaning that because a wage is expressed as 'so much a month' this automatically entitles the recipient to the benefits of 'continuous' employment. Such, however, is not the case. The wages expressed as above will be calculated on the basis of the normal average hours of work and the rate will be paid for hours worked only.

"As regards the line foremen, where there is rainy weather during continuous work, no deduction snall be made for rainy days, provided the foreman reports at the office and gives general assistance to the office staff. "Overtime rates where payable will for the French in their campaign in be as follows: For the first five hours Kamerun the German colony in overtime worked between 5 p.m. and

Viscount Morley of Blackburn deprecated the attacks on the premier and pointed out that when he left the cabinet he did not trouble the lords with any reasons, which he considered good practice, especially when the country is at war.

Speaking of the censorship, he asked the government to take steps to prevent official interference with the publication of intelligence unless it was calculated to prejudice military and naval operations. The freedom of the press he declared to be as important as the greatest constitutional issue, and he agreed with Lord Selborne when he spoke of the stupidity of the censors' actions. Everything which made the enemy think it was afraid of the truth was an encouragement to the enemy.

Lord Morley deplored the effect on neutrals of the ostrich-like activities and childlike insincerities of the cen-sorship and added that he had never Mr. Couzens stated that he thought it was not improbable that the strike had been fomented by agents anxious to cripple the work of turning out munitions of war.

The alleged statement that R. L. Baker, superintendent of construction and operation, had been around to the men, telling them that they must reapply for their positions was denied yesterday by Mr. Couzens.

He said the commission was prepared to re-engage such men as they have openings for who apply on or before the usual hour, at which the system's men of their grade ordinarily start work, on or before next Thursday.
